Pursuit Of Greatness 1900 1970

Konstantina Maragkou

Pursuit Of Greatness 1900 1970:

Modern British Statesmen, 1867-1945 Richard N. Kelly, John Cantrell, 1997 Offers compact biographies of 12 British statesmen of the period including Churchill Asquith Lloyd George and Disraeli especially for high school seniors and beginning undergraduates Biographies follow a similar format with material organized in sections on early life entry into public life career highlights and each personalities influence on later events and politicians plus bandw photos An introduction looks at the growth of state intervention and social democratic political culture during the period Includes lists of office holders and party leaders statistics on taxes and elections and 40 biographical summaries Distributed by St Martin s Annotation copyrighted by Book News Inc Portland OR 1971 Srinath Raghavan, 2013-11-12 The war of 1971 that created Bangladesh was the most significant geopolitical event in the Indian subcontinent since partition in 1947 It tilted the balance of power between India and Pakistan steeply in favor of India Srinath Raghavan contends that the crisis and its cast of characters can be understood only in a wider international context **Britain, Greece and The Colonels, 1967-74**

Konstantina Maragkou, 2020-01-01 The long history of Anglo Greek relations has deservedly attracted much attention One of its most controversial yet least explored phases was that spanning the Greek Colonels seven year military junta from 1967 74 Drawing on a corpus of diverse original and largely primary material Maragkou provides the first comprehensive analysis of British policy towards Greece during this tumultuous era Not only does she contribute to the historiography of Anglo Greek relations but her book also serves as a case study of British foreign policy within the Cold War And by demonstrating that national history can be best understood by analyzing the relationship between a nation state and factors beyond its control the conclusions drawn can be applied beyond the strictly regional or the exclusively bi lateral as they also fit into a transnational paradigm It was in the 1960s when what we now term globalization was in full swing Henceforward no nation and no foreign office was an island it was part of a whole in which both state and non state actors internationally played their part in the evolution of thinking on foreign affairs Here is the key to understanding the tortuous history of Britain and the Greek Colonels one that has many echoes in our own time **Crises of Empire** Martin Thomas, Bob Moore, Larry Butler, 2015-04-23 Crises of Empire offers a comprehensive and uniquely comparative analysis of the history of decolonization in the British French and Dutch empires By comparing the processes of decolonization across three of the major modern empires from the aftermath of the First World War to the late 20th century the authors are able to analyse decolonization as a long term process They explore significant changes to the international system shifting popular attitudes to colonialism and the economics of empire This new edition incorporates the latest developments in the historiography as well as Increased coverage of the Belgian and Portuguese empires New introductions to each of the three main parts offering some background and context to British French and Dutch decolonization More coverage of cultural aspects of decolonization exploring empire from below This new edition of Crises of Empire is essential reading for all students of

imperial history and decolonization In particular it will be welcomed by those who are interested in taking a comparative approach putting the history of decolonization into a pan European framework *The Warm South* Robert

Holland,2018-10-02 An evocative exploration of the impact of the Mediterranean on British culture ranging from the mid eighteenth century to today Ever since the age of the Grand Tour in the eighteenth century the Mediterranean has had a significant pull for Britons including many painters and poets who sought from it the inspiration beauty and fulfillment that evaded them at home Referred to as Magick Land by one traveler dreams about the Mediterranean and responses to it went on to shape the culture of a nation Written by one of the world s leading historians of the Mediterranean this book charts how a new sensibility arose from British engagement with the Mediterranean ancient and modern Ranging from Byron s poetry to Damien Hirst s installations Robert Holland shows that while idealized visions and aspirations often met with disillusionment and frustration the Mediterranean also offered a notably insular society the chance to enrich itself through an imagined world of color carnival and sensual self discovery *Great Britain, Germany and the Soviet Union* Stephanie Salzmänn,2003

The treaty of Rapallo concluded in 1922 between Germany and the Soviet Union the two vanquished powers of the Great War ranks high among the diplomatic coups de surprise of the twentieth century Its real importance however lies in the repercussions of the alliance on the subsequent policies of the two victorious powers Britain and France This study examines the impact of Rapallo on British foreign policy between 1922 and 1934 when the German Soviet relationship had virtually ended The ghost of Rapallo is the central theme of this story as ever since the treaty s conclusion Rapallo has been a byword for Soviet German secret and potentially dangerous collaboration This book describes how the British viewed the Rapallo co operation how they dealt with this special relationship and how the lingering memory of Rapallo affected British policy for decades to come While examining a particular aspect of international relations it throws additional light on broader topics of European relations in the 1920s and early 1930s Dr Stephanie Salzmänn completed her PhD at Trinity Hall Cambridge

The Pursuit of Greatness 1900-1970 ,1992 *The Eden-Eisenhower Correspondence, 1955-1957* Peter G.

Boyle,2006-03-13 The personal correspondence between President Dwight D Eisenhower and Prime Minister Anthony Eden during the time they were simultaneously in office tells the dramatic story of a relationship that began with great promise but ended in division and estrangement Many of the letters have only recently been declassified making it possible for the first time to publish this unique historic collection in its entirety Peter G Boyle s introduction annotations and conclusion provide context for the letters details about the personalities and careers of Eden and Eisenhower and major issues that influenced the Anglo American relationship up to 1955 such as relations with the Soviet Union nuclear concerns colonialism the Middle and Far East economic issues and intelligence matters The letters themselves offer an intimate look into the special connection between Britain and the United States through the often eloquent words of their leaders They offer particular insight into the Suez Crisis of 1956 when Eden s and Eisenhower s views greatly diverged over the use of force to resolve the

situation Their personal relationship cooled from that point on and ended with Eden's resignation in January 1957

Geopolitics and Identity in British Foreign Policy Discourse Nick Whittaker, 2023-07-27 This is the first book to examine Britain's geopolitical identity and how it is expressed in foreign policy discourse It demonstrates how British imperial thought related to its island status has remained important for British Members of Parliament in their debates of contemporary issues It presents an exciting and provocative new reading of modern British foreign policy that decentres traditional notions of rationalism and pragmatism by foregrounding the much neglected aspects of identity and geopolitical space As British foreign policy makers wrestle with how to define Britishness outside of the EU this analysis provides a fresh perspective It presents a much needed historical contextualisation of long standing concepts such as insularity from Europe and a universal aspect on world affairs This book will be highly relevant for students researchers and professionals that are seeking to understand British foreign policy It will be of interest to those researching and working within geopolitics identity sociology foreign policy analysis and international relations

Blue-Water Empire Robert Holland, 2012-01-26 Blue Water

Empire is Robert Holland's magnificent narrative of Britain's military and cultural ties with the Mediterranean Sea in the style of the epic naval histories of N A M Rodger. Britain has been a major presence in the Mediterranean from the Battle of the Nile to the end of empire as both a military and a colonising force on the islands and coastlines of the sea. Robert Holland traces the fascinating story of that presence from its legacies in culture, language and law to the Mediterranean's own influence on Britain. Evoking the conflicts and contrasts between British and local societies caught up in dramatic events as well as their mutual resilience under pressure, *Blue Water Empire* charts with vigour, flair and clarity the British experience in the Mediterranean in the age of empire. Reviews: An important corrective to current historical amnesia; the definitive account of Anglo-Mediterranean history for years to come. Amanda Foreman, *New Statesman*. A rich and readable account of the British in the Middle Sea. As Holland's learned, lucid and enjoyable work makes clear, many British politicians saw the Mediterranean as the pre-eminent global strategic arena representing the key to victory in Europe and Asia. Dominic Sandbrook, *Sunday Times*. This is an important subject and it has never before been drawn together into a single coherent narrative. *Blue Water Empire* puts the land, not the sea, at the heart of the story. Literary Review. Robert Holland's masterly history of the Mediterranean is a pleasure to read. *Blue Water Empire* shows how Britain's mastery of the Middle Sea shaped the modern world whilst reminding us how profoundly the Mediterranean has influenced the British. Simon Ball, author of *The Bitter Sea: The Struggle for Mastery in the Mediterranean 1935-1949*. Lively and absorbing. Philip Mansel, *Spectator*. About the author: Robert Holland is one of the world's leading historians of the Mediterranean and the author of *Britain and the Revolt in Cyprus 1954-59* and with Diana Markides *The British and the Hellenes: Struggles for Mastery in the Eastern Mediterranean 1850-1960*. He holds professorial positions at the Centre for Hellenic Studies in King's College London and the Institute of Commonwealth Studies in the same University. **British Government Policy and Decolonisation, 1945-63** Frank Heinlein, 2013-12-16. This book is an in-depth study of the importance of the Empire/Commonwealth in the two decades after WWII for Britain's self-image as a great power. By studying a wide range of debates on general and specific imperial problems, the book highlights the official mind of decolonization and of late imperialism. **British Decolonisation, 1918-1984** Richard Davis, 2013-10-03. Few subjects have aroused more controversy in recent years than that of empire and that of the British Empire in particular. Few other subjects are of greater importance to today's world. How the British Empire was created and maintained and the impact it had on both the colonised and the colonisers have been the source of long-running and heated debates amongst historians, politicians and in the media. For several decades it has been analysed from numerous different perspectives providing a wide range of differing interpretations. Over recent years, new studies have extended the scope of imperial history into previously ignored fields that have significantly added to our understanding. Imperial history can therefore no longer be regarded as the exclusive realm of the political historian or the preserve of an essentially British approach. The British Empire was complex. Each of the far-flung components that made it up had its own particularities. At

various times and in various places it took on different forms and had different meanings. It affected people across the globe in a multitude of ways. This inevitably produces a multi-faceted picture. The large number of actors in Britain and in the colonised world who played a part in its history adds to this impression. As a consequence it is difficult to come up with one all-encompassing history of the British Empire. All these aspects of the British Empire are apparent in the story of how it ended. What precisely decolonisation was, how it came about and what it meant for the British and for those who gained their independence varied considerably from one part of the Empire to another and from one period to another. How these changes came about, how independence was won across the colonial world and how it was resisted are dealt with here across a selection of different case studies. Understanding how the British Empire collapsed tells us a great deal about what this Empire was and about its legacy in today's world.

The British Aircraft Industry and American-led Globalisation

Takeshi Sakade, 2021-12-09. Sakade challenges the narrative that the focus of British manufacturing went from Empire to Europe and argues rather that following the Second World War the key relationship was in fact trans-Atlantic. There is a commonly accepted belief that during the twentieth century British manufacturing declined irreparably, that Britain lost its industrial hegemony. But this is too simplistic. In fact, in the decades after 1945 Britain staked out a new role for itself as a key participant in a US-led process of globalisation. Far from becoming merely a European player, the UK actually managed to preserve a key share in a global market and the British defence industry was to a large extent successfully rehabilitated. Sakade returns to the original scholarly parameters of the decline controversy and especially questions around post-war decline in the fields of high technology and the national defence industrial base. Using the case of the strategically critical military and civil aircraft industry, he argues that British industry remained relatively robust. A valuable read for historians of British aviation and more widely of 20th-century British industry.

British Government Policy and Decolonisation, 1945-1963 Frank Heinlein, 2002. This is a study of the views held by British policy makers on the Empire Commonwealth from 1945 to 1963.

Australia's War Crimes Trials 1945-51 Georgina Fitzpatrick, Timothy L.H. McCormack, Narrelle Morris, 2016-08-29. This unique volume provides a detailed analysis of Australia's 300 war crimes trials of principally Japanese accused conducted in the immediate aftermath of the Second World War. Part I contains contextual essays explaining why Australia established military courts to conduct these trials and thematic essays considering various legal issues in and historical perspectives on the trials. Part II offers a comprehensive collection of eight location essays, one each for the physical locations where the trials were held. In Part III, post-trial issues are reviewed, such as the operation of compounds for war criminals, the repatriation of convicted Japanese war criminals to serve the remainder of their sentences, and reflections of some of those convicted on their experience of the trials. In the final essay, a contemporary reflection on the fairness of the trials is provided, not on the basis of a twenty-first-century critique of contemporary minimum standards of fair trial expected in the prosecution of war crimes, but by reviewing approaches taken in the trials themselves as well as from

reactions to the trials by those associated with them The essays are supported by a large collection of unique historical photographs maps and statistical materials There has been no systematic and comprehensive analysis of these trials so far which has meant that they are virtually precluded from consideration as judicial precedent This volume fills that gap and offers scholars and practitioners an important and groundbreaking resource *A Very British Experience* Andrew Stewart,2020-01-29 In terms of the Second World War and Britain s wartime strategy three elements deserve close scrutiny the paramount importance of defending the British mainland and its population the challenges of building and maintaining coalitions and alliances and the central role the African continent assumed in all British strategic planning A concluding essay reflects upon the degree to which in the face of an often uncertain and unconvincing approach these critical themes underpinned the British experience of the conflict Topics addressed include 1940 and the Defence of Britain relations with the United States the British Empire Air Training Plan General Boy Browning and Operation Market Garden the recall of General Alan Cunningham from Libya in 1941 plans for defending the Royal Family Exercise Genesis which turned west London into a battleground for a day in May 1942 and the role of the Eastern Fleet off Africa Andrew Stewart provides a compelling chapter on the loss of the Tobruk garrison in June 1942 one of the worst military disasters suffered by the British Empire during the Second World War The essay on Tobruk demonstrates how all three defining elements of wartime experience converged the loss of public confidence about how the war was being conducted its impact on the relationship with the Union of South Africa a key partner in the Dominion wartime coalition and the absolute necessity that existed for deep strategic planning on the African continent subsequently to be realised at the final battle at El Alamein *British Grand Strategy in the Age of American Hegemony* William D. James,2024 Employing several historical case studies between 1940 2003 and marshalling a host of primary sources William D James argues that British politicians and officials have thought in grand strategic terms under American hegemony even if they do not realise or admit to this **Imperial Defence** Greg Kennedy,2007-11-21 This new collection of essays from leading British and Canadian scholars presents an excellent insight into the strategic thinking of the British Empire It defines the main areas of the strategic decision making process that was known as Imperial Defence The theme is one of imperial defence and defence of empire so chapters will be historiographical in nature discussing the major features of each key component of imperial defence areas of agreement and disagreement in the existing literature on critical interpretations introducing key individuals and positions and commenting on the appropriateness of existing studies as well as identifying a raft of new directions for future research
