**Putting Food on what was the Soviet Table** Michael P. Claudon, Tamar L. Gutner, 1992 Discontent and economic disintegration in this troubled Soviet winter of 1991-92 are everywhere Shelves in state food stores offer little choice or are empty Republics ban the export of scarce goods to fellow republics Price increases threaten to overwhelm the average Soviet family which is already spending 80 percent of its income and many hours in line each week for food Boris Yeltsin the first popularly elected president of Russia hears demands from former supporters that his government resign because his radical economic reforms are a failure What is to be done Putting food on the Soviet table is an essential first step But correcting 60 years of misguided agricultural and economic policies will not be done in a winter or a year or two Reforming the agricultural system will take decades Breaking up inefficient state and collective farms into smaller individual farms or cooperatives improving roads storage facilities and processing plants and creating free markets that will give producers incentives to respond to consumer needs at reasonable prices will take decades The task is enormous But the resources of the former Soviet Union as the following papers by Soviet and Western agricultural experts indicate are great The country produced more wheat dairy products vegetables and small grains than the United States did in 1990 The country does have the potential to feed itself but not by producing more The country's current food crisis results not from poor harvests though they are a factor but from an inability to get food efficiently from the field to the table Anywhere from 20 to 50 percent of Soviet food crops is lost in this process If agrarian reform is to succeed however it must also be coupled with comprehensive economic reform the acceptance of private property free market pricing and the elimination of central bureaucracies In the short run contributors agree the West will need to provide humanitarian food aid to meet emergency needs and to support emerging and fragile democratic governments But the West can best aid the former Soviet Union by providing long term technical assistance and people to people programs that help the Soviets develop a market economy and the skills to run small independent farms What is clear from these papers is that there is no quick fix for the agricultural problems of the former Soviet Union But what is also clear is the country does have the potential to put food on the table and feed its people well

**The Soviet Union and Global Environmental Change** Jonathan D. Oldfield, 2021-05-26 This book argues that the Soviet Union was a highly influential actor in furthering understandings of society-nature interaction on the international stage and played a key role in helping to shape conceptualize and assess the relationship between humankind and the Earth system It considers how humankind's capacity to affect physical and biological systems at a global scale was acknowledged and studied by Soviet scientists discusses how the interaction between Soviet and Western scientists stimulated the development of new technologies and insights which simultaneously facilitated a more profound understanding of the Earth's physical and biological systems and explores how Soviet scientists drew upon pre-revolutionary intellectual traditions in order to make sense of society-nature interaction and did so in collaboration with a range of international initiatives Overall the book provides a deep analysis of how Soviet scientists conceptualized society-nature interaction and influenced the understanding of global physical and biological systems Furthermore it is argued that this intellectual legacy remains of importance today with respect to the activities of Russian science and contemporary global environmental challenges

*Dispersed Dispossession* Alexander Vorbrugg, 2025 This book provides a nuanced analysis of rural change in Russia during the 2010s a crucial and formative phase marked by the consolidation of giant agricultural companies large land deals soaring exports and spectacular failures of investment projects It contextualizes complex and often ambivalent empirical realities within historical and political-economic frameworks Through extensive fieldwork Alexander Vorbrugg gives rare insights into the operations of large agricultural companies and reveals how the deterioration of material infrastructures social arrangements government and local supports and collective goods erode the conditions of rural inhabitants well-being and agency Vorbrugg introduces dispersed dispossession a concept that helps to relate gradual degradation to appropriation and agency The concept captures losses that have been accumulated across Soviet reform and state capitalist phases and stick to places persons and potentialities These losses are perpetuated and exploited by businesses and politicians and have profound implications for the conditions for resistance shaping the range of conceivable alternatives They are part of a history that is not fully past Provided by publisher

**Building Market Institutions in Post-communist Agriculture** David A. J. Macey, William Pyle, Stephen K. Wegren, 2004-01-01 Eurasia emerged from the former Soviet states failed agrarian program poised to be a great power in the new global economy In the late 1980s post-communist states put forth an agrarian reform plan that promised whirlwind institutional change as its goal However these amendments did not unleash the efficiency and productivity that privatization and destatizing seemed to promise Editors David Macey William Pyle and Stephen Wegren along with a host of world-leading agrarian analyst and practitioners discuss

the shortcoming of post communist agrarian reform and reveal how and why particular policies were or were not adopted Building Market Institutions in Post Communist Agriculture draws on country level case studies to analyze various initiatives undertaken by agricultural economies Contributors use a comparative analytical framework to shed light on the complex universal processes of agrarian transformation that continue to change the social economic and political character of the former Soviet Union

**The Ambivalence of Power in the Twenty-First Century Economy** Vadim Radaev,Zoya Kotelnikova,2022-07-07 The Ambivalence of Power in the Twenty First Century Economy contributes to the understanding of the ambivalent nature of power oscillating between conflict and cooperation public and private global and local formal and informal and does so from an empirical perspective It offers a collection of country based cases as well as critically assesses the existing conceptions of power from a cross disciplinary perspective The diverse analyses of power at the macro meso or micro levels allow the volume to highlight the complexity of political economy in the twenty first century Each chapter addresses key elements of that political economy from the ambivalence of the cases of former communist countries that do not conform with the grand narratives about democracy and markets to the dual utility of new technologies such as face recognition thus providing mounting evidence for the centrality of an understanding of ambivalence in the analysis of power especially in the modern state power driven capitalism Anchored in economic sociology and political economy this volume aims to make visible the dimensions of power embedded in economic practices The chapters are predominantly based on post communist practices but this divergent experience is relevant to comparative studies of how power and economy are interrelated

Hart, Joan Edelman Spero, 2013-06-17 The first and definitive book of its kind Joan Spero's The Politics of International Economic Relations has been fully updated to reflect the sweeping changes in the international arena With the expertise of co author Jeffrey Hart the fifth edition strengthens the coverage of political and economic relations since the end of the Cold War economic polarization in developing nations and the roots of economic decline in centrally planned economies A new chapter on industrial policy and competitiveness debates further illustrates the changing dynamics of International Political Economy Ideal as a supplement to the International Relations course or as the core text in International Political Economy Spero and Hart's The Politics of International Economic Relations continues to give students the breadth and depth of scholarship needed to understand the politics of world economy **Markets Versus Hierarchies** Ekaterina Brancato, 2009-01-01 Historians have often debate why political factors have dominated economic developments in Russian history but never as systematically as in this ambitious interdisciplinary study An excellent highly original work It will interest a broad scholarly audience including economists historians free market advocates business historians management specialists and public policy experts This well written volume is an essential holding for research libraries Highly recommended J P McKay Choice This unique book uses a transaction cost perspective to illustrate how hierarchies influenced the structure of markets and behaviour of individual businesses and cartels in pre revolutionary Soviet and present day Russia Ekaterina Brancato exposes the devastating effects of self interested decision making of government officials on economic growth and highlights the inefficiencies of the legal system in Russia She demonstrates that throughout Russian history considerable state involvement in the economy has meant that some markets were highly regulated for most of the 20th century open markets were suppressed by the political regime and entrepreneurial success has been dependent on networking The general population the author argues has exhibited an inadequate propensity to self govern In addition the laws of contract and private property crucial for

development of markets have been ineffective The book concludes that consequently the cost of market transactions has been high and the cost of social networking through hierarchies relatively low This book will strongly appeal to academics and students specializing in industrial organization public choice transition entrepreneurship social networks and cultural studies as well as Russian economic history and political economy Business and management students focusing on transition economies will also find this book to be of particular interest World Agricultural Economics and Rural Sociology
