The Poet's Tomb Martin Corless-Smith, 2020-04-23 Every poem an epitaph every poem a ticket to ride from Sappho's bittersweet eroticism to the wild civility of Robert Herrick Martin Corless Smith is a poet painter and translator of canonical poems and each of these vocations is on view in this memorable defense of poetry as he reads from Virgil to Notley in sight of the impossible blue of Bellini's Doge Leonardo Loredan and Piranesi's otherworldly Pyramid of Cestius while contemplating the paradoxes of the finite body of the poet dreaming immortal poetry Keith Tuma Querying the embodiment of poetry Corless Smith begins in the body of the poet living and or dead and passes from there through the body of the reader in order to argue the mutual construction of the body of a poem as a shared body and a new commons which like all things vital to survival air water hope must be maintained as open and available to all These succinct elegant essays perform this maintenance and in the process return us to all poetry charged with the energy and insight necessary to continue that maintenance ourselves Cole Swensen Pyramid of Secrets Alan F. *Cosmic Womb* Chandra Wickramasinghe, Ph.D., Robert Bauval, 2017-12-19 Compelling evidence that life intelligence and evolution on Earth were seeded by comets and cosmic intelligence Explains how life first came from interstellar dust and comets and how later arrivals of cosmic dust and comets spurred evolution Explores the possibility that universal knowledge may be stored in human DNA and how ancient cultures may have known a way to retrieve this knowledge Reveals new discoveries about the dimensions of the Great Pyramid of Giza All ancient cultures link humanity's origins to the heavens The Egyptians for example were adamant that their ancestors came from the stars of Orion and Sirius Today however religion and science assert that life arose spontaneously here on Earth Did the ancients know our true cosmic origins Have they left us clues Expanding on the panspermia theory developed with the celebrated astronomer Sir Fred Hoyle namely that the building blocks of life were imported to Earth by comets in the distant past Chandra Wickramasinghe and Robert Bauval explore the latest findings in support of a cosmic origin for humanity They detail the astrobiological discoveries of organic molecules deep in space how microbes are incredibly resistant to the harshest conditions of space enabling the transfer of genes from one star system to another and the recent recovery of microorganisms from comets still in space They argue that the universe was born and preset with the blueprint of life and that the cosmos must be teeming with lifeforms far older and perhaps far more developed than us They show how life arrived on our planet in the form of interstellar dust containing alien bacteria approximately 3.8 billion years ago and how later comets meteoroids and asteroids brought new bacterial and viral genetic material which was vital for evolution Using the latest advances in physics cosmology and neuroscience the authors explore how universal knowledge may be stored in human DNA and cells and they postulate that ancient cultures such as the pyramid builders of Egypt and the temple builders of India may have known a way to retrieve this knowledge Sharing new discoveries from experienced architects engineers and mathematicians they show how the Great Pyramid is a three

dimensional mathematical equation in stone bearing a potent message for humanity across time and space about who we are and where we come from

**The Egypt Code** Robert Bauval, 2007-10-01 Why did the ancients align their monuments so precisely with the stars What were the practical and symbolic reasons behind these mysterious configurations From the author of *The Orion Mystery* the best selling book that introduced the revolutionary star correlation theory about the Giza pyramids *The Egypt Code* reveals an amazing Grand Unified Plan behind the legendary temples of upper Egypt Robert Bauval one of the world's most prominent and controversial Egyptologists completes his groundbreaking investigation of astronomy as related to Egyptian monuments and related religious texts *The Egypt Code* revisits the Pyramid Age and the Old Kingdom proposing a vast sky ground correlation for the Memphite Heliopolis region and presenting the possibility of a grand plan spanning three thousand years of Pharaonic civilization and involving pyramids and major temple sites along the Nile The central idea of the book is that the cosmic order which the ancients referred to as Maat was comprised of the observable cycles of the sun and stars in particular the star Sirius and that the changes that took place due to the precession of the equinoxes and the so called Sothic Cycle are reflected in the orientation and location of religious sites

*Voices of Ancient Egypt* Rosalie David, 2014-10-28 Supporting the current trends toward document based teaching this book introduces the reader to the multifaceted world of ancient Egypt through revealing excerpts from 51 texts written by Egyptians themselves A wealth of evidence survives to tell the stories of ancient Egypt including monuments artifacts paintings sculptures human remains and literature But there is yet another way to access this fascinating culture through original writings that span the period from circa 3100 BCE to 400 CE This book's 51 documents include schoolboys letters and exercises prayers hymns love poems narratives historical inscriptions medical and mathematical texts and religious and funerary inscriptions Most of the texts are penned by Egyptians but another perspective is added through the inclusion of commentary about Egypt by the Greek historian Herodotus The documents are divided into sections to shed light on numerous aspects of Egyptian life including domestic values and household provision economics intellectual concerns government and warfare recreational life and religious beliefs and practices Each section provides historical context and discusses the meaning and significance of the individual excerpt The work highlights related themes and ideas to encourage students to explore the legacy of ancient Egypt in an essay paper drama production or class presentation

**A Journey through the Beyond** Silvia Zago, 2022-02-01 This volume offers the first comprehensive overview of the evolution over time of a foundational concept of the Egyptian afterlife beliefs the Duat or netherworld The Duat is a complicated multifaceted notion which was never canonized into a single version of the beyond but offered instead a variety of alternatives attempting to describe the metaphysical realms beyond the visible

world and beyond life Theological speculations gave rise to a rich textual and visual repertoire which underwent a process of evolution over thousands of years during which newer ideas and images were constantly introduced Through the analysis of royal and non royal funerary texts from the late Old Kingdom to the end of the New Kingdom this book traces the development of the conceptualization of the notion of Duat outlining what it encompassed and where it was imagined to be located In addition to the translation and discussion of the most significant passages of the texts analyzed each chapter also provides an overview of the individual compositions and of the relevant theological cosmological and astronomical notions complementing the conceptual framework of which the Duat formed but a part Additionally discussions of concurrent changes in Egyptian culture society and ideology are included in order to clarify the context in which afterlife beliefs and related texts evolved An analysis of the correlation between funerary compositions and their material supports complements the study emphasizing the Egyptians belief in a magical synergy between texts images and their contexts in the activation of a suitable effective afterlife for the recipients of the texts

mark of the beast have burst onto the scene like a lightning bolt on a humid summer night With the New World Order and One World religion in its infancy the world is reeling with wars and famines In a remote town in the Appalachian Mountains of Virginia things seem relatively calm Jimmy Farmer one of the first babies born into the new millennium is a recent college graduate Jimmy lives with his parents while awaiting acceptance into the park service With the New World Order bearing down Jimmy will be faced with eternal decisions to pursue God s call on his life or be lured by the New World Order His decisions will determine his destiny as he navigates relationships and his lukewarm attitude toward God while the world heads full speed toward Armageddon **The Nile and Egyptian Civilization** Alexandre Moret,1927 **Cleopatra**

**Incarnate and the great alien mother snake** Katrina Morrow,2023-05-30 Cleopatra a Queen and the last Pharaoh of Egypt comes from space as the most prominent foreign galactic being ever to walk the face of the Earth As the Egyptians believed that in death all would recycle and renew into new life so Cleopatra is reborn again through a woman of the American Civil Rights Era and then she is born again through another young woman of the American aughts In this incarnate story Cleopatra is something other than human as she embarks on a journey on Earth in the name of truth justice and union of Earth and the rest of space She is poetic and speaks the language of outer space as she faces trials on Earth and asks her old notorious snake that took her life to guide her through Earth s authorities accusations against her As the ancient war between Rome and Egypt lead to her demise her alien spirit takes flight into the American Era where trials are wavering in two different human women that embody the very alien spirit of Cleopatra **Following Osiris** Mark Smith,2017-02-15 Osiris god of the dead was one of ancient Egypt s most important deities The earliest secure evidence for belief in him dates back to the fifth dynasty c 2494 2345BC but he continued to be worshipped until the fifth century AD Following Osiris is concerned with ancient Egyptian conceptions of the relationship between Osiris and the deceased or what might be called the Osirian afterlife asking what the nature of this relationship was and what the prerequisites were for enjoying its benefits It does not seek to provide a continuous or comprehensive account of Egyptian ideas on this subject but rather focuses on five distinct periods in their development spread over four millennia The periods in question are ones in which significant changes in Egyptian ideas about Osiris and the dead are known to have occurred or where it has been argued that they did as Egyptian aspirations for the Osirian afterlife took time to coalesce and reach their fullest form of expression An important aim of the book is to investigate when and why such changes happened treating religious belief as a dynamic rather than a static phenomenon and tracing the key stages in the development of these aspirations from their origin to their demise while illustrating how they are reflected in the textual and archaeological records In doing so it opens up broader issues for exploration and draws meaningful cross cultural comparisons to ask for instance how different societies regard death and the dead why people convert from one religion to another and why they abandon belief in a god or gods altogether **The Ancient Alien Hypothesis** William M. Rowe,2023-04-17 The Ancient Alien Hypothesis The Connections Between Ancient

Archeological Sites and Ancient Extraterrestrials is a captivating exploration into the possibility that extraterrestrial beings have played a crucial role in shaping our past. Drawing from archaeological sites and ancient texts, this book delves into the enigmatic evidence suggesting our ancestors may have had otherworldly help in constructing awe-inspiring monuments. From the world's oldest megalithic structure, Gobekli Tepe, to the mystifying Puma Punku, the author weaves a compelling narrative that reveals astonishing connections between ancient sites and extraterrestrial influence. The book takes readers on a journey through the precision-cut walls of Sacsayhuaman, the celestial alignments of Teotihuacan, the enigmatic geoglyphs of the Nazca Lines, and the cosmic coordinates of the Great Pyramids of Giza. The author further explores the celestial knowledge of the Moai on Easter Island, the megalithic observatories of Stonehenge, and the Dogon Tribe's understanding of the Sirius binary star system. From the underground temple of Malta's Hypogeum to the celestial temple of Angkor Wat, the author demonstrates an extraordinary depth of research and passion for uncovering the truth behind these ancient wonders. The book also delves into the enigmatic origins of the Longyou Caves, the advanced technology of the Serapeum of Saqqara, and the extraterrestrial connections to the Yonaguni Monument. In *The Ancient Alien Hypothesis: The Connections Between Ancient Archeological Sites and Ancient Extraterrestrials*, the author presents a thought-provoking exploration of the connections between ancient archaeological sites and the possibility of extraterrestrial intervention in our distant past. This book is a must-read for anyone intrigued by ancient civilizations, archaeology, or the tantalizing possibility of life beyond our planet, offering a captivating glimpse into the profound impact of ancient alien influences on human history.
