Levesque,2018-01-12 Between the Revolution and the Civil War non slave black Americans existed in the no man s land between slavery and freedom The two generations defined by these two titanic struggles for national survival saw black Bostonians struggle to make real the quintessential values of individual freedom and equality promised by the Revolution Levesque s richly detailed study fills a significant void in our understanding of the formative years of black life in urban America Black culture Levesque argues was both more and less than separation and integration Poised between an occasionally benevolent sometimes hostile frequently indifferent white world and their own community black Americans were in effect suspended between two cultures      Beyond the Founders Jeffrey L. Pasley,Andrew Whitmore Robertson,David Waldstreicher,2004 In pursuit of a more sophisticated and inclusive American history the contributors to *Beyond the Founders* propose new directions for the study of the political history of the republic before 1830 In ways formal and informal symbolic and tactile      **A Companion to Women's Military History** Barton Hacker,Margaret Vining,2012-08-17 This volume addresses the changing relationships between women and armed forces from antiquity to the present eight chapters review the existing literature an extended picture essay visually documents women s military work and eight chapters illustrate more restricted topics      *Imagined Histories* Anthony Molho,Gordon S. Wood,2018-06-05 This collection of essays by twenty one distinguished American historians reflects on a peculiarly American way of imagining the past At a time when history writing has changed dramatically the authors discuss the birth and evolution of historiography in this country from its origins in the late nineteenth century through its present more cosmopolitan character In the book s first part concerning recent historiography are chapters on exceptionalism gender economic history social theory race and immigration and multiculturalism Authors are Daniel Rodgers Linda Kerber Naomi Lamoreaux Dorothy Ross Thomas Holt and Philip Gleason The three American centuries are discussed in the second part with chapters by Gordon Wood George Fredrickson and James Patterson The third part is a chronological survey of non American histories including that of Western civilization ancient history the middle ages early modern and modern Europe Russia and Asia Contributors are Eugen Weber Richard Saller Gabrielle Spiegel Anthony Molho Philip Benedict Richard Kagan Keith Baker Joseph Zizak Volker Berghahn Charles Maier Martin Malia and Carol Gluck Together these scholars reveal the unique perspective American historians have brought to the past of their own nation as well as that of the world Formerly writing from a conviction that America had a singular destiny American historians have gradually come to share viewpoints of historians in other countries about which they write The result is the virtual disappearance of what was a distinctive American voice That voice is the subject of this book

*Explaining the History of American Foreign Relations* Frank Costigliola,Michael J. Hogan,2016-03-09 This volume presents substantially revised and new essays on methodology and approaches in foreign and international relations history

**Hardscrabble Frontier** Gene W. Boyett,1990 This study of Pope County Arkansas in the 1850s represents an analysis of

the pioneer decade of an upper South region largely settled by yeoman farmers the presence of slaves constituting approximately ten percent of the population also enables one to view that peculiar institution in a non plantation environment As we celebrate the century mark of the 1890 census which inspired Frederick Jackson Turner s study of the influence of the frontier on the American experience historians turn anew to examine the influence of that frontier Today insights provided by computer assisted quantification thick description of social anthropologists and the concept of the New Social History shed additional light on that quest for meaning This study is a first rate example of the New Social History in practice Contents The Beginnings Communications and Transportation Agriculture Table Fare Artisans Business and Professional Activities Disorder and Crimes Morbidity Mortality Marriage We are Family Education Religion Slavery and Moving In Moving Out

The Third Electoral System, 1853-1892 Paul Kleppner, 2017-10-10 This analysis of the contours and social bases of mass voting behavior in the United States over the course of the third electoral era from 1853 to 1892 provides a deep and rich understanding of the ways in which ethnoreligious values shaped party combat in the late nineteenth century It was this uniquely American mode of political confessionals that underlay the distinctive characteristics of the era s electoral universe In its exploration of the the political roles of native and immigrant ethnic and religious groups this study bridges the gap between political and social history The detailed analysis of ethnoreligious experiences values and beliefs is integrated into an explanation of the relationship between group political subcultures and partisan preferences which will be of interest to political sociologists political scientists and also political and social historians Unlike other works of this genre this book is not confined to a single description of the voting patterns of a single state or of a series of states in one geographic region but cuts across states and regions while remaining sensitive to the enormously significant ways in which political and historical context conditioned mass political behavior The author accomplishes this remarkable fusion by weaving the small patterns evident in detailed case studies into a larger overview of the electoral system The result is a unified conceptual framework that can be used to understand both American political behavior during an important era and the general preconditions of social group political consciousness Challenging in major ways the liberal rational assumptions that have

dominated political history the book provides the foundation for a synthesis of party tactics organizational practices public rhetoric and elite and mass behaviors      *Methodology and Method in History (RLE Accounting)* Lee D. Parker,Finley O. Graves,2013-12-04 This bibliography provides the reader with a comprehensive reference tool that will enhance understanding of methodological issues and enable the user to employ research methods appropriate to their subject of study It also provides accounting historians a comprehensive data base for the development of papers addressing methodological issues in an accounting history context Access to this type of resource is particularly crucial to the development of accounting history research since the number of papers dealing with methodological issues published in accounting history literature is very small Hence the references in this bibliography are drawn from the literature of general history economic and business history legal and social history and philosophy The scope and range of its contents are broad references are taken from texts as well as papers published in over 450 journals      **Harvard Guide to American History** Frank Freidel, Frank Burt Freidel, Richard K. Showman, 1974 Editions for 1954 and 1967 by O Handlin and others      *Structure, Process and Party*: Peter H. Argersinger, 2019-07-03 Challenging traditional approaches to the study of American political history the essays in this book establish the significance of the institutional framework of the electoral system and argue the importance of its interaction with political conditions      Justifying Historical Descriptions C. Behan McCullagh, 1984-10-25 In common with history all the social sciences crucially rely on descriptions of the past for their evidence But when if ever is it reasonable to regard such descriptions as true This book attempts to establish the conditions that warrant belief in historical descriptions It does so in a non technical way analysing numerous illustrations of the different kinds of argument about the past employed by historians and others The author concludes that no historical description can be finally proved and that we are only ever justified in believing them for certain practical purposes This central question has not been addressed in such a thorough and systematic manner before It draws on recent philosophy of history and will interest philosophers But the wealth of material and accessibility of the presentation will also make it very valuable for historians and other social scientists concerned with the logic of their disciplines      Sojourner in the Promised Land Jan Shipps, 2024-04-22 Infused with Jan Shipps s lively curiosity scholarly rigor and contagious fascination with a significant subculture *Sojourner in the Promised Land* presents a distinctive parallel history in which Shipps surrounds her professional writings about the Latter day Saints with an ongoing personal description of her encounters with them By combining a portrait of the dynamic evolution of contemporary Mormonism with absorbing intellectual autobiography Shipps illuminates the Mormons and at the same time shares with the reader what it has been like to be on the outside of a culture that remains both familiar and strange
