Environment and the poor development

H. Jeffrey Leonard, 1989-01-01 This volume one of the ODC s U S Third World Policy Perspectives series offers useful steps for policymakers concerned with the critical challenges of integrating environment and development concerns Jessica Tuchman Matthews World Resources Institute Six out of every ten of the world s people are being inexorably pushed by agricultural modernization and continuing high population growth rates into ecologically vulnerable environments tropical forests dryland and hilly areas and the fringes of great urban centers Unless development strategies support their capabilities to ensure their own survival the 470 million people living in these vulnerable areas will be forced to meet their short term need to survive at the cost of long term ecological sustainability and the well being of future generations In response to these startling statistics the authors call for new policies and new forms of collaboration among participants at the local national and international levels They offer practical and stimulating recommendations to bring together population planners water engineers health professionals bankers among others to find solutions to both poverty and environmental problems

Land Use, Land Cover and Soil Sciences - Volume IV Willy H. Verheye, 2009-09-19

This Encyclopedia of Land Use Land Cover and Soil Sciences is a component of the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Land is one of our most precious assets It represents space provides food and shelter stores and filters water and it is a base for urban and industrial development road construction leisure and many other social activities Land is however not unlimited in extent and even when it is physically available its use is not necessarily free either because of natural limitations too cold too steep too wet or too dry etc or because of constraints of

access or land tenure This 7 volume set contains several chapters each of size 5000 30000 words with perspectives applications and extensive illustrations It carries state of the art knowledge in the fields of Land Use Land Cover and Soil Sciences and is aimed by virtue of the several applications at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers and NGOs

Area Studies (Regional Sustainable Development Review) Brazil Luis Enrique Sanchez,2009-12-30 Area Studies Brazil Regional Sustainable Development Review is a component of Encyclopedia of Area Studies Regional Sustainable Development Review in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias This volume reviews initiatives and activities towards sustainable development in Brazil such as Perspectives on Sustainable Development in Brazil Demographic Dynamics and Sustainability in Brazil The Impacts of Industrial Development in Brazil Archeological Heritage and Cultural Resources in Brazil Women s Perspectives On Sustainable Development In Brazil Education Public Awareness and Training Processes for Sustainability in Brazil from history to perspectives Implementation of the Convention on Biological Diversity in Brazil Integrating the Environment and Development in the Decision Making Process Territorial Settlement Regional Development and Environmental Problems in the Brazilian Midwest Fragile Ecosystem The Brazilian Pantanal Wetland Although these presentations are with specific referenceto Brazil they provide potentially useful lessons for other regions as well This volume is aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

Climate Variability Impacts on Land Use and Livelihoods in Drylands Mahesh K. Gaur,Victor R. Squires,2017-08-30 This edited volume is devoted to the examination of the implications of the inevitable changes wrought by global change on the welfare and livelihoods of tens of millions of people who live in dryland regions Global change is more than just climate change and the ramifications of changing trade patterns geopolitical and economic aspects the shift to the market economy demographic factors population growth urbanization and re settlement receive attention here Land use change specialists policy makers and natural resource management agencies will find the book very useful Chapters focus on examples that are drawn from a number of sources including previously unpublished studies on the impact of climate change markets and economics on pastoralist and dryland farming households The key focus is to provide readers with insights into the real world implications of change including an analysis of the drivers of change on these vulnerable groups within dryland societies The role of humans as agents of these changes is canvassed A regional analysis of the world s drylands is also performed including those in Australia Argentina India North America China North Africa Central Asia and Southern Africa

Population, Consumption, and the Environment Harold Coward,1995-11-16 This book concentrates on the different ways in which the major world religions view the problems of overpopulation and excess resource consumption and how they approach possible

solutions After examining the natural background and the human context the book moves on to consider both religious and secular approaches It analyzes how a particular religion s scriptures comment on the nature of people the environment people s place in the environment and their roles and responsibilities The historical dimension is derived from reviewing a particular religion s record in teaching about these issues often demonstrating how broader issues are addressed Practical lessons are learned from religious guidelines that deal with current problems and offer solutions The authors consider Aboriginal spirituality Judaism Christianity Islam Hinduism Buddhism and Chinese religions The secular approaches include secular ethics North South relations market forces the status of women and international law
