Whenever I step into an aeroplane I cannot avoid considering the risks associated with flying Thoughts of mechanical failure pilot error and terrorist action fill my mind I try to reassure myself with statistics which tell me there is greater chance of injury crossing the road The moment the plane takes off I am resigned to my fate placing faith in pilots who are highly qualified and superbly trained for the task of delivering me safely to my destination To be a passenger in an aeroplane is to express faith in the systems used by the airline It is to express a faith in the quality of the airline's organisation and the people who work within it The same is true of surgery Thoughts of mortality are difficult to avoid when facing the surgeon's knife However faith in the surgeon's training and skill faith in the anaesthetist and theatre technicians faith in the efficient resources and quality of the hospital all help to convince that there is little need to worry Apart from flying and surgery there are many facets of life which entail risk but knowing the risks we willingly place our confidence in others to deliver us safely In the consumption of food however few of us consider the risks Everyday if we are fortunate we eat food Food sustains and gives us pleasure Food supports our social interactions **MDD Compliance Using Quality Management Techniques**

Ray Tricker, 2012-04-27 The Medical Devices Directive MDD is an all encompassing document legislating for the manufacture of any medical device or material used either temporarily or permanently on or in the human body To achieve its main objectives the MDD requires the manufacturer of all products covered by the Directive to possess a fully auditable Quality Management System consisting of Quality Policies Quality Procedures and Work Instructions based on the ISO 9000 standard The book is based on the sound principles of ISO 9000 and will guide the reader if required to eventually set up an ISO 9000 fully compliant system MDD Compliance using Quality Management Techniques consists of the following A brief guide to the Medical Devices Directive explaining the main requirements of the directive translating legal Europeak into everyday language An overview of ISO 9000 and how the MDD links in with these international requirements A Quality Manual will provide a template for a complete Quality Management System that can be used by any product being produced under the requirements of the MDD CD ROM containing a software copy of the Quality Manual A User manual consisting of clear instructions and flow charts on how to set up and use the Quality Management System described in the Quality Manual
