Study Week on a Modern Approach to the Protection of the Environment G. B. Marini-Bettòlo, 2017-01-31 These Proceedings consider all aspects of the environmental problems facing the world today scientific social economic philosophical and historical Many of the discussions which followed paper presentations are included in the text Along with scientific discussions of solutions to particular problems the book argues for a new approach to thought and action in the use of natural resources If a constructive global strategy towards the protection of the environment is to be socially compatible and economically sound then it must be developed through an interdisciplinary approach which will avoid the impractical solutions which might be suggested by theoretical or unilateral considerations Ecological economic social and cultural research must be accompanied by the development of a new mentality of respect for the environment which will inculcate a reasonable and moderate use of natural resources

Population Policies for a New Economic Era Lester Russell Brown, 1983 After a generation of unprecedented economic growth the world economy appears to be losing momentum Double digit inflation high interest rates and soaring deficits are often cited as causes of the global economic slowdown but these are more symptom than cause More fundamental is the depletion of the global resource base that allowed the economy to triple during the century s

quarter This depletion of renewable and nonrenewable resources is undermining the long term potential for rapid sustained economic growth Oil played a central role in the century s third quarter economic boom In addition to making overall growth easy cheap oil revolutionized agriculture by spawning spectacular gains in food output However growth in oil production and other basic economic activities has declined because of rising oil prices deteriorating biological systems or both As the world population moves toward 5 billion humanity is moving into uncharted territory The relationship between population size and the sustainable yield of the earth s biological resource systems is uncertain With the progressive depletion of readily accessible oil and gas reserves and the widespread deterioration of the economy s biological support systems economic growth has slowed markedly These economic trends call for dramatic shifts in population policy to avoid declines in consumption levels JN Resources in Education ,1982 Materials and Society ,1985 *Mining Urban Wastes* Cynthia Pollock Shea,1987 Land Tenure, Agricultural Economics and Rural Development University of Wisconsin--Madison.
