Puzzle Train:

Steam Trains and Jigsaw Puzzles David Platt, 2007-07-18 Steam Trains and Jigsaw Puzzles strikes most people as an intriguing title. The origin is simple; however, my trainspotting youth has been synchronized with a later interest in jigsaw puzzles. The result is expensive. I have a collection of over 250 jigsaws depicting British steam railways. The conclusion is impossible: there are over 500 steam railway jigsaw puzzles to collect, and they are being supplemented annually. The Liverpool Manchester Railway marked the arrival of the true passenger railway service in 1830 and presented jigsaw manufacturers with another subject on which to focus. Prior to this date, the jigsaw experience started by John Spilsbury in c1760 was restricted to subjects such as religion, geography, history, monarchs, the alphabet, and art. Many characteristics combine to form the basis of nostalgic images buried indelibly in the minds of people who travelled in the steam railway age. Manufacturers have not been slow to tap into this nostalgia and produce jigsaws aimed at stirring those memories and inviting people to reflect on past experiences, good, bad, or indifferent. Chad Valley, Victory, Good Companion, Falcon, Waddingtons, and Arrow are just a few manufacturers who produced steam railway jigsaws in the past. Most of these companies are now a distant memory, while others are in foreign ownership. Equally famous names such as Wentworth, Ravensburger, Germany House of Puzzles, Gibsons, JR Puzzles, and King Puzzles, Holland, continue the manufacturing tradition. Output is generally superb, thanks to the efforts of fine railway artists such as Terence Cuneo, George Heiron, T. E. North, Don Breckon, John Austin, Barry Freeman, and Malcolm Root. The book is aimed at anyone with an interest in jigsaw puzzles and at those enthusiasts and aficionados who refuse to allow those evocative memories of the Golden Age of Steam to die. **Train Your Brain Puzzles Book C** Arihant Experts, 2016-05-10 This book has been designed for the aspirants preparing for various management entrances: CAT, MAT, XAT, etc. to train their brain to think logically by trying to solve the simulating logic puzzles. The Hidden Paw's First 50 Puzzles Akram Najjar, 1901. This first puzzle eBook contains a collection of 50 puzzles or riddles with their solutions. These brain teasers require insight to solve, but not brute force. Some of them rely on common sense. Others are AHA or GOTCHA puzzles that Martin Gardner loved. There are some that rely on lateral thinking, while others require convoluted logic to solve. Of interest are some uncommon puzzles such as cross numbers and puzzles extracted from real life situations. When selecting the puzzles, two attempts were made: 1. Not to include commonly available puzzles; 2. Not to include puzzles that require general knowledge or expertise in specific domains such as math or algebra. The intended age bracket is from early teens onwards.
