**Quality Protein Maize** International Symposium on Quality Protein Maize. Proceedings, 1994 *Quality Protein Maize* Edwin Theodore Mertz, 1992 **Breeding Quality Protein Maize (QPM)**, 2008 Quality Protein Maize Under Stress Environments Claver Ngaboyisonga, 2012-05 The development of Quality Protein Maize QPM with high levels of lysine and tryptophan in grain has opened ways of using maize to supply the two essential amino acids Being developed by combining the genetic system of opaque 2 gene and o2 endosperm modifiers it was not well understood how nitrogen and water deficiencies could affect its characteristics This study was undertaken to know the influence of N and water stresses on gene action and the effects of genotypes x environments interaction in QPM It was found that N and water deficiencies influenced the gene action and suppressed the action of o2 endosperm modifiers making QPM to revert partially or totally to o2 maize state This may have negative consequences on cultivation of QPM in nitrogen and water stress prone regions

Vasal, International Food Policy Research Institute, 1999 This paper is intended to present a critique of various aspects of protein related nutritional improvements in maize Earlier efforts and difficulties in developing germplasm products that failed to meet expectations and lacked agronomic performance and acceptance at the farmer's level will be discussed Sequence of events will be presented that led to choosing an option and a strategy that turned out to be successful and has proved viable in developing a speciality corn type which is referred to as Quality Protein Maize QPM **Plant Breeding Reviews, Volume 34** Jules Janick, 2011-01-04 Plant Breeding Reviews presents state of the art reviews on plant breeding and genetics covering horticultural agronomic and forestry crops incorporating both traditional and molecular methods The contributions are authored by world authorities anonymously reviewed and edited by Professor Jules Janick of Purdue University USA The series is an indispensable resource for crop breeders plant scientists and teachers involved in crop improvement and genetic resources **Maize: Nutrition Dynamics and Novel Uses** Dharam Paul Chaudhary, Sandeep Kumar, Sapna Langyan, 2013-12-03 Maize is a globally important crop mainly utilized as feed food and raw material for diverse industrial applications Among cereals it occupies third place after rice and wheat and is a staple food for a large segment of population worldwide particularly in the Asian as well as African countries This monogram discusses various aspects of nutritional quality of maize such as quality protein maize which has been considered as most significant discovery in enhancing nutritional quality of cereals in terms of increasing the concentration of essential amino acids The biochemistry of starch which is an important industrial product of maize has been discussed in detail Further the role of maize oil which is highly regarded for human consumption as it reduces the blood cholesterol concentration has also been elaborated Naturally maize is a rich source of carotenoids such as beta carotene zeaxanthin lutein cryptoxanthin which have highly diverse health benefits ranging from maintaining normal vision to lowering of oxidative stress The need for biofortification of maize for provitamin A carotenoids and their role in

alleviating vision impairments have also been discussed The effect of various biotic and abiotic stresses particularly carbon dioxide and temperature on quality has been discussed thoroughly Many value added products as well as fermented foods that have been produced from maize which is consumed in different forms worldwide are also discussed The aspects related to the maize application as fodder and as a source of malting have also been covered concisely Overall the book provides complete information about various quality aspects of maize The various stakeholders such as maize researchers extension specialists students teachers as well as farmers will be immensely benefitted from this monogram

**Quality Breeding in Field Crops** Asif M. Iqbal Qureshi,Zahoor Ahmad Dar,Shabir Hussain Wani,2019-02-15 Development of superior crops that have consistent performance in quality and in quantity has not received the same emphasis in the field of genetics and breeding as merited Specialty trait requires special focus to propagate Yet basic germplasm and breeding methodologies optimized to improve crops are often applied in the development of improved specialty types However because of the standards required for specialty traits methods of development and improvement are usually more complex than those for common commodity crops The same standards of performance are desired but the genetics of the specialty traits often impose breeding criteria distinct from those of non specialty possessing crops Specifically quality improvement programs have unique characteristics that require careful handling and monitoring during their development for specific needs Adding value either via alternative products from the large volumes of grain produced or development of specialty types is of interest to producers and processors This work assimilates the most topical results about quality improvement with contemporary plant breeding approaches The objective of this book is to provide a summary of the germplasm methods of development and specific problems involved for quality breeding In total fourteen chapters written by leading scientists involved in crop improvement research provide comprehensive coverage of the major factors impacting specialty crop improvement
