*She is an accomplished corporate professional living life on her own terms. She is gutsy, clear headed and fiercely independent yet vulnerable. She still wears a girl's heart with a mask of a woman trying to take head-on with the world, because the secrets of the past still haunt her down. Her life was a lake with still water until he entered and created a whirlpool. Will she be able to wade through these ripples in her pursuit for true love? Who would help her to fight her demons? Will she find the warmth in the relationship she has long desired for?*

Padmini Vedula Ganti is a new voice in the world of adult fiction, making her debut with the book 'In pursuit of true love'. She is an edtech professional and a writing enthusiast who has several articles and two white papers to her credit. She is a voracious reader and loves to travel. As a first-time author, Padmini is eager to connect with readers who share her passion for subtle storytelling.

## **Pursuit Of Love The Meaning In Life:**

Meaning in Life, Volume 2 Irving Singer, 2009-12-30 An acclaimed philosopher offers a systematic mapping of the various facets of love In his widely acclaimed trilogy *The Nature of Love* Irving Singer traced the development of the concept of love in history and literature from the Greeks to the twentieth century In this second volume of his *Meaning in Life* trilogy Singer returns to the subject of his earlier work exploring a different approach Without denying his previous emphasis on the role of imagination and creativity in this book Singer investigates the ability of them both to make one's life meaningful A systematic mapping of the various facets of love including sexual love love in society and religious love *The Pursuit of Love* is an extended essay that offers Singer's own philosophical and psychological theory of love Rich in insight into literature the history of ideas and the complexities of our being *The Pursuit of Love* is a thought provoking inquiry into fundamental aspects of all human relationships

*Meaning in Life* Sarvananda, 2012-02-29 Sarvananda draws a parallel between the Buddha's quest and our own search for meaning in the modern world He eloquently covers many of the ways in which we seek meaning citing writers and thinkers such as Akira Kurosawa Wordsworth and Woody Allen He moves from individual understanding to the principles of Buddhist teaching and demonstrates in a calm friendly way how to apply the teachings practically before finally taking the reader to a deeper reality

*Meaning in Life, Volume 3* Irving Singer, 2009-12-30 An acclaimed philosopher suggests that the art of living well employs the same principles as those that exist in all artistic creativity This final book in Irving Singer's *Meaning in Life* trilogy studies the interaction between nature and the values that define human spirituality It examines the ways in which we overcome the suffering in life by resolving our sense of being divided between them Singer suggests that the accord between nature and spirit arises from an art of life that affords meaning happiness and love by employing the same principles as those that exist in all artistic achievements It is through the meaningfulness created by imagination and idealization Singer says that we make life worth living This human art form Singer writes enables us to unite our selfish interests with our compassionate and loving inclinations We thereby effect a vital harmonization within which the naturalistic values of ethics aesthetics and religion can find their legitimate place The good life as envisioned by Singer includes the love of persons things and ideals so intricately intermeshed that the meaning in one contributes to the meaningfulness of the other two The result is a kind of happiness that we all desire

**The Brain and the Meaning of Life** Paul Thagard, 2010-01-25 How brain science answers the most intriguing questions about the meaning of life Why is life worth living What makes actions right or wrong What is reality and how do we know it *The Brain and the Meaning of Life* draws on research in philosophy psychology and neuroscience to answer some of the most pressing questions about life's nature and value Paul Thagard argues that evidence requires the abandonment of many traditional ideas about the soul free will and immortality and shows how brain science matters for fundamental issues about reality morality and the meaning of life The ongoing Brain Revolution reveals how love work and play provide good reasons for

living

Defending the superiority of evidence based reasoning over religious faith and philosophical thought experiments

Thagard argues that minds are brains and that reality is what science can discover Brains come to know reality through a combination of perception and reasoning Just as important our brains evaluate aspects of reality through emotions that can produce both good and bad decisions Our cognitive and emotional abilities allow us to understand reality decide effectively act morally and pursue the vital needs of love work and play Wisdom consists of knowing what matters why it matters and how to achieve it

The Brain and the Meaning of Life shows how brain science helps to answer questions about the nature of mind and reality while alleviating anxiety about the difficulty of life in a vast universe The book integrates decades of multidisciplinary research but its clear explanations and humor make it accessible to the general reader

**Meaning in Life, Volume 1** Irving Singer, 2009-12-30 An acclaimed philosopher views the search for meaning in life as the search for a mode of creativity that will make our lives meaningful What is meaning in life Does anything really matter How can a life achieve lasting significance How can we explain the human propensity to struggle for ideals How is meaning related to contentment happiness joy Is meaning something we discover or do we create it What is the nature of value and what are its sources in human experience Can there be a meaning in life without religious faith What is the meaning of death Is life worth living What would enable us to have a love of life

Meaning in life writes philosopher Irving Singer and the meaning in our own lives results from creative efforts on our part It is not a prior reality awaiting our discovery Though we talk about a search for meaning what we are seeking is primarily a mode of creativity that will make our lives meaningful

In The Creation of Value the first volume of his Meaning in Life trilogy Singer studies the nature of imagination idealization and love in the context of humanity's attempt to define itself through the pursuit of meanings and values that it creates Singer confronts life's most troubling problems the meaning of death the presence of anxiety in daily existence the conditions needed for us to have a life worth living and the possibility of a love of life in others as well as in ourselves

**Natural Philosophy** Paul Thagard, 2019-01-31 Paul Thagard uses new accounts of brain mechanisms and social interactions to forge theories of mind knowledge reality morality justice meaning and the arts Natural Philosophy brings new methods for analyzing concepts understanding values and achieving coherence It shows how to unify the humanities with the cognitive and social sciences How can people know what is real and strive to make the world better Philosophy is the attempt to answer general questions about the nature of knowledge reality and values Natural Philosophy pursues these questions by drawing heavily on the sciences and finds no room for supernatural entities such as souls gods and possible worlds It provides original accounts of the traditional branches of philosophy including epistemology metaphysics ethics and aesthetics Rather than reducing the humanities to the sciences this book displays fertile interconnections that show that philosophical questions and artistic practices can be much better understood by considering how human brains operate and interact in social contexts The sciences and the humanities are interdependent because both the natural and social sciences cannot avoid questions about methods and values that are primarily the province of philosophy This book belongs to a trio that includes Brain Mind From Neurons to Consciousness and Creativity and Mind Society From Brains to Social Sciences and Professions They can be read

independently but together they make up a Treatise on Mind and Society that provides a unified and comprehensive treatment of the cognitive sciences social sciences professions and humanities

Meaning in Life Thaddeus Metz, 2013-11-07 What makes a person s life meaningful Thaddeus Metz offers a new answer to an ancient question which has recently returned to the philosophical agenda He proceeds by examining what if anything all the conditions that make a life meaningful have in common The outcome of this process is a philosophical theory of meaning in life He starts by evaluating existing theories in terms of the classic triad of the good the true and the beautiful He considers whether meaning in life might be about such principles as fulfilling God s purpose obtaining reward in an afterlife for having been virtuous being attracted to what merits attraction leaving the world a better place connecting to organic unity or transcending oneself by connecting to what is extensive He argues that no extant principle satisfactorily accounts for the three fold significance of morality enquiry and creativity and that the most promising theory is a fresh one according to which meaning in life is a matter of intelligence contoured toward fundamental conditions of human existence

**For the Love of Beauty** Arthur Pontynen, 2017-07-05 For most of the last century the methodology of art history has followed a positivist approach emphasizing form and style fact and history as the means of studying works of art By contrast the philosophical pursuit of truth once central to the fine arts and humanities has largely been abandoned In For The Love of Beauty Arthur Pontynen offers a searching and ambitious critique of modern aesthetic practice that aims to restore the pursuit of the knowledge of reality Being to its rightful place Pontynen begins by addressing the question of why the pursuit of truth be it called Dao Dharma God Logos Ideal etc is no longer acceptable in academic circles even though it has been

intrinsic to the purpose of art at most times and in most cultures Lacking the pursuit of truth of some degree of knowledge of what is true and good the humanities necessarily lack intellectual and cultural grounding and purpose Fields of study such as philosophy music art and history are therefore trivialized and brutalized Pontynen s focus on the study of the visual arts details the how the denial of purpose and quality in modernist and postmodernist aesthetics has denied art any possibility of transcending entertainment therapy or propaganda In place of the established narratives Pontynen offers a counter narrative based on a cross cultural pursuit of the good the true and the beautiful He recognizes that substantively different cultural traditions exist and that the truth claims of each may be valid in whole or in part He shows how the history of art parallels the intellectual history of Western culture and how these parallels affect both aesthetics and ethics Pontynen engages with those elements of modernist and postmodernist thought that might be true His purpose is not simply to deny their validity but to engage a viewpoint that does not privilege the notion of a purposeless cosmos For the Love of Beauty will be of interest
