Pornocopia Porn Sex Technology And Desire:

Pornocopia Laurence O'Toole, 1998 O Toole argues that new technologies such as camcorders and the Internet are allowing pornography to emerge from the shadows as an acceptable form of popular entertainment This critical analysis includes the views of women who make and use porn **Remote Control** Catharine Lumby, Elspeth Probyn, 2004-01-12 This book examines the ethical challenges posed by new media formats technologies and audiences It considers how these emerging genres and technologies work how they are reshaping the public sphere and how the connections between product and viewer and producer and media consumer are being changed by new shows and formats It includes lively chapters from a range of prominent media commentators and practitioners on a diverse range of issues including reality TV on line media the cash for comment scandal and emerging philosophical approaches to new media ethics With so much interest in contemporary media forms and so many heated debates about media ethics this book will be a must for journalists media practitioners watchers and students Criminology Eamon Carrabine, Pam Cox, Isabel Crowhurst, Anna Di Ronco, Pete Fussey, Anna Sergi, Nigel South, Darren Thiel, Jackie Turton, 2020-03-24 Comprehensive critical and accessible Criminology A Sociological Introduction offers an authoritative overview of the study of criminology from early theoretical perspectives to pressing contemporary issues such as the globalisation of crime crimes against the environment terrorism and cybercrime Authored by an internationally renowned and experienced group of authors in the Department of Sociology at the University of Essex this is a truly international criminology text that delves into areas that other texts may only reference It includes substantive chapters on the following topics Histories of crime Theoretical approaches to crime and the issue of social change Victims and victimisation Crime emotion and social psychology Drugs alcohol health and crime Criminal justice and the sociology of punishment Green criminology Crime and the media Terrorism state crime and human rights The new edition fuses global perspectives in criminology from the contexts of post Brexit Britain and America in the age of Trump and from the Global South It contains new chapters on cybercrime crimes of the powerful organised crime life course approaches to understanding delinquency and desistance and futures of crime control and criminology Each chapter includes a series of critical thinking questions suggestions for further study and a list of useful websites and resources The book also contains a glossary of the criminological terms and concepts used in the book It is the perfect text for students looking for a broad critical and international introduction to criminology and it is essential reading for those looking to expand their criminological imagination David Foster Wallace's Toxic Sexuality Edward Jackson, 2020-06-11 David Foster Wallace s Toxic Sexuality Hideousness Neoliberalism Spermatiks is the first full length study of perhaps the most controversial aspect of Wallace s work male sexuality Departing from biographical accounts of Wallace s troubled relationship to sex the book offers new and engaging close readings of this vexed topic in both his fiction and non fiction Wallace consistently returns to images of sexual toxicity across his career to argue that when it comes to sex men are immutably hideous He makes this

argument by drawing on a variety of neoliberal logics and spermatic metaphors which in their appeal to apparently neutral economic processes and natural bodily facts forestall the possibility that men can change The book therefore provides a revisionist account of Wallace's attitudes towards capitalism as well as a critical dissection of his approach to masculinity and sexuality In doing so David Foster Wallace's *Toxic Sexuality* shows how Wallace can be considered a neoliberal writer whose commitment to furthering male sexual toxicity is a disturbing but undeniable part of his literary project **Carnal**

Resonance Susanna Paasonen, 2011-09-30 An exploration of the modalities affective intensities and disturbing qualities of online pornography Digital production tools and online networks have dramatically increased the general visibility accessibility and diversity of pornography Porn can be accessed for free anonymously and in a seemingly endless range of niches styles and formats In *Carnal Resonance* Susanna Paasonen moves beyond the usual debates over the legal political and moral aspects of pornography to address online porn in a media historical framework investigating its modalities its affect and its visceral and disturbing qualities Countering theorizations of pornography as emotionless affectless detached and cold Paasonen addresses experiences of porn largely through the notion of affect as gut reactions intensities of experience bodily sensations resonances and ambiguous feelings She links these investigations to considerations of methodology ways of theorizing and analyzing online porn and affect questions of materiality bodies technologies and inscriptions and the evolution of online pornography Paasonen discusses the development of online porn focusing on the figure of the porn consumer and considers user generated content and amateur porn She maps out the modality of online porn as hyperbolic excessive stylized and repetitive arguing that literal readings of the genre misunderstand its dynamics and appeal And she analyzes viral videos and extreme and shock pornography arguing for the centrality of disgust and shame in the affective dynamics of porn Paasonen's analysis makes clear the crucial role of media technologies digital production tools and networked communications in particular in the forms that porn takes the resonances it stirs and the experiences it makes possible Netporn Katrien Jacobs, 2007-08-20

Netporn Katrien Jacobs, 2007-08-20 *Netporn* delves into the aesthetics and politics of sexuality in the era of do it yourself DIY Internet pornography Katrien Jacobs drawing on digital media theory and interviews with Web porn producers and consumers offers an unprecedented critical analysis of Web culture as digital artistry and of the corresponding heightened government surveillance and censorship of the Internet *Netporn* features Web users who question the goals of global commercial porn industries whether they are engaged in Usenet fringes video blogging peer to peer distribution porn art collectives or decadent amateurism Emphasizing gender and cultural differences Jacobs shows how the creative uses of netporn images and services are important ways of exploring or redefining the network body and indispensable ingredients of a maturing network society Algorithms of Oppression Safiya Umoja Noble, 2018-02-20 Acknowledgments Introduction the power of algorithms A society searching Searching for Black girls Searching for people and communities Searching for protections from search engines The future of knowledge in the public The future of

information culture Conclusion algorithms of oppression Epilogue Notes Bibliography Index About the author **Stigma and the Shaping of the Pornography Industry** Georgina Voss, 2015-05-15 The idea of pornography is often employed to invoke titillation anger and disgust *Stigma and the Shaping of the Pornography Industry* explores the effects that this stigmatized identity has on the pornography industry itself From the video era to the emergence of the internet to trade shows white collar workers technological innovation and industry wide characteristics this book looks beyond content production to explore how stigma has shaped the structures practices norms and boundaries of the wider sector By drawing on concepts such as dirty work core stigmatized industries and outlaw innovation this book offers rich insights into the ways in which stigma is socially constructed and managed and the deep structural effects that it has on the industry *From Betamax to Blockbuster* Joshua M. Greenberg, 2010-09-24 How the VCR was transformed from a machine that records television into a medium for movies The first video cassette recorders were promoted in the 1970s as an extension of broadcast television technology a time shifting device a way to tape TV shows Early advertising for Sony's Betamax told potential purchasers You don't have to miss Kojak because you're watching Columbo But within a few years the VCR had been transformed from a machine that recorded television into an extension of the movie theater into the home This was less a physical transformation than a change in perception but one that relied on the very tangible construction of a network of social institutions to support this new marketplace for movies In *From Betamax to Blockbuster* Joshua Greenberg explains how the combination of neighborhood video stores and the VCR created a world in which movies became tangible consumer goods Greenberg charts a trajectory from early videophile communities to the rise of the video store complete with theater marquee lights movie posters popcorn and clerks who offered expert advice on which movies to rent The result was more than a new industry by placing movies on cassette in the hands and control of consumers video rental and sale led to a renegotiation of the boundary between medium and message and ultimately a new relationship between audiences and movies Eventually Blockbuster's top down franchise store model crowded local video stores out of the market but the recent rise of Netflix iTunes and other technologies have reopened old questions about what a movie is and how and where it ought to be watched By focusing on the spaces in between manufacturers and consumers Greenberg's account offers a fresh perspective on consumer technology illustrating how the initial transformation of movies from experience into commodity began not from the top down or the bottom up but from the middle of the burgeoning industry out *International Handbook of Internet Research* Jeremy Hunsinger, Lisbeth Klasturp, Matthew Allen, 2010-06-17 Internet research spans many disciplines From the computer or information sciences through engineering and to social sciences humanities and the arts almost all of our disciplines have made contributions to internet research whether in the effort to understand the effect of the internet on their area of study or to investigate the social and political changes related to the internet or to design and develop software and hardware for the network The possibility and extent of contributions of internet research vary across

disciplines as do the purposes methods and outcomes Even the epistemological underpinnings differ widely The internet then does not have a discipline of study for itself It is a eld for research Baym 2005 an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other There are of course some inhibitions that limit explorations in this eld research ethics disciplinary conventions local and national norms customs laws borders and so on Yet these limits on the int net as a eld for research have not prevented the rapid expansion and exploration of the internet After nearly two decades of research and scholarship the limits are a positive contribution providing bases for discussion and interrogation of the contexts of our research making internet research better for all These limits challenges that constrain the theoretically limitless space for internet research create boundaries that give de nition to the eld and provide us with a particular topography that enables research and investigation
