The book *Quality of Work Life A Comprehensive Study* is written in the context of changing and emerging workplace realities. More than a decade has passed since the phrase quality of work life QWL was first introduced. During this period QWL has been the subject of many academic papers, experiments in different settings and recently increased interest among managers and the popular press. This book also presents the new reality that QWL is the shared responsibility not only for the management and workers but also the union leaders, government officials and behavioral scientists. QWL must change continually and go forward from initial problem solving to an actual partnership between management and workers. The content and the elements of the book would encourage the students to relate their own knowledge and experiences to the text.

Teachers are the pillars of education. The education system can excel with its effective measures only by the effective performance of teachers. If the teachers are inefficient and indifferent, no educational institution even with an excellent infrastructure and a good curriculum can achieve its goal. Teachers not only inculcate the various subjects of study into students but they also mould a quality generation for the nation. According to the American Commission on Teacher Education 1974, the quality of a nation depends upon the quality of its citizens and the quality of its citizens depends upon the quality of their teachers. Teachers are the ones who contribute to the social reconstruction of the country. They play a crucial role not as a mere transmitter of knowledge and culture but as a changing agent. Our former president and eminent educationist Dr. S. Radhakrishnan says, "Teachers place in society is of vital importance."

Quality of Work Life is re-emerging where employees are seeking out more meaning. QWL has different meanings for different people. While some consider it industrial democracy or co-determination with increased employee participation in the decision-making process, for others, particularly managers and administrators, the term denotes improvement in the psychological aspects of work to improve productivity.
