The Boundless Sea Peregrine Horden, Nicholas Purcell, 2019-09-30 This volume brings together for the first time a collection of twelve articles written both jointly and individually by Peregrine Horden and Nicholas Purcell as they have participated in the debates generated by their major work *The Corrupting Sea A Study of Mediterranean History* 2000 One theme in those debates has been how a comprehensive Mediterranean history can be written how an approach to Mediterranean history by way of its ecologies and the communications between them can be joined up with more mainstream forms of enquiry cultural social economic and political with their specific chronologies and turning points The second theme raises the question of how Mediterranean history can be fitted into a larger indeed global history It concerns the definition of the Mediterranean in space the way to characterise its frontiers and the relations between the region so defined and the other large spaces many of them oceans to which historians have increasingly turned for novel disciplinary cum geographical units of study A volume collecting the two authors studies on both these themes as well as their reply to critics of *The Corrupting Sea* should prove invaluable to students and scholars from a number of disciplines ancient medieval and early modern history archaeology and social anthropology CS1083

Paleodemography Robert D. Hoppa, James W. Vaupel, 2008-10-30 Paleodemography is the field of enquiry that attempts to identify demographic parameters from past populations usually skeletal samples derived from archaeological contexts and then to make interpretations regarding the health and well being of those populations However paleodemographic theory relies on several assumptions that cannot easily be validated by the researcher and if incorrect can lead to large errors or biases In this book physical anthropologists mathematical demographers and statisticians tackle these methodological issues for reconstructing demographic structure for skeletal samples Topics discussed include how skeletal morphology is linked to chronological age assessment of age from the skeleton demographic models of mortality and their interpretation and biostatistical approaches to age structure estimation from archaeological samples This work will be of immense importance to anyone interested in paleodemography including biological and physical anthropologists demographers geographers evolutionary biologists and statisticians

Makarewicz, 2023-02-09 HANDBOOK OF ARCHAEOLOGICAL SCIENCES A modern and comprehensive introduction to methods and techniques in archaeology In the newly revised Second Edition of the Handbook of Archaeological Sciences a team of more than 100 researchers delivers a comprehensive and accessible overview of modern methods used in the archaeological sciences The book covers all relevant approaches to obtaining and analyzing archaeological data including dating methods quaternary paleoenvironments human bioarchaeology biomolecular archaeology and archaeogenetics resource exploitation archaeological prospection and assessing the decay and conservation of specimens Overview chapters introduce readers to the relevance of each area followed by contributions from leading experts that provide detailed technical knowledge and application examples Readers will also find A thorough introduction to human bioarchaeology including hominin evolution and paleopathology The use of biomolecular analysis to characterize past environments Novel approaches to the analysis of archaeological materials that shed new light on early human lifestyles and societies In depth explorations of the statistical and computational methods relevant to archaeology Perfect for graduate and advanced undergraduate students of archaeology the Handbook of Archaeological Sciences will also earn a prominent place in the libraries of researchers and professionals with an interest in the geological biological and genetic basis of archaeological studies

Advances in Archaeological Method and Theory Michael B Schiffer, 2014-06-30 Advances in Archaeological Method and Theory Volume 1 presents the progressive explorations in methods and theory in archeology This book discusses the strategy for appraising significance which is needed to maximize the preservation and wise use of cultural resources Organized into 10 chapters this volume begins with an overview of planning for the best long term use of cultural resources which is the essence of conservation archeology This text then examines importance of the concept in cultural ecological studies Other chapters consider the methods used in determining the density size and growth rate of human populations This book discusses as well the use of demographic variables in archeological explanation The final chapter deals with the decisions that must be made in designing a survey and to identify the alternative consequences for data recovery of various strategies This book is a valuable resource for archeologists and planners

The Neolithic Demographic Transition and its Consequences Jean-Pierre Bocquet-Appel, Ofer Bar-Yosef, 2008-09-30 The transition from hunting and gathering to farming the Neolithic Revolution was one of the most significant cultural processes in human history that forever changed the face of humanity Natu an communities 15 100 12 000Cal BP all dates in this chapter are calibrated before present planted the seeds of change and the Pre Pottery Neolithic PPN ca 12 000 ca 8 350Cal BP people were the rst to establish farming communities The revolution was not fully realized until quite late in the PPN and later in the Pottery

Neolithic PN period We would like to ask some questions and comment on a few aspects emphasizing the linkage between biological and cultural developments during the Neolithic Revolution The biological issues addressed in this chapter are as follows Is there a demographic change from the Natu an to the Neolithic Is there a change in the overall health of the Neolithic populations compared to the Natu an Is there a change in the diet and how is it expressed Is there a change in the physical burden stress people had to bear with Is there a change in intra and inter community rates of violent encounters From the cultural perspective the leading questions will be What was the change in the economy and when was it fully realized Is there a change in settlement patterns and site nature and organization from Natu an to Neolithic Is there a change in human activities and division of labor

Human Evolutionary Demography Oskar Burger,Ronald Lee,Rebecca Sear,2024-06-14 Human evolutionary demography is an emerging field blending natural science with social science This edited volume provides a much needed interdisciplinary introduction to the field and highlights cutting edge research for interested readers and researchers in demography the evolutionary behavioural sciences biology and related disciplines By bridging the boundaries between social and biological sciences the volume stresses the importance of a unified understanding of both in order to grasp past and current demographic patterns Demographic traits and traits related to demographic outcomes including fertility and mortality rates marriage parental care menopause and cooperative behavior are subject to evolutionary processes Bringing an understanding of evolution into demography therefore incorporates valuable insights into this field just as knowledge of demography is key to understanding evolutionary processes By asking questions about old patterns from a new perspective the volume composed of contributions from established and early career academics demonstrates that a combination of social science research and evolutionary theory offers holistic understandings and approaches that benefit both fields Human Evolutionary Demography introduces an emerging field in an accessible style It is suitable for graduate courses in demography as well as upper level undergraduates Its range of research is sure to be of interest to academics working on demographic topics anthropologists sociologists demographers natural scientists working on evolutionary processes and disciplines which cross cut natural and social science such as evolutionary psychology human behavioral ecology cultural evolution and evolutionary medicine As an accessible introduction it should interest readers whether or not they are currently familiar with human evolutionary demography

Sources and Methods of Historical Demography J. Dennis Willigan,Katherine A. Lynch,2013-10-22 Sources and Methods of Historical Demography covers the fundamental sources methods and approaches to explanatory modeling for describing analyzing and understanding demographic features of past societies The book discusses the intellectual ancestry of historical demographic research beginning in the 17th century as well as the logic of basic techniques for reconstructing and analyzing information from fundamental source materials The text also describes the full range of disciplines that have made major contributions to historical demography and examples of empirical research The book concludes by arguing the case for conducting historical

demographic research with a broad interdisciplinary ideal in mind Historians and sociologists will find the book invaluable
