Guidelines Development Committee,2000 *Recommended Seismic Evaluation and Upgrade Criteria for Existing Welded Steel Moment-Frame Buildings (FEMA 351)* Federal Emergency Agency,2013-03-16 This report FEMA 351 *Recommended Seismic Evaluation and Upgrade Criteria for Existing Welded Steel Moment Frame Buildings* has been developed by the SAC Joint Venture under contract to the Federal Emergency Management Agency FEMA to provide structural engineers with recommended criteria for evaluation of the probable performance of existing steel moment frame buildings in future earthquakes and to provide a basis for updating and revision of evaluation and rehabilitation guidelines and standards It is

one of a series of companion publications addressing the issue of the seismic performance of steel moment frame buildings. The set of companion publications includes FEMA 350 Recommended Seismic Design Criteria for New Steel Moment Frame Buildings. This publication provides recommended criteria supplemental to FEMA 302 1997 NEHRP Recommended Provisions for Seismic Regulations for New Buildings and Other Structures for the design and construction of steel moment frame buildings and provides alternative performance based design criteria. FEMA 351 Recommended Seismic Evaluation and Upgrade Criteria for Existing Welded Steel Moment Frame Buildings. This publication provides recommended methods to evaluate the probable performance of existing steel moment frame buildings in future earthquakes and to retrofit these buildings for improved performance. FEMA 352 Recommended Postearthquake Evaluation and Repair Criteria for Welded Steel Moment Frame Buildings. This publication provides recommendations for performing postearthquake inspections to detect damage in steel moment frame buildings following an earthquake, evaluating the damaged buildings to determine their safety in the postearthquake environment and repairing damaged buildings. FEMA 353 Recommended Specifications and Quality Assurance Guidelines for Steel Moment Frame Construction for Seismic Applications. This publication provides recommended specifications for the fabrication and erection of steel moment frames for seismic applications. The recommended design criteria contained in the other companion documents are based on the material and workmanship standards contained in this document, which also includes discussion of the basis for the quality control and quality assurance criteria contained in the recommended specifications. The information contained in these recommended evaluation and upgrade criteria hereinafter referred to as Recommended Criteria is presented in the form of specific recommendations for design and performance evaluation procedures together with supporting commentary explaining part of the basis for these recommendations.

Advanced Welding Technologies Sandip Kumar, Gurudas Mandal, 2025-04-04. *Advanced Welding Technologies* serves as a vital resource that transforms the perception of welding from a mere skill based practice to a cutting edge industrial method offering comprehensive insights into its fundamental processes, research advancements and diverse applications across technological and biomedical domains. Welding has traditionally been considered more of a skill based proficiency than a technological industrial method. The reliance on highly trained human operators along with the high cost and low reproducibility of many welding processes has contributed to this perception. Extensive research has now been conducted on the fundamentals of welding processes and while it remains a complex multidisciplinary subject, the basic concepts are well understood. *Advanced Welding Technologies* is a comprehensive collection of the processes and applications of advanced welding technologies giving a basic understanding of each process, research advancements and their applications in various technological and biomedical domains for improving machining accuracy and quality. This volume will extend the possibilities of research in various areas of advanced welding technologies with basic and hybrid approaches making it an easy reference for students and researchers working in this critical field. Readers will find the book

Covers technologies for successful improvement in advanced processes and the application of advanced welding technologies
Serves as a valuable reference to students and researchers involved in working with advanced welding technologies
Discusses successful fabrication of multipurpose advanced welding technologies sustainability of advanced welding technologies materials and processes applications of machine learning in advanced welding technologies and future scopes and challenges of advanced welding technologies Audience Engineers welders researchers academics and students involved in advanced welding technologies manufacturing and materials science Recommended Seismic Design Criteria for New Steel Moment-frame Buildings SAC Joint Venture.
