infant mortality and urban and rural population change are discussed in detail for each major region. Rarely has there been a better opportunity to examine the spatial economic, psychological and political factors contributing to demographic stress in a current setting. These demographic processes are not only unique as a domestic social phenomenon but are also immensely significant in their global impact influencing international migration and foreign aid. Gendering Post-Soviet Space Tatiana Karabchuk, Kazuhiro Kumo, Kseniia Gatskova, Ekaterina Skoglund, 2021-02-01. This volume combines approaches from three disciplines: economics, sociology and demography and empirically analyzes the key aspects of the labor market and social demography processes in post-Soviet transitional societies while focusing on the gender perspective. Here readers will find empirical studies on such countries as Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Russia, Tajikistan, Ukraine and Uzbekistan. The volume contributes to the literature by addressing the lack of academic empirical research on gender difference issues in the labor markets of post-Soviet countries as well as gender inequalities in fertility preferences, gender disparities among the youth and elderly, the gender pay gap, gender differences in employment and female voices. The book brings together researchers of different disciplines from a variety of countries, distinguishing this project as international and interdisciplinary. The authors use the quantitative survey micro data approach as well as the qualitative methods of interview data analysis to provide a comprehensive and detailed overview of the economic and social developments in the region regarding gender differences. The volume consists of three parts tackling the following topics: 1. gender differences and demography, family formation and fertility, youth and elderly employment; 2. gender differences and labor market, gender wage gap, motherhood wage penalty, gender differences among freelancers and women in STEM science; and 3. gender differences well-being and gender equality, attitudes, women's voices, women's collective actions, gender equality attitudes and spending patterns of housewives. Dire Demographics Julie DaVanzo, Clifford Anthony Grammich, 2001. Presents a Rand study of population trends in the Russian Federation. Urban Growth in Emerging Economies Gordon McGranahan, George Martine, 2014-04-29. Along with globalization, urban transitions have been central in the southward shift in economic power towards the newly emerging economies. As this book shows, however, these transitions have not been painless and it is important for the rest of the urbanizing world to learn from the mistakes. It examines the role of urbanization and urban growth in the emerging economies, taking the BRICS countries: Brazil, Russia, India, China and South Africa as case studies. Their different approaches towards urbanization have shaped their historical development paths and assisted or constrained their futures. Several of the BRICS bear heavy burdens from past failures to accommodate urban growth inclusively and efficiently and many other urbanizing countries in Asia and Africa are in danger of replicating their mistakes. The overriding lesson of the book is that cities and nations must anticipate urbanization and accommodate urban growth proactively so as not to be left with an enduring legacy of inequalities and lost opportunities. This book is aimed at students and researchers in urban studies and development studies. It will also be of interest to policy advisors concerned

with urbanization and the role of cities in a country's development **Women's Health in Post-Soviet Russia** Michele Rivkin-Fish, 2005-08-04 Russia's maternal health crisis and postsocialist transition examined through ethnographic observation in clinics and hospitals *Global Ageing in the Twenty-First Century* Zachary Zimmer, 2016-04-22 Population ageing a growth in the proportion of a population that is in older age is now occurring in every region and nearly every country of the world. Indeed the growth of older populations is among the important global phenomena of the twenty first century. It poses both opportunities and challenges for societies and policy makers but these are far from uniform worldwide. Dynamic factors are at work impacting on how ageing will influence people, places and policies and there are large variations in the rate and timing of population ageing across countries owing to differing social health and economic circumstances and a variety of policy options from which to choose. Given this variation in the context of global ageing as a backdrop, this edited book focuses on three overarching themes that are among the most critical to understand if societies are to age successfully in the twenty first century and beyond: Healthy ageing and health care, the ageing workforce, retirement and the provision of pensions, shifting intergenerational relations. These three themes are cross cut by other dimensions that are intertwined with the dynamic processes of ageing such as immigration, emigration, contrasting policy regimes and global and national economic forces. This ground breaking book will be of interest to all scholars, students and policy makers working within this area of study *Fragile Migration Rights* Matthew Light, 2016-03-10 The Soviet Union comprehensively governed the mobility of its citizens by barring emigration and strictly regulating internal migration. In the aftermath of the Soviet collapse, the constitution and laws of the new Russian Federation appeared to herald a complete break with the repressiveness of the previous government. Russian law now proclaims the right of Russian citizens and residents to move around their country freely. This book examines how and why this post Soviet legal promise of internal freedom of movement has been undermined in practice by both federal and regional policies. It thereby adds a new dimension to scholarly understanding of the nature of rights, citizenship and law enforcement in contemporary Russia. Most contemporary works focus on the attempts of developed Northern countries to regulate migration from the global South to the global North; here Matthew Light examines the restriction of migration within Soviet and post Soviet Russia, providing a comprehensive view into an area rarely explored within migration scholarship. *Fragile Migration Rights* develops a comprehensive theoretical framework to analyse this complex subject. It is essential reading for students and academics from a range of disciplines including criminology, human rights, migration studies and political science **Small-town Russia** Anne White, 2004 This book examines a number of key questions about social change in contemporary Russia: issues such as how people survive when they are not paid for months on end, the New Poor, the falling birth rate, why so many Russian men die in middle age, whether regional identities are becoming stronger and how people's sense of Russianness has developed since the creation of the Russian Federation in 1992. It examines these issues by looking at actual experiences in three small Russian towns. It includes a great deal of

original ethnographic research and by looking at real places overall provides a good sense of how different aspects of social change are interlinked and how they actually affect real people's lives
