## **CHAPTER 5 QUALITY CONTROL AND QUALITY ASSURANCE**

### **5.1 QUALITY CONTROL and QUALITY ASSURANCE**

Quality Control and Quality Assurance are integrated into all aspects of bridge inspection. They contain the essential requirements to demonstrate that care, skill and diligence is used in the preparation of bridge inspection reports.

The Bridge Inspection Unit will put in place those management tools needed to define, implement, and evaluate the effectiveness of the Unit, to provide feedback for performance enhancement and institute actions to prevent recurrence. Together these activities ensure that:

- Personnel have the appropriate tools and information available to perform the work
- Personnel have clearly defined programs, processes, and procedures as a basis to perform their work
- Personnel are sufficiently trained to assure good work performance
- Appropriate management oversight is provided for work performance to identify and correct problems if they exist

Quality Control is the checks necessary to maintain a uniform level of quality. For the purposes of this Chapter, the District Bridge Inspection Engineer (DBIE) is the Quality Control Engineer who performs these checks.

Quality Assurance is an independent evaluation of a service (i.e., an inspection) to establish that a pre-described level of quality has been met. For the purposes of this Chapter, the Area Bridge Inspection Engineers (ABIE) and the Underwater Operations Engineer are the Quality Assurance Engineers who perform these evaluations. The Quality Assurance Supervisor is the Bridge Inspection Engineer (BIE).

The review for the Quality Control and Quality Assurance program shall include the Bridge Inspection Engineer, the Area Bridge Inspection Engineer, Underwater Operations Engineer and the District Bridge Inspection Engineer.

**Note:** At the discretion of the Bridge Inspection Engineer others within the MassDOT staff and/or Consultants may be designated to assist in reviewing material.

### **5.2 QUALITY CONTROL ENGINEER**

The Quality Control Engineer's responsibilities include but are not limited to the review of the inspection reports, review of the inspection methods by the teams in field and the review of structures that are classified as structurally deficient (SD) by the Team Leaders.

#### **5.2.1 Inspection Report Evaluations**

The Quality Control Engineer and his/her assistant shall collectively review 100% of all inspection reports. The DBIE or ADBIE will sign all inspection reports reviewed by him/her. This review will be
