The Economics of Defense Industry Thomas-Durell Young, 2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis Day

From Nighthawk to Spitfire John Shelton, 2015-07-06 R J Mitchell was virtually self taught surprisingly almost all his other aircraft 24 aircraft were slow flying seaplanes How a lad from the land locked Midlands apprenticed to a locomotive works came to be responsible for the Spitfire is a great tale in itself This detailed book tells us how Mitchell learned his trade from 1916 contributing to the production of the cumbersome Nighthawk designed to combat the German Zeppelin threat and gradually coming to produce record breaking racing floatplanes which in 1931 won outright the prestigious international Schneider Trophy Mitchell was thus well placed to design a high speed aircraft when war began to threaten but Dr Shelton reveals the production of the famous fighter was by no means a certainty and how indeed its vital contribution to winning the Battle of Britain was a very close run thing

Aircraft of the Fighting Powers Douglas Arthur Russell, 1944 Polish Air Force Fighter Aircraft, 1940-1942 Peter Sikora, 2024-01-18 Polish fighter pilots received their baptism of fire over their own country in September 1939 when they were overwhelmed by the aerial might of Germany and the Soviet Union Despite this they claimed over 120 enemy aircraft destroyed When the Polish Air Force was reborn in France the same men fought against the same enemy yet with more experience and with better understanding of their opponents tactics though as the author reveals the aircraft they flew were in most cases quite different Polish airmen also proved themselves during the Battle of Britain when 145 men from Poland the biggest non British contingent in Fighter Command fought for the survival one of the last bastions of democracy With an impressive tally of 126 enemy aircraft destroyed over Poland and a further fifty one in France these men including combat pilots flying instructors and test pilots had to be trained to serve under the command of the RAF They had to learn a new language that was crucial for them to be part of the Fighter Command organisation and when they finally did for every 100 men involved in fighting German Luftwaffe in the air up to twenty of them were Polish During the Battle of Britain fighter pilots from Poland destroyed over 202 enemy aircraft with 303 Squadron becoming the most successful unit in the whole of Fighter Command Ten Polish fighter squadrons were eventually formed and went on to fight alongside their British Canadian Australian Belgian or Dutch brothers in arms in

the RAF's offensive over northern Europe that began in earnest in 1941. In so doing the Polish fighter pilots achieved many successes against the enemy in the sky as well as on the ground though inevitably at a cost. Polish Air Force Fighter Aircraft 1940-1942 tells the story that the men and machines of the Polish squadrons underwent from the Battle of France to the Dieppe Raid. The latter was almost as disastrous in the air as it was on the ground though from the Polish perspective it confirmed the long developed skills of their pilots. This book however is not just about the aircraft the Polish aircrew flew; it also reveals how these men lived and fought in the early years of the Second World War.
