Qualitative Methods For Reasoning Under Uncertainty:

Qualitative Methods for Reasoning Under Uncertainty Simon Parsons, 2001 Using qualitative methods to deal with imperfect information *Qualitative Methods for Reasoning Under Uncertainty*, 1994 , *Advances and Applications of DSMT for Information Fusion, Vol. 3* Florentin Smarandache, Jean Dezert, 2004 This volume has about 760 pages split into 25 chapters from 41 contributors First part of this book presents advances of Dezert Smarandache Theory DSMT which is becoming one of the most comprehensive and flexible fusion theory based on belief functions It can work in all fusion spaces power set hyper power set and super power set and has various fusion and conditioning rules that can be applied depending on each application Some new generalized rules are introduced in this volume with codes for implementing some of them For the qualitative fusion the DSMT Field and Linear Algebra of Refined Labels FLARL is proposed which can convert any numerical fusion rule to a qualitative fusion rule When one needs to work on a refined frame of discernment the refinement is done using Smarandache's algebraic codification New interpretations and implementations of the fusion rules based on sampling techniques and referee functions are proposed including the probabilistic proportional conflict redistribution rule A new probabilistic transformation of mass of belief is also presented which outperforms the classical pignistic transformation in term of probabilistic information content The second part of the book presents applications of DSMT in target tracking in satellite image fusion in snow avalanche risk assessment in multi biometric match score fusion in assessment of an attribute information retrieved based on the sensor data or human originated information in sensor management in automatic goal allocation for a planetary rover in computer aided medical diagnosis in multiple camera fusion for tracking objects on ground plane in object identification in fusion of Electronic Support Measures allegiance report in map regenerating forest stands etc

Advances and Applications of DSMT for Information Fusion (Collected works), second volume Florentin Smarandache, Jean Dezert, 2006-01-01 This second volume dedicated to Dezert Smarandache Theory DSMT in Information Fusion brings in new fusion quantitative rules such as the PCR1 6 where PCR5 for two sources does the most mathematically exact redistribution of conflicting masses to the non empty sets in the fusion literature qualitative fusion rules and the Belief Conditioning Rule BCR which is different from the classical conditioning rule used by the fusion community working with the Mathematical Theory of Evidence Other fusion rules are constructed based on T norm and T conorm hence using fuzzy logic and fuzzy set in information fusion or more general fusion rules based on N norm and N conorm hence using neutrosophic logic and neutrosophic set in information fusion and an attempt to unify the fusion rules and fusion theories The known fusion rules are extended from the power set to the hyper power set and comparison between rules are made on many examples One defines the degree of intersection of two sets degree of union of two sets and degree of inclusion of two sets which all help in improving the all existing fusion rules as well as the credibility plausibility and communality functions The book chapters are written by Frederic Dambreville Milan Daniel Jean Dezert Pascal Djiknavorian Dominic Grenier Xinhan

Agent-Mediated Electronic Commerce V Peyman Faratin, David C. Parkes, Juan A. Rodríguez-Aguilar, William E. Walsh, 2004-10-18 This book constitutes the thoroughly refereed post proceedings of the 5th International Workshop on Agent Mediated Electronic Commerce AMEC 2003 held in Melbourne Australia in July 2003 as part of AAMAS 2003 The 9 revised full papers presented were carefully selected from 22 submissions during two rounds of reviewing and revision The papers are organized in topical sections on automated negotiation systems and mechanism design and multi agent markets

Fusion of imprecise qualitative information Xinde Li, Xianzhong Dai, Jean Dezert, Florentin Smarandache, In this paper we present a new 2 tuple linguistic representation model i.e. Distribution Function Model DFM for combining imprecise qualitative information using fusion rules drawn from Dezert Smarandache Theory DSMT framework **Uncertainty in Artificial Intelligence** MKP, 2014-06-28 Uncertainty Proceedings 1994 **Advances in Intelligent Computing - IPMU '94** Bernadette Bouchon-Meunier, Ronald R. Yager, Lotfi A. Zadeh, 1995-06-26 This book presents a topical selection of full refereed research papers presented during the 5th International Conference on Information Processing and Management of Uncertainty in Knowledge Based Systems IPMU 94 held in Paris France in July 1994 The topical focus is on the role of uncertainty in the construction of intelligent computing systems and it is shown how the concepts of AI neural networks and fuzzy logic can be utilized for that purpose In total there are presented 63 thoroughly revised papers organized in sections on fundamental issues theory of evidence networks probabilistic statistical and informational methods possibility theory logics chaos reusability and applications **Advances and Challenges in Multisensor Data and Information Processing** Eric

Lefebvre,2007 Information fusion resulting from multi source processing often called multisensor data fusion when sensors are the main sources of information is a relatively young less than 20 years technology domain It provides techniques and methods for Integrating data from multiple sources and using the complementarity of this data to derive maximum information about the phenomenon being observed Analyzing and deriving the meaning of these observations Selecting the best course of action and Controlling the actions Various sensors have been designed to detect some specific phenomena but not others Data fusion applications can combine synergically information from many sensors including data provided by satellites and contextual and encyclopedic knowledge to provide enhanced ability to detect and recognize anomalies in the environment compared with conventional means Data fusion is an integral part of multisensor processing but it can also be applied to fuse non sensor information geopolitical intelligence etc to provide decision support for a timely and effective situation and threat assessment One special field of application for data fusion is satellite imagery which can provide extensive information over a wide area of the electromagnetic spectrum using several types of sensors Visible Infra Red IR Thermal IR Radar Synthetic Aperture Radar SAR Polarimetric SAR PolSAR Hyperspectral Satellite imagery provides the coverage rate needed to identify and monitor human activities from agricultural practices land use crop types identification to defence related surveillance land sea target detection and classification By acquiring remotely sensed imagery over earth regions that land sensors cannot access valuable information can be gathered for the defence against terrorism This books deals with the following research areas Target recognition classification and tracking Sensor systems Image processing Remote sensing and remote control Belief functions theory and Situation assessment

Combination of Qualitative Information with 2-Tuple Linguistic Representation in Dezert-Smarandache Theory Xin-De Li,Florentin

Smarandache,Jean Dezert, Xian-Zhong Dai, Modern systems for information retrieval fusion and management need to deal more and more with information coming from human experts usually expressed qualitatively in natural language with linguistic labels **Knowledge Potential Measurement and Uncertainty** Kerstin Fink,2012-12-06 Kerstin Fink discusses the two mainstream measurement fields the cognitive science approach and the management approach She develops the knowledge potential view which is determined by nine key measurement variables i e content culture networking organizational knowledge learning and training customer and competitor knowledge and knowledge management systems

Representing Uncertain Knowledge Paul Krause,Dominic Clark,2012-12-06 The representation of uncertainty is a central issue in Artificial Intelligence AI and is being addressed in many different ways Each approach has its proponents and each has had its detractors However there is now an in creasing move towards the belief that an eclectic approach is required to represent and reason under the many facets of uncertainty We believe that the time is ripe for a wide ranging yet accessible survey of the main for malisms In this book we offer a broad perspective on uncertainty and approach es to managing uncertainty Rather than provide a daunting mass of techni cal detail we have focused on the foundations and intuitions

behind the various schools The aim has been to present in one volume an overview of the major issues and decisions to be made in representing uncertain knowledge We identify the central role of managing uncertainty to AI and Expert Systems and provide a comprehensive introduction to the different aspects of uncertainty We then describe the rationales advantages and limitations of the major approaches that have been taken using illustrative examples The book ends with a review of the lessons learned and current research directions in the field The intended readership will include researchers and practitioners involved in the design and implementation of Decision Support Systems Expert Systems other Knowledge Based Systems and in Cognitive Science
