## **Putting Class In Its Place Worker Identities In East Asia:**

*Putting Class in Its Place* Elizabeth J. Perry, 1996      **Organising Labour in Globalising Asia** Andrew Brown, Jane Hutchison, 2003-09-02 This book offers wide ranging insights into the organising capacities of workers in Asia today Nine case studies examine workers responses to class relations through independent unions non government organisations NGOs and more dis organised struggles Countering the notion that globalisation holds entirely negative consequences for labour organisation the authors reveal some of the openings for local activism which can arise from transnational production arrangements The volume covers the second tier industrializers China Thailand Malaysia the Philippines Indonesia India and Bangladesh Interdisciplinary in nature it will be of great interest to students and scholars of Asian studies development studies and international labour studies      **Labor Markets, Gender and Social Stratification in East Asia** , 2015-12-22 Following the Asian economic crisis of the 1990s this is the first book to examine the structure and transformation of the labor markets and social stratification of contemporary East Asia namely Japan Korea Taiwan and China focusing in particular on gender inequality It deals with social mobility and gender differences in unemployment temporary employment and self employment Additionally gender segregation social identity and suicide rates are also addressed Taken together the issues raised in this volume reinforce the advantage of a comparative approach to East Asian Studies The findings supported by strong statistical analysis clearly call into question a longstanding view that East Asian gender regimes and class structure are homogeneous Indeed this is demonstrably not the case as *Labor Markets Gender and Social Stratification in East Asia* shows revealing as it does considerable diversities in labor markets gender regimes and social mobility within East Asian societies due to historical and institutional differences Contributors include Chang Chin Fen Kim Young Mi Oda Akiko Phang Hanam Sakaguchi Yusuke Shibata Haruka Takamatsu Rie Takenoshita Hirohisa Tarohmaru Hiroshi Xie Guihua and Yamato Reiko      **Against the Law** Ching Kwan Lee, 2007 This powerful study opens a critical perspective on the slow death of socialism and the rebirth of capitalism in the world s most dynamic and populous country Based on remarkable fieldwork and extensive interviews in Chinese textile apparel machinery and household appliance factories *Against the Law* dissects the world of Chinese workers today and finds a rising tide of labor unrest mostly hidden from the world s attention Intense working class agitation is being spurred by massive unemployment of Mao s socialist proletariat in the northern rustbelt and by the exploitation of millions of young workers in the southern sunbelt Providing a broad comparative political and economic analysis of the vast mosaic of this labor struggle together with unprecedented fine grained ethnographic detail the book portrays the multi faceted humanity of the Chinese working class as their stories unfold in bankrupt state factories and global sweatshops in crowded dormitories and remote villages at heroic moments of street protests as well as in quiet disenchantment with the corrupt officialdom and the fledgling legal system      **Inside China's Automobile Factories** Lu Zhang, 2015 In *Inside China's Automobile Factories* Lu Zhang explores the current conditions subjectivity and collective

actions of autoworkers in the world's largest and fastest growing automobile manufacturing nation. Based on years of fieldwork and extensive interviews conducted at seven large auto factories in various regions of China, Zhang provides an inside look at the daily factory life of autoworkers and a deeper understanding of the roots of rising labor unrest in the auto industry. Combining original empirical data and sophisticated analysis that moves from the shop floor to national political economy and global industry dynamics, the book develops a multilayered framework for understanding how labor relations in the auto industry and broader social economy can be expected to develop in China in the coming decades.

**The Making of the Chinese Industrial Workplace** Mark W. Frazier, 2002-01-24. State workers in China have until recently enjoyed the iron rice bowl of comprehensive cradle to grave benefits and lifetime employment. This central institution in Chinese politics emerged over the course of various crises that swept through China's industrial sector prior to and after revolution in 1949. Frazier explores critical phases in the expansion of the Chinese state during the middle third of the twentieth century to reveal how different labour institutions reflected state power. While the iron rice bowl is usually seen as an outgrowth of Communist labour policy, Frazier's account shows that it has longer historical roots. As a product of the Chinese state, the iron rice bowl's dismantling in the 1990s has raised sensitive issues about the way in which the contemporary Chinese state exerts control over urban industrial society. This book sheds light on state and society relations in China under the Nationalist and Communist regimes.

Challenging the Mandate of Heaven Elizabeth J. Perry, 2015-05-20. Social science theories of contentious politics have been based almost exclusively on evidence drawn from the European and American experience, and classic texts in the field make no mention of either the Chinese Communist revolution or the Cultural Revolution, surely two of the most momentous social movements of the twentieth century. Moreover, China's record of popular upheaval stretches back well beyond this century; indeed, all the way back to the third century B.C. This book, by bringing together studies of protest that span the imperial, Republican, and Communist eras, introduces Chinese patterns and provides a forum to consider ways in which contentious politics in China might serve to reinforce, refine, or reshape theories derived from Western cases.

Taiwan's Economic Success Since 1980 Zhaocheng Mai, Jiansheng Shi, 2001-01-01. The book will be of great help to readers interested in Taiwan's economic performance over the past twenty years. Gilles Guiheux. The China Journal. Taiwan's economic development experience represents a unique case study, especially in the wake of the Asian financial crisis. Taiwan has performed outstandingly in terms of macroeconomic and industrial development, particularly during recent democratic and social change. This book aims to provide a broad picture of these institutional reforms and policy evolutions.

**Reworking Japan** Nana Okura Gagné, 2021-01-15. Reworking Japan examines how the past several decades of neoliberal economic restructuring and reforms have challenged Japan's corporate ideologies, gendered relations, and subjectivities of individual employees. With Japan's remarkable economic growth since the 1950s, the lifestyles and life courses of salarymen came to embody the New Middle Class family ideal. However, the nearly three decades of economic stagnation and reforms

since the bursting of the economic bubble in the early 1990s has intensified corporate retrenchment under the banner of neoliberal restructuring and brought new challenges to employees and their previously protected livelihoods In a sweeping appraisal of recent history Gagn demonstrates how economic restructuring has reshaped Japanese corporations workers and ideals as well as how Japanese companies and employees have resisted and actively responded to such changes Gagn explores Japan s fraught and problematic transition from the postwar ideology of companyism to the emergent ideology of neoliberalism and the subsequent large scale economic restructuring By juxtaposing Japan s economic transformation with an ethnography of work and play and individual life histories Gagn goes beyond the abstract to explore the human dimension of the neoliberal reforms that have impacted the nation s corporate governance socioeconomic class workers subjectivities and family relations *Reworking Japan* with its firsthand analysis of how the supposedly hegemonic neoliberal regime does not completely transform existing cultural frames and social relations will shake up preconceived ideas about Japanese men and the social effects of neoliberalism

*Global Labour History* Jan Lucassen,2008 Contains 18 essays on worldwide aspects and comparisons in labour history Covers mainly the period from the beginning of 19th century to 2000

*The Development of Modern South Korea* Kyong Ju Kim,2007-01-24 The Development of Modern South Korea provides a comprehensive analysis of South Korean modernization by examining the dimensions of state formation capitalist development and nationalism Taking a comparative and interdisciplinary approach this book highlights the most characteristic features of South Korean modernity in relation to its historical conditions institution traditions and cultural values paying particular attention to Korean s pre modern civilization

**Chinese Workers** Jackie Sheehan,2002-09-11 Jackie Sheehan traces the background and development of workers clashes with the Chinese Communist Party through mass campaigns such as the 1956 7 Hundred Flowers movement the Cultural Revolution the April Fifth Movement of 1976 Democracy Wall and the 1989 Democracy Movement The author provides the most detailed and complete picture of workers protest in China to date and locates their position within the context of Chinese political history *Chinese Workers* demonstrates that the image of Chinese workers as politically conformist and reliable supporters of the Communist Party does not match the realities of industrial life in China Recent outbreaks of protest by workers are less of a departure from the past than is generally realized

*Popular China* Perry Link,Richard P. Madsen,Paul G. Pickowicz,2001-12-11 Using ingenious research methods the contributors to this book explore the search for meaning among ordinary people in China today The subjects of these vivid essays span the social spectrum from hip young entrepreneurs to sweatshop workers and homeless beggars The issues are equally diverse ranging from domestic violence to homosexuality to political corruption The culture of popular China emerges as a mixture of exhilarating new aspirations as seen in the basketball fans who dream of flying like Michael Jordan or Kobe Bryant rueful cynicism as biting conveyed in the many satirical jingles that circulate by word of mouth and painful ambivalence The people depicted here have built their popular culture out of ideas and symbolic practices drawn from old cultural traditions

from concepts about modernity debated during the early twentieth century republican era from the legacies of Maoist socialism and from contemporary global culture Throughout the book shows how economic and social changes caused by globalization in combination with the continuing Party dictatorship have presented ordinary Chinese with a new array of moral and cultural challenges that they have met in ways that have changed the face of China Contributions by Julia F Andrews Anita Chan Deborah S Davis Leila Fernandez Stembridge Robert Geyer Amy Hanser Richard Levy Perry Link Richard P Madsen Andrew Morris Paul G Pickowicz Kuiyi Shen Liping Wang Li Zhang Yuezhi Zhao and Kate Zhou

Workers at War Joshua H. Howard, 2004-09-29 This book focuses on the lives struggles and contrasting perspectives of the 60 000 workers military administrators and technical staff employed in the largest most strategic industry of the Nationalist government the armaments industry based in the wartime capital Chongqing The author argues that China's arsenal workers participated in three interlocked conflicts between 1937 and 1953 a war of national liberation a civil war and a class war The work adds to the scholarship on the Chinese revolution which has previously focused primarily on rural China showing how workers alienation from the military officers directing the arsenals eroded the legitimacy of the Nationalist regime and how the Communists mobilized working class support in Chongqing Moreover in emphasizing the urban working class and nationalist components of the 1949 revolution the author demonstrates the multiple sources of workers identities and thus challenges previous studies that have exclusively stressed workers particularistic or regional identities

Contesting Citizenship in Urban China Dorothy J. Solinger, 1999-05-17 Post Mao market reforms in China have led to a massive migration of rural peasants toward the cities Denied urban residency this floating population provides labour but loses out on government benefits This study challenges the notion that markets promote rights and legal equality **The Limits Of Social Cohesion** Peter L. Berger, 2018-03-05 Normative conflicts center on fundamental disagreements over issues of public morality and the identity of a society In thinking about normative conflicts on a global scale two principal questions arise First are there common characteristics of such conflicts worldwide Second which institutions polarize such conflicts and which can serve to mediate them This pathbreaking book edited by renowned sociologist Peter Berger examines both questions through findings gained from a study of normative conflicts in eleven societies located in different parts of the world and at different levels of economic development On both points the findings have proved surprising Although there are of course normative conflicts peculiar to individual societies two features emerged as common to most of the societies examined one concerns disputes over the place of religion in the state and in public life the other is a clash of values between a cultural elite and the broad masses of the population Often the two features coincide For instance in many countries the elite is the least religious group within the population and therefore resentments against the elite are often mobilized under religious banners On the institutional question the study started out with a bias toward the institutions of so called civil society that is the institutions that stand between the personal life of individuals and the vast mega structures of a modern

society The finding is that the same institutions can either polarize or mediate normative conflicts The conclusion suggests one must ask not just what sort of institutions one looks to for social cohesion but what ideas and values inspire these institutions Comprising reports from some of the leading scholars dealing with normative conflict this book is an important contribution to understanding the cultural fault lines that threaten social cohesion **Chinese Society** Elizabeth J. Perry, Mark Selden, 2010-04-05 This bestselling introduction to Chinese society uses the themes of resistance and protest to explore the complexity of life in contemporary China An interdisciplinary and international team of China scholars draw on perspectives from sociology anthropology psychology history and political science and covers a broad range of issues Topics covered include labour and environmental disputes rural and ethnic conflict migration legal challenges intellectual and religious dissidence opposition to family planning The newly **Proletarian Power** Elizabeth Perry, 2018-05-04 This pathbreaking book offers the first in depth study of Chinese labor activism during the momentous upheaval of the Cultural Revolution Arguing that labor was working at cross purposes the authors explore three distinctive and different forms of working class protest rebellion conservatism and economism Drawing upon a wealth of heretofore inaccessible archival sources the authors probe the divergent political psychocultural and socioeconomic strains within the Shanghai labor movement convincingly illustrating the complexity of working class politics in contemporary China This pathbreaking book offers the first in depth study of Chinese labor activism during the momentous upheaval of the Cultural Revolution The authors explore three distinctive forms of working class protest rebellion conservatism and economism Labor they argue was working at cross purposes through these three modes of militancy promoted by different types of leaders with differing agendas and motivations Drawing upon a wealth of heretofore inaccessible archival sources the authors probe the divergent political psychocultural and socioeconomic strains within the Shanghai labor movement As they convincingly illustrate the multiplicity of worker responses to the Cultural Revolution cautions against a one dimensional portrait of working class politics in contemporary China Doing Fieldwork in Japan Theodore C. Christine R Yano     *Disenfranchised* Joel Andreas, 2019-08-01 In the decades following World War II factories in many  
countries not only provided secure employment and a range of economic entitlements but also recognized workers as  
legitimate stakeholders enabling them to claim rights to participate in decision making and hold factory leaders accountable  
In recent decades as employment has become more precarious these attributes of industrial citizenship have been eroded  
and workers have increasingly been reduced to hired hands As Joel Andreas shows in *Disenfranchised* no country has  
experienced these changes as dramatically as China Drawing on a decade of field research including interviews with both  
factory workers and managers Andreas traces the changing political status of workers inside Chinese factories from 1949 to  
the present carefully analyzing how much power they have actually had to shape their working conditions
