The Roles of Social Media in Education: Affective, Behavioral, and Cognitive Dimensions Hung Phu Bui, Mark Bedoya Ulla, Veronico N. Tarrayo, Chien Thang Pham, 2023-10-24 technologies in education A large body of research has attempted to measure the extent to which social media change human communication In education researchers and educators have employed social media to increase students engagement inside and outside the

classroom They have been exploring the effects of the use of social media on the learning outcome and learners beliefs and experiences However some of their endeavors are inconclusive As the effects of social media in education are context sensitive research results reflecting different contexts around the world will contribute to the literature on social media and education Student engagement in learning a growing interest in educational research is widely believed to contribute to the success of learning The contemporary literature shows that students can engage in learning affectively behaviorally and cognitively Recent studies are also interested in using technology to mediate students social and metacognitive engagement in learning As student engagement is a multidimensional area interdisciplinary studies have recently expanded their literature The use of social media to increase student engagement in learning remains underexplored *Faculty and Other Professional Staff in Institutions of Higher Education*, 1959 **Faculty and Other Professional Staff in Institutions of Higher Education** United States. Education Office, 1959 **International Educational Innovation and Public Sector Entrepreneurship** Alexander W. Wiseman, 2014-01-10 This volume in the International Perspectives on Education and Society Series focuses on the ways that social entrepreneurs innovatively contribute to the development and implementation of education worldwide **Surgical Education** Heather Fry, Roger Kneebone, 2011-08-29 Surgical Education Theorising an Emerging Domain delineates surgical as opposed to medical education as a new and emerging field of academic enquiry This reflects profound changes in healthcare training and practice on an international basis As such this book introduces examines and explores the contribution of selected concepts and theories to surgical learning and practice The first four chapters consider core facets of surgical education such as simulation while subsequent chapters take a key idea often well known in another field and examine its relevance to surgical education Of course performing invasive procedures is no longer the exclusive preserve of traditional surgeons Boundaries between surgery and the interventional specialties radiology cardiology intensive care are becoming increasingly blurred especially as technology continues to expand Changing work patterns and explosive technological development mark this out as a major growth area New educational approaches e g the use of simulation are emerging And all clinical practice is a team activity where clinicians from many specialties medicine nursing allied professions come together with shared goals For all the above groups and their patients education teaching training learning and assessment is of crucial importance Yet the unique characteristics of surgical education have not previously been addressed from an educational perspective nor have its possibilities as a new research domain been mapped The domain needs to be theorised and its epistemological foundations established There is thus both a need and a market for a definitive work in this area aimed at surgeons other clinicians non clinicians educators and others interested in this new domain **Compendium for Early Career Researchers in Mathematics Education** Gabriele Kaiser, Norma Presmeg, 2019-04-26 The purpose of this Open Access compendium written by experienced researchers in mathematics education is to serve as a resource for early career researchers in furthering their knowledge of the state of the field and

disseminating their research through publishing To accomplish this the book is split into four sections Empirical Methods Important Mathematics Education Themes Academic Writing and Academic Publishing and a section Looking Ahead The chapters are based on workshops that were presented in the Early Career Researcher Day at the 13th International Congress on Mathematical Education ICME 13 The combination of presentations on methodological approaches and theoretical perspectives shaping the field in mathematics education research as well as the strong emphasis on academic writing and publishing offered strong insight into the theoretical and empirical bases of research in mathematics education for early career researchers in this field Based on these presentations the book provides a state of the art overview of important theories from mathematics education and the broad variety of empirical approaches currently widely used in mathematics education research This compendium supports early career researchers in selecting adequate theoretical approaches and adopting the most appropriate methodological approaches for their own research Furthermore it helps early career researchers in mathematics education to avoid common pitfalls and problems while writing up their research and it provides them with an overview of the most important journals for research in mathematics education helping them to select the right venue for publishing and disseminating their work

Qualitative Research Methods in Education and Educational Technology Jerry W. Willis, 2008-10-01 *Qualitative Research Methods in Education and Educational Technology* was written for students and scholars interested in exploring the many qualitative methods developed over the last 50 years in the social sciences The book does not stop however at the boundaries of the social sciences Social scientists now consume and use research methods from many fields The rich resources of research methods and theories from both the

humanities and philosophy are also covered in this book It explains why postpositivist quantitative research should not be the only game in town and provides solid theoretical foundations beginning with the positions of Plato and Aristotle for broadening our horizons about what warrants our attention Using Aristotle s concept of phronesis the author shows why methods such as narrative research and storytelling hermeneutic inquiry literary theory philosophical inquiry and much more have important applications in education and educational technology On those foundations the author also builds a framework for doing many types of research from participatory action research to content analysis to postmodern case studies to empowerment research and philosophical inquiry He accomplishes this through a combination of original text summaries of exemplary research in education and educational technology and suggested readings that are annotated and introduced at the end of each chapter Many of these readings are available online and they extend the discussion of research methods or serve as exemplars of a particular type of educational technology research There are open ended and conceptual questions for each reading and developing your own answers to them is one way you can extend your depth of understanding about qualitative research methods in education and educational technology
