Higher Education Research Methodology Ben Kei Daniel, Tony Harland, Navé Wald, 2024-08-01 With new chapters and updated content throughout this second edition of Higher Education Research Methodology is an essential guide to systematic inquiry into higher education Providing practical and theoretical guidance for students topics covered include ontology and epistemology as well as research design approaches and methods of data collection New to this edition are two brand new chapters on conceptual and theoretical frameworks and research justification as well as a comprehensive revision of the chapter on engaging with academic literature Throughout the book there is a keen focus on quality in both the analysis and evaluation of research and new models are proposed to help the new researcher The authors provide advice as well as constructive critique of research methods and in turn offer a new contribution to the theories of research methodology Looking beyond the immediate higher education environment the book concludes by examining the challenges of getting work published and providing guidance on

how to do this successfully Thoroughly revised this new edition of Higher Education Research Methodology will be of interest to postgraduate students academic developers and experienced academics from a wide variety of disciplines Kielhofner's Research in Occupational Therapy Renee Taylor,2023-10-16 Ren e Taylor and an international team of contributors carry on Gary Kielhofner s innovative vision to demystify the research process and demonstrate that research is essential to occupational therapy practice They present a comprehensive guide to conducting applied research in the field from qualitative quantitative and mixed perspectives for students and clinicians You ll begin with a grounding in conducting evidence based practice in OT and an explanation of the six broad components of the research process Then you will explore research designs measurements and statistical analysis for qualitative and quantitative studies You ll examine the steps and procedures required to conduct research and how research can be used to shape professional practice and improve patient care *Online Research Methods in Sport Studies* Jamie Cleland,Kevin Dixon,Daniel Kilvington,2019-11-21 The internet and digital technologies have transformed sport and the way that we research sport opening up new ways to analyse sport organisations fan communities networks athletes the media and other key stakeholders in the field This engaging and innovative book offers a complete introduction to online research methods in sport studies guiding the reader through the entire research process and bringing that process to life with sport related cases and examples Covering both qualitative and quantitative methods the book introduces key topics such as generating a research idea implementing the research design maintaining good ethical standards and collecting analysing and presenting data It explains how to conduct online surveys online interviews and online ethnography in practice and every chapter contains individual and group activities to encourage the reader to engage with real online research as well as further reading suggestions to help them develop their knowledge *Online Research Methods in Sport Studies* is essential reading for undergraduate and postgraduate students academics and researchers with an interest in sport studies and is a useful reference for practitioners working in sport or sport media who want to improve their professional research skills **Methodologies in Peace Psychology** Diane Bretherton,Siew Fang Law,2015-09-03 This volume looks at research methods through the lens of peace studies and peace values Apart from reviewing established methods from peace psychology it presents some innovative ideas for conducting research in the area of peace psychology Many of these methods are drawn from the field from activities used by active peace practitioners A critical component of this volume is its core argument that peace research should be conducted by peaceful means and should model peaceful processes Organized thematically the volume begins with a review of the established best practices in peace psychology research methodology including methods for qualitative research for quantitative research and participative action networks In doing so it also points to some of the limitations of working for peace within the tradition of a single discipline and to the need to expand psychology methodology to methodologies Therefore the second half of the volume proceeds to explore the realm of innovative relatively unorthodox research methods such as participatory and

workshop methods the creative arts and sports for research purposes The use of new advances in information technology to conduct peaceful research are also discussed The concluding chapters synthesize key issues from the previous chapters and links peace psychology with ideas and implementation of research designs and practices Finally it discusses the nature of academic knowledge and more specifically academic knowledge in peace psychology and where that fits into the mission to build a more peaceful world Overall this book aims to provide peace psychologists with an array of possibilities and best practices for approaching their research Many researchers find the experience of doing research a somewhat lonely if not isolating experience Methodologies in Peace Psychology Peace Research by Peaceful Means aims to alleviate this feeling as the use of these more innovative methods leads to a closer engagement with the community and a much more social experience of research This volume is a useful tool for both new and experienced researchers because it provides leads for idealistic young researchers who want their work to make a difference in addition to encouraging more reflection and analysis for experienced peace psychologists
