Hammer, Lant Pritchett, 1998 Economic Analysis for Health Projects Jeffrey Shantayanan Hammer, 2003 Le financement de la santé dans les pays d'Afrique et d'Asie à faible revenu, 2003-01-01 Les conceptions et les politiques en matière de financement de la santé dans les pays à faible revenu s'articulent autour de paradigmes successivement dominants dans les approches des gouvernements et de leurs partenaires extérieurs la gratuité des soins de base et la santé pour tous dans la lignée de la conférence d'Alma Ata tout d'abord la contribution financière des usagers recouvrement des coûts partir de la seconde moitié des années quatre-vingt Plus récemment l'accent a été mis sur le développement de mécanismes assuranciers tout en approfondissant et en reconsidérant la réflexion sur la gratuité des soins et sur la participation financière des populations Dans cette perspective cet ouvrage a voulu confronter des travaux théoriques et appliqués sur une sélection de grandes questions soulevées par le financement de la santé Il analyse des expériences et des politiques conduites en ces domaines dans plusieurs pays d'Afrique et d'Asie à faible revenu Le livre est structuré autour de trois parties La première porte sur les déterminants de l'accès aux soins sur l'équité et la protection des plus pauvres questions principalement abordées sous l'angle des effets de la contribution financière des usagers La seconde traite des approches plurielles qui se développent en matière de mécanismes d'assurance notamment dans le secteur informel La troisième s'interroge sur les relations entre le financement et la régulation des systèmes de santé en considérant différentes problématiques qui mettent en relief l'importance des institutions et plus globalement des choix publics rejoignant ainsi des orientations majeures de la réflexion économique contemporaine Managing the Quality of Health Care in Developing Countries Willy De Geyndt, 1995 World Bank Technical Paper No 258 Quality of health care is a complex concept interwoven with value judgments about what constitutes good quality This lack of linearity partly explains the large number of definitions of the concept of quality and *Challenging El Salvador's Rural Health Care Strategy* Maureen A. Lewis, Gunnar S. Eskeland, Ximena Traa-Valerezo, 1999 Low skilled health promoters posted in rural villages are doing little to improve health or health seeking behaviors In a supply driven system such workers have too few incentives too little knowledge and too little supervision Results can be improved without increasing costs **Costing of Health Care Services in Developing Countries** Steffen Fleßa, 2009 The process of health care reforms must be based on demographic epidemiological and economic evidence if it is to achieve the fundamental target of affordable sustainable and efficient health care services for the entire population Consequently costing of health care services has become a frequently used element of health care reforms This book presents the essentials of costing in a health economic framework and gives examples from successful costing studies done by the author in Tanzania Vietnam and Burkina Faso Based on these examples it demonstrates the importance of costing information for the planning and decision making process in the field of budgeting resource allocation

Additionally, the handbook extends the Post 2015 Development Agenda and it emphasizes the importance of the agricultural sector as it is closely related to the issues of food sustainability, poverty reduction and employment creation. The contributors suggest multiple evidence-based policies to develop the rural areas through the transformation of the agricultural sector which can significantly benefit the African continent. *Health Research in Developing Countries* Heiko Becher, Bocar Kouyaté, 2005-12-27 Health research in developing countries has many facets. On one side, malaria and AIDS as main causes of morbidity and mortality are a focus for clinical and epidemiological studies. On the other side, the need for improving the health care system in general cannot be overestimated. The book offers a survey of current and important topics of health research in developing countries. Special emphasis is placed to show that cooperation of different health research areas is of highest importance in the future. In addition, the CRSN Burkina Faso University of Heidelberg collaboration is given as a model that allows high class research in remote areas of any developing country. An absolute must for all who are working in clinical, epidemiological and health systems research for and in developing countries.
