Development with Identity Robert E. Rhoades, 2006 Throughout Latin America indigenous peoples are demanding that development must address local priorities including ethnic identity Simultaneously sustainability scientists need to conduct place based research on the interaction between environment and society that will have global relevance This book reports on a 6 year interdisciplinary research project on natural resource management in Cotacachi Ecuador where scientists and indigenous groups learnt to seek common ground The book discusses how local people and the environment have engaged each other over time to create contemporary Andean landscapes It also explores human environment interaction in relation to biodiversity soils and water and equitable development This book will be of significant interest to sociologists anthropologists economists and sustainability scientists researching environment and agriculture in rural communities

Latin America, Second Edition Robert B. Kent, 2016-04-25 An authoritative overview of Latin America's human geography and regional complexity It traces Latin America's historical developments while revealing the diversity of its people and places Coverage encompasses cultural history environment and physical geography urban development agriculture and land use social and economic processes and the contemporary patterns of Latin American diaspora Publisher description **Cities Transformed** Mark R. Montgomery, Richard Stren, Barney Cohen, Holly E. Reed, 2013-10-31 Over the next 20 years most low income countries will for the first time become more urban than rural Understanding demographic trends in the cities of the developing world is critical to those countries their societies economies and environments The benefits from urbanization cannot be overlooked but the speed and sheer scale of this transformation presents many challenges In this uniquely thorough and authoritative volume 16 of the world's leading scholars on urban population and development have worked together to produce the most comprehensive and detailed analysis of the changes taking place in cities and their implications and impacts They focus on population dynamics social and economic differentiation fertility and reproductive health mortality and morbidity labor force and urban governance As many national governments decentralize and devolve their functions the nature of urban management and governance is undergoing fundamental transformation with programs in poverty alleviation health education and public services increasingly being deposited in the hands of untested municipal and regional governments Cities Transformed identifies a new class of policy maker emerging to take up the

growing responsibilities Drawing from a wide variety of data sources many of them previously inaccessible this essential text will become the benchmark for all involved in city level research policy planning and investment decisions The National Research Council is a private non profit institution based in Washington DC providing services to the US government the public and the scientific and engineering communities The editors are members of the Council s Panel on Urban Population Dynamics
