the history and economics of Star Trek from the original series 1966-1969 to its final television incarnation in Enterprise 2002-2005. Secondly, it focuses on the interrelationships between different levels of production and production workers, drawing on uniquely original material including interviews with star captains William Shatner and Sir Patrick Stewart and with production workers ranging from set builders to executive producers to examine the tensions between commercial constraints and creative autonomy. These interviews were primarily carried out in Hollywood during the making of the film Nemesis 2002 and the first series of Star Trek Enterprise. Thirdly, the authors employ textual analysis to study the narrative storyworld of the Star Trek television corpus and also to discuss the concept and importance of character in television drama. The book is a deft historical and critical study that is bound to appeal to television and media studies scholars, students, and Star Trek fans the world over. With a foreword by Sir Patrick Stewart, Captain Jean-Luc Picard in Star Trek: The Next Generation.

digital economy threatens artists lives and work the music writing and visual art that sustain our souls and societies from an award winning essayist and critic There are two stories you hear about earning a living as an artist in the digital age One comes from Silicon Valley There s never been a better time to be an artist it goes If you ve got a laptop you ve got a recording studio If you ve got an iPhone you ve got a movie camera And if production is cheap distribution is free it s called the Internet Everyone s an artist just tap your creativity and put your stuff out there The other comes from artists themselves Sure it goes you can put your stuff out there but who s going to pay you for it Everyone is not an artist Making art takes years of dedication and that requires a means of support If things don t change a lot of art will cease to be sustainable So which account is true Since people are still making a living as artists today how are they managing to do it William Deresiewicz a leading critic of the arts and of contemporary culture set out to answer those questions Based on interviews with artists of all kinds *The Death of the Artist* argues that we are in the midst of an epochal transformation If artists were artisans in the Renaissance bohemians in the nineteenth century and professionals in the twentieth a new paradigm is emerging in the digital age one that is changing our fundamental ideas about the nature of art and the role of the artist in society

*Billboard* ,2005-07-16 In its 114th year Billboard remains the world s premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends **Don'T Call the Police** Richard Stein,2016-06-06 Three years ago Dawson Crawford the son of a wealthy San Diego family and the star of the Ashland University drama program vanished without a trace Despite a pair of phone calls informing the Crawford family that their eldest son had been kidnapped the police have discounted that information and have concluded that the young man left town on his own accord Now the young mans mother has hired Caitlin Logan a PI from Del Mar California to investigate the disappearance of a young man whose life was far more complicated than either his family or the police were aware Meta Television Erin Giannini,2024-03-18 The idea of metatextuality is frequently framed as a recent television development and often paired with the idea that it represents genre exhaustion US television however with its early live performances and set bound sitcoms always suggested an element of self awareness that easily shaded into metatextuality even in its earliest days Meta Television thus traces the general history of US television s metatextuality throughout television s history arguing that TV s self awareness is nothing new and certainly not evidence of a period of aesthetic exhaustion but instead is woven into both its past and present practice elucidated through case studies featuring series from the 1970s to the present day many of which have not been critically analyzed before and the various ways they deploy metatext to both construct and deconstruct their narratives Further Meta Television asserts that this re and de construction of narrative and production isn t just a reward to the savvy and or knowledgeable viewer or consumer but seeks to make broader points about the media we consume and how we consume it This book explores the ways in which the current metatextual turn in both the usual genres

in which it appears horror and sci fi fantasy and its movement into drama and sitcom represents the next turn in television's inherent self awareness. It traces this element throughout television's history growing from the more modest reflexivity of programs' awareness of themselves as created objects in a particular medium to the more significant breaking of the fictive illusion and therefore the perceived distance between the audience and the series. Erin Giannini shows how the increased currency of metatextual television in the contemporary era can be tied to a viewership well versed in its stories and production as well as able and willing to talk back via social media. If television reflects culture to a certain extent, this increased reflexivity mirrors that responsive audience as a consequence of the lack of distance that metafiction embraces. As Robert Stam traced the use and implications of reflexivity in film and literature, this book does the same for television, further problematizing John Ellis's glance theory in terms of both production and spectatorship. **The Saturday Evening Post**, 1923.
