ranks high against all the criteria which sophisticated consumers now use to evaluate the things they buy If you agree with the argument that a company is much more likely to produce high quality if all departments are motivated to achieve high quality results then you already have a good understanding of the basic principles of Total Quality Management TQM But TQM is not a quick fix or a magic cure It is a management technique designed to involve all parts of the business in the pursuit of and commitment to the highest quality result By involving everyone from the Chief Executive to the most junior employee in the company s objectives in a way which means something in their particular job the company is well on the way to achieving the best results its workforce can achieve *Total Quality Management* C.
