## Quality Of Growth:

*The Quality of Growth in Africa* Akbar Noman, Joseph E. Stiglitz, Ravi Kanbur, 2019-08-20 In recent years concerns about the outcomes and nature of economic growth have given way to a new emphasis on its quality This volume brings together prominent international contributors to consider a range of interrelated questions concerning the quality of growth in Africa with a primary focus on sub Saharan countries Contributors discuss the measurement of growth the transformations necessary to sustain it and issues around equity and well being They consider topics such as the distribution of income gains from growth the extent to which economic growth has resulted in improvements in employment poverty and security structural transformations of the economy and diversification of the sources of growth environmental sustainability and management of urbanization Offering both diagnoses and prescriptions *The Quality of Growth in Africa* helps envision a future that goes beyond increasing GDP to ensuring that growth translates into advancements in well being Although the book focuses on sub Saharan Africa much of the contributors incisive analysis has implications for countries outside the region

**A Quality of Growth Index for Developing Countries** Mr. Montfort Mlachila, Rene Tapsoba, Mr. Sampawende J.-A. Tapsoba, 2014-09-16 This paper proposes a new quality of growth index QGI for developing countries The index encompasses both the intrinsic nature and social dimensions of growth and is computed for over 90 countries for the period 1990 2011 The approach is premised on the fact that not all growth is created equal in terms of social outcomes and that it does matter how one reaches from one level of income to another for various theoretical and empirical reasons The paper finds that the quality of growth has been improving in the vast majority of developing countries over the past two decades although the rate of convergence is relatively slow At the same time there are considerable cross country variations across income levels and regions Finally empirical investigations point to the fact that main factors of the quality of growth are political stability public pro poor spending macroeconomic stability financial development institutional quality and external factors such as FDI

Time, Quality and Growth , *SDGs, Transformation, and Quality Growth* Akio Hosono, 2022-03-01 This is an Open Access book The primary objective of this book is to seek out insights into the concept of high quality growth HQG It explores the essential attributes of HQG such as inclusiveness sustainability and resilience as well as its relationship with transformation by drawing principally on illustrative cases and instances of international cooperation The United Nations document on Sustainable Development Goals SDGs states that We resolve to create conditions for sustainable inclusive and sustained economic growth shared prosperity and decent work for all As such the concept of quality growth is inherent in many aspects of the SDGs A similar approach can be seen in the Development Cooperation Charter announced by the Japanese government in 2015 According to the Charter one of the most important challenges of development is quality growth and the reduction of poverty achieved through such growth The approach in the Charter emphasizes inclusiveness sustainability and resilience This volume is a pioneering study on quality growth as well as its relationship with SDGs and

transformation Comprehensive studies on quality growth are very few The case study approach distinguishes the present volume from some previous literature that discussed quality growth within the framework of general policy Instead in this book concrete cases and experiences provide insights into hands on ingredients Through the case studies it can be seen more clearly that transformation and quality growth are phenomena that do not occur automatically but rather ones that require specific properly designed strategies and approaches Another unique feature of this book is that it aims to make explicit some of the consistent but implicit principles of Japan s international cooperation

*Income Distribution and High-quality Growth* Vito Tanzi, Ke-young Chu, 1998 The contributors argue that there need not be a trade off between growth and equity in the long run However attempts by government to influence income distribution through large scale tax and transfer programs can have a negative impact on growth The contrast is vivid While the majority of people in the industrial world and some in the developing world enjoy unprecedented affluence a far greater number of people in the low income countries live in abject poverty Although several developing countries are achieving rapid economic growth and poverty reduction most formerly centrally planned countries are struggling to implement market oriented reforms in the midst of economic deterioration and rising poverty The paramount importance of reducing poverty worldwide is forcing economists and policymakers to look at how income distribution and economic growth interact The essays in this volume grew out of a 1995 conference sponsored by the International Monetary Fund The contributors are scholars and policymakers from academic institutions governments and international organizations The questions discussed include How does income distribution interact with economic growth in the short run and the long run To what extent can government use transfer programs to increase the incomes of the poor How can government use social programs to help the poor increase their income earning capacity Does distributional inequality create an obstacle to long term poverty reduction Alternatively is distributional inequality a necessary means of achieving economic growth Generally the contributors agree that there need not be a trade off between growth and equity in the long run However attempts by government to influence income distribution through large scale tax and transfer programs can have a negative impact on growth
