Quality Assurance In Adhesive Technology:

Quality Assurance in Adhesive Technology A W Espie, J H Rogerson, 1998-03-24 *Quality Assurance in Adhesive Technology* presents a unique collaboration between the Center for Adhesive Technology of TWI Cambridge Cranfield University UK the Department of Trade and Industry and UK industrial participants The project identified that the highlighting of design and production issues during very early design stages enabled potential areas of difficulty to be recognized and avoided To achieve this a quality assurance model was developed to analyze the issues needing to be addressed well before a component reaches the production stage In addition to the book *Quality Assurance* associated software features flexible menu selection which will help users to customize the model to any particular manufacturing requirement and achieve higher levels of reliability in their adhesive bonding processes

Quality Assurance in Adhesive Technology A W Espie, J H Rogerson, K Ebtahaj, 1998-01-01 This special report with user friendly software has been produced following a collaboration between the Centre for Adhesives technology at TWI Cranfield University and the DTI The three year project identified that highlighting design and production issue during very early stages of design enabled potential problem areas to be recognised and avoided The team have therefore developed a generic quality assurance model to pinpoint the issues needing to be addressed well before a component reaches the production stage The software is extremely user friendly and comes with a flexible menu selection which enables the model to be customised to particular manufacturing requirements It will be widely welcomed by designers and engineers involved with any products using adhesives or sealants
