Population Growth Control:

Population Control Steven Mosher, 2011-12-31 For over half a century policymakers committed to population control have perpetrated a gigantic costly and inhumane fraud upon the human race They have robbed people of the developing countries of their progeny and the people of the developed world of their pocketbooks Determined to stop population growth at all costs those Mosher calls population controllers have abused women targeted racial and religious minorities undermined primary health care programs and encouraged dictatorial actions if not dictatorship They have skewed the foreign aid programs of the United States and other developed countries in an anti natal direction corrupted dozens of well intentioned nongovernmental organizations and impoverished authentic development programs Blinded by zealotry they have even embraced the most brutal birth control campaign in history China s infamous one child policy with all its attendant horrors There is no workable demographic definition of overpopulation Those who argue for its premises conjure up images of poverty low incomes poor health unemployment malnutrition overcrowded housing to justify anti natal programs The irony is that such policies have in many ways caused what they predicted a world which is poorer materially less diverse culturally less advanced economically and plagued by disease The population controllers have not only studiously ignored mounting evidence of their multiple failures they have avoided the biggest story of them all Fertility rates are in free fall around the globe Movements with billions of dollars at their disposal not to mention thousands of paid advocates do not go quietly to their graves Moreover many in the movement are not content to merely achieve zero population growth they want to see negative population numbers In their view our current population should be reduced to one or two billion or so Such a goal would keep these interest groups fully employed It would also have dangerous consequences for a global environment

A History of Human Population Control Paul F. Kisak, 2015-12-14 Human population control is the practice of artificially altering the rate of growth of a human population Historically human population control has been implemented with the goal of increasing the rate of population growth In the period from the 1950s to the 1980s concerns about global population growth and its effects on poverty environmental degradation and political stability led to efforts to reduce population growth rates While population control can involve measures that improve people s lives by giving them greater control of their reproduction a few programs most notably the Chinese government s one child policy have resorted to coercive measures This book discusses the various methods and impacts of human population control

Fatal Misconception Matthew Connelly, 2010-03-30 Connelly tells the disturbing story of a quest to remake ourselves by policing national borders and breeding better people With its transnational scope and exhaustive research this critique uncovers the cost inflicted by a misguided humanitarian movement and urges renewed commitment to the reproductive rights of all people
