National Interests in International Society Martha Finnemore, 1996 How do states know what they want Asking how interests are defined and how changes in them are accommodated Martha Finnemore shows the fruitfulness of a constructivist approach to international politics She draws on insights from sociological institutionalism to develop a systemic approach to state interests and state behavior by investigating an international structure not of power but of meaning and social value An understanding of what states want she argues requires insight into the international social structure of which they are a part States are embedded in dense networks of transnational and international social relations that shape their perceptions and their preferences in consistent ways Finnemore focuses on international organizations as one important component of social structure and investigates the ways in which they redefine state preferences She details three examples in different issue areas In state structure she discusses UNESCO and the changing international organization of science In security she analyzes the role of the Red Cross and the acceptance of the Geneva Convention rules of war Finally she focuses on the World Bank and explores the changing definitions of development in the Third World Each case shows how international organizations socialize states to accept new political goals and new social values in ways that have lasting impact on the conduct of war the workings of the international political economy and the structure of states themselves

National Identity and Great-Power Status in Russia and Japan Tadashi Anno,2018-09-03 Having suffered military defeat at the hands of advanced Western powers in the 1850s Russia and Japan embarked upon a program of catch up and modernization in the late 19th Century

While the two states sought in the main to replicate the successes of the advanced great powers of the West the discourse on national identity among Russian and Japanese elite in this period evinced a considerable degree of ambivalence about

Western dominance With the onset of the crisis of power and legitimacy in the international order ushered in by the First World War this ambivalence shifted towards more open revolt against Western dominance The rise of communism in Russia and militarism in Japan were significantly shaped by their search for national distinctiveness and international status This book is a comparative historical study of how the two non Western great powers emerged as challengers to the prevailing international order in the interwar period each seeking to establish an alternative order Specifically Anno examines the parallels and contrasts in the ways in which the Russian and Japanese elites sought to define the two countries national identities and how those definitions influenced the two countries attitudes toward the prevailing order At the intersection of international relations theory comparative politics and of historical sociology this book offers an integrated perspective on the rise of challengers to the liberal international order in the early twentieth century **Parameters**, 1994 *Strategic Intelligence* Bloomsbury Publishing, 2006-12-30 While several fine texts on intelligence have been published over the past decade there is no complementary set of volumes that addresses the subject in a comprehensive manner for the general reader This major set explains how the sixteen major U S intelligence agencies operate how they collect information from around the world the problems they face in providing further insight into this raw information through the techniques of analysis and the difficulties that accompany the dissemination of intelligence to policymakers in a timely manner Further in a democracy it is important to have accountability over secret agencies and to consider some ethical benchmarks in carrying out clandestine operations In addition to intelligence collection and analysis and the subject of intelligence accountability this set addresses the challenges of counterintelligence and counterterrorism as well covert action Further it provides comparisons regarding the various approaches to intelligence adopted by other nations around the world Its five volumes underscore the history the politics and the policies needed for a solid comprehension of how the U S intelligence community functions in the modern age of globalization characterized by a rapid flow of information across national boundaries **The Political Philosophy of Cosmopolitanism** Gillian Brock, Harry Brighouse, 2005-07-21 In a period of rapid internationalization of trade and increased labor mobility is it relevant for nations to think about their moral obligations to others Do national boundaries have fundamental moral significance or do we have moral obligations to foreigners that are equal to our obligations to our compatriots The latter position is known as cosmopolitanism and this volume brings together a number of distinguished political philosophers and theorists to explore cosmopolitanism what it consists in and the positive case which can be made for it Their essays provide a comprehensive overview of both the current state of the debate and the alternative visions of cosmopolitanism with which we can move forward and they will interest a wide range of readers in philosophy political theory and law *The National Interest in International Relations Theory* S. Burchill, 2005-05-11 This is the first systematic and critical analysis of the concept of national interest from the perspective of contemporary theories of International Relations including realist Marxist anarchist liberal English School and constructivist perspectives Scott

Burchill explains that although commonly used in diplomacy the national interest is a highly problematic concept and a poor guide to understanding the motivations of foreign policy

Defence Diplomacy and National Security Strategy Ian Liebenberg, Dirk Kruijt, Shrikant Paranjpe, 2020-04-20 The post cold war era presented security challenges that at one level are a continuation of the cold war era at another level these phenomena manifested in new forms Whether the issues of economics and trade transfer of technologies challenges of intervention or humanitarian crisis the countries of the South previously pejoratively labelled Third World or developing countries have continued to address these challenges within the framework of their capabilities and concerns The volume explores defence diplomacies national security challenges and strategies dynamics of diplomatic manoeuvres and strategic resource management of Latin American southern African and Asian countries

The US Military Profession Into the Twenty-first Century Sam Charles Sarkesian, Robert E. Connor, 1999 Addresses US military professionalism and the revisions modifications and changes necessary to respond to the changed domestic and strategic environments of the new world order

United States National Interests in a Changing World Donald E. Nuechterlein, 2021-09-15 Although the term national interest has long been used in reference to the foreign policy goals of nations there has been no generally agreed upon definition of the concept as a result Donald E Nuechterlein contends there has been a tendency for foreign policy to be determined by institutional prejudice and past policy rather than by a systematic assessment of national interests By what criterion does a President decide that a given interest is or is not vital that is whether he must contemplate defending it by force if other measures fail In this study Nuechterlein offers a new conceptual framework for the analysis of foreign policy decisions resting on more precise definitions and distinguishing among the degrees of interest that the United States perceives in the range of foreign policy issues it faces He also deals with the constitutional problem of checks and balances between the Presidency and Congress in setting the goals of foreign policy and the influence of private interest groups and the media on the definition of national interest Underlining the need for constant reassessment of priorities in a rapidly changing international environment Nuechterlein illustrates his analysis by drawing on the American experience in foreign affairs since World War II A case study of the American involvement in Southeast Asia describes how six presidents beginning with Franklin Roosevelt viewed United States interests there and the conclusions each drew in terms of policy tools to defend those interests in Vietnam Finally he assesses what the future vital interests of the United States are likely to be in light of the shifting balance of world power and the growing importance of international economics
