Putting Money In Its Place:

Putting Psychology in its Place Graham Richards, Paul Stenner, 2022-07-19 This fourth edition of Putting Psychology in Its Place builds on the previous three in introducing the history of Psychology and placing the discipline within its historical and social contexts Written by esteemed Psychologists Graham Richards and Paul Stenner this crucial text aims both to answer and raise questions about the role of Psychology in modern society by critically examining issues such as how Psychology developed and why psychoanalysis had such an impact It discusses enduring underlying conceptual problems and examines how the discipline has changed to deal with contemporary social issues such as religion race and gender The fourth edition features revised and updated chapters though the core structure remains unchanged The final chapter has been restructured and jointly re written This text was written to remain compatible with the British Psychological Society requirements for undergraduate courses and is imaginatively written and accessible to all Putting Psychology in Its Place is an invaluable introductory text for undergraduate students of the history of Psychology and will also appeal to postgraduates academics and anyone interested in Psychology or the history of science

The Wise Inheritor's Guide to Freedom from Wealth Charles A. Lowenhaupt, 2018-09-07 Wealth should never consume or imprison the wealth holder but it can This book provides solutions to the issues many wealth inheritors encounter including problems with trust family wealth secrets and family legacy The next generation may witness one of the largest transfers of wealth in history By one estimate millennials and Generation Z are set to inherit 30 trillion over the next 30 years The sudden inheritance of significant wealth creates a variety of challenges that seem counterintuitive and can be difficult to understand and deal with making inheritors of wealth feel isolated from friends and colleagues Meanwhile the wealth industry is fed by revenue paid by wealth owners not inheritors causing misalignment of priorities and generational conflict The Wise Inheritor's Guide to Freedom from Wealth helps readers to put their new wealth in perspective preparing them to lead inspired lives of self actualization and freedom As a third generation wealth counselor and industry leader Charles A Lowenhaupt has helped wealth creators and inheritors to manage almost every imaginable challenge including marital tension family dysfunction and addiction Few people actually have the knowledge and experience to figure out the purpose of wealth and set it on its course In this book he helps wealth inheritors to develop a healthy relationship with wealth at a young age thus enabling readers to live in harmony with both their wealth and their families

Putting Science in Its Place David N. Livingstone, 2010-04-15 We are accustomed to thinking of science and its findings as universal After all one atom of carbon plus two of oxygen yields carbon dioxide in Amazonia as well as in Alaska a scientist in Bombay can use the same materials and techniques to challenge the work of a scientist in New York and of course the laws of gravity apply worldwide Why then should the spaces where science is done matter at all David N Livingstone here puts that question to the test with his fascinating study of how science bears the marks of its place of production Putting Science in Its Place establishes the fundamental importance of geography in both the

generation and the consumption of scientific knowledge using historical examples of the many places where science has been practiced Livingstone first turns his attention to some of the specific sites where science has been made the laboratory museum and botanical garden to name some of the more conventional locales but also places like the coffeehouse and cathedral ship s deck and asylum even the human body itself In each case he reveals just how the space of inquiry has conditioned the investigations carried out there He then describes how on a regional scale provincial cultures have shaped scientific endeavor and how in turn scientific practices have been instrumental in forming local identities Widening his inquiry Livingstone points gently to the fundamental instability of scientific meaning based on case studies of how scientific theories have been received in different locales Putting Science in Its Place powerfully concludes by examining the remarkable mobility of science and the seemingly effortless way it moves around the globe From the reception of Darwin in the land of the Maori to the giraffe that walked from Marseilles to Paris Livingstone shows that place does matter even in the world of science

Putting Intellectual Property in Its Place Laura J. Murray, S. Tina Piper, Kirsty Robertson, 2014-03 Putting Intellectual Property in its Place examines the relationship between creativity and intellectual property law on the premise that despite concentrated critical attention devoted to IP law from academic policy and activist quarters its role as a determinant of creative activity is overstated The effects of IP rights or law are usually more unpredictable non linear or illusory than is often presumed Through a series of case studies focusing on nineteenth century journalism fake art plant hormone research between the wars online knitting communities creativity in small cities and legal practice the authors discuss the many ways people comprehend the law through information and opinions gathered from friends strangers coworkers and the media They also show how people choose to share create negotiate and dispute based on what seems fair just or necessary in the context of how their community functions in that moment while ignoring or reimaging legal mechanisms In this book authors Murray Piper and Robertson define the everyday life of IP law constituting an experiment in non normative legal scholarship and in building theory from material and located practice
