What about me personally What is my place Why am I here Coming from the East this Western physicist offers a rare hybrid view on such topics as Perception in yoga and physics The moral responsibility of scientific power Science as a spiritual path Healing the soul truth love and God Each of us is an artist of our own life Ravindra says Starting from the raw material of our self we sculpt something which corresponds to our aspirations our understanding our skill and sensitivity This work of transformation is an imperative of our human existence      **The Psychology of Scientific Inquiry** Aaro

Toomela,2019-11-05 This brief sets out on a course to distinguish three main kinds of thought that underlie scientific thinking Current science has not agreed on an understanding of what exactly the aim of science actually is how to understand scientific knowledge and how such knowledge can be achieved Furthermore no science today also explicitly admits the fact that knowledge can be constructed in different ways and therefore every scientist should be able to recognize the form of thought that under girds their understanding of scientific theory In response to this this texts seeks to answer the questions What is science What is scientific explanation What is causality and why it matters Science is a way to find new knowledge The way we think about the world constrains the aspects of it we can understand Scientists the author suggests should engage in a metacognitive perspective on scientific theory that reflects not only what exists in the world but also the way the scientist thinks about the world      **The Chemical News and Journal of Industrial Science** ,1913      *Handbook of Research on Science Education, Volume II* Norman G.
