Quality And Equality:

Equal Educational Opportunity United States. Congress. Senate. Select Committee on Equal Educational Opportunity, 1970 Multidisciplinary Research Perspectives in Education Indika Liyanage, Badeng Nima, 2016-07-27 The editors of this extraordinary book Indika Liyanage and Badeng Nima have brought together a wonderfully wide ranging collection of chapters The breadth and depth of the studies of education issues in China and Australia are impressive The topics encompass important questions concerning education policies curricula pedagogy equality parental engagement cultural heritage and anti drug education The scope of the book includes Chinese and Australian settings that range from kindergartens to higher education and from rural to urban environments The diversity of the book strengthens rather than weakens its coherence because the golden thread running through all the chapters is a portrayal of the complexity of education provision when global national and local forces interact Written by academics with hands on experience the chapters provide evidence based discussions of practical conundrums enriched by the sophisticated use of interdisciplinary approaches As a result this book is powerful challenging and ground breaking Bob Adamson UNESCO Chairholder in TVET and Lifelong Learning Education University of Hong Kong *Simultaneous Identities* Uma Pradhan, 2020-12-03 The recent socio political changes in Nepal have brought assimilationist notions of Nepali nationalism under a tight scrutiny and drawn attention to more plural inclusive and diverse notions of Nepaliness However both assimilationist and pluralist visions continue to remain normative in their approach and often posit ethnic and national identity in opposition to each other Drawing on the everyday practices in the two schools this book illustrates that social actors in minority language education did not necessarily select between minority identity and national identity but instead made simultaneous claims to more than one social identity by discursively positioning ethnic identity as national identity It builds on the notion of simultaneity to illustrate that it is through the unresolved co presences of apparently contradictory ways that people maintain their multi layered identities By arguing for an analytical necessity to adopt relational approach it aims to complicate the neat compartmentalisation of identities Introduction to Quality and Safety Education for Nurses Carolyn Christie-McAuliffe, PhD, FNP, 2014-03-14 Print CourseSmart **State**, 1988 Hearings, Reports and Prints of the Senate Select Committee on Equal Educational Opportunity United States. Third World Education Anthony R. Welch, 2002-05-03 This book debunks the argument that quality in education can only be achieved by limiting or trading off equality The quality of schooling is a major issue for Third World nations across the globe However there is no single measure which is universally accepted Whether it is as some economists might argue an issue of the number of desks per classroom or one of national sovereignty is widely disputed Defining equality in education becomes increasingly difficult in an era of globalization in which there exists a wide gap between rich and poor both within and between nations In the context of an international move towards New Right politics and neo liberal economic ideologies both the quality and equality of education are imperiled This

book argues that any worthy definition of quality education must include the interests and participation of the underprivileged
