## **Quantization Of Singular Symplectic Quotients Progreb In Mathematics S:**

*Quantization of Singular Symplectic Quotients* N.P. Landsman, Markus Pflaum, Martin Schlichenmaier, 2012-12-06 This is the first exposition of the quantization theory of singular symplectic Marsden Weinstein quotients and their applications to physics The reader will acquire an introduction to the various techniques used in this area as well as an overview of the latest research approaches These involve classical differential and algebraic geometry as well as operator algebras and noncommutative geometry Thus one will be amply prepared to follow future developments in this field

**Quantization of Singular Symplectic Quotients** Nicholas P. Landsman, Markus Pflaum, Martin Schlichenmaier, 2001-01-01 **Lectures on the Geometry of Quantization** Sean Bates, Alan Weinstein, 1997 These notes are based on a course entitled Symplectic

Geometry and Geometric Quantization taught by Alan Weinstein at the University of California Berkeley fall 1992 and at the Centre Emile Borel spring 1994 The only prerequisite for the course needed is a knowledge of the basic notions from the theory of differentiable manifolds differential forms vector fields transversality etc The aim is to give students an introduction to the ideas of microlocal analysis and the related symplectic geometry with an emphasis on the role these ideas play in formalizing the transition between the mathematics of classical dynamics hamiltonian flows on symplectic manifolds and quantum mechanics unitary flows on Hilbert spaces These notes are meant to function as a guide to the literature The authors refer to other sources for many details that are omitted and can be bypassed on a first reading

**Integrability, Quantization, and Geometry: II. Quantum Theories and Algebraic Geometry** Sergey Novikov, Igor Krichever, Oleg Ogievetsky, Senya Shlosman, 2021-04-12 This book is a collection of articles written in memory of Boris Dubrovin 1950 2019 The authors express their admiration for his remarkable personality and for the contributions he made to mathematical physics For many of the authors Dubrovin was a friend colleague inspiring mentor and teacher The contributions to this collection of papers are split into two parts Integrable Systems and Quantum Theories and Algebraic Geometry reflecting the areas of main scientific interests of Dubrovin Chronologically these interests may be divided into several parts integrable systems integrable systems of hydrodynamic type WDVV equations Frobenius manifolds isomonodromy equations flat connections and quantum cohomology The articles included in the first part are more or less directly devoted to these areas primarily with the first three listed above The second part contains articles on quantum theories and algebraic geometry and is less directly connected with Dubrovin s early interests

Quantization, Poisson Brackets and Beyond Theodore Voronov, 2002 The papers in this volume are based on talks given at the 2001 Manchester Meeting of the London Mathematical Society which was followed by an international workshop on Quantization Deformations and New Homological and Categorical Methods in Mathematical Physics Focus is on the topics suggested by the title quantization in its various aspects Poisson brackets and generalizations and structures beyond this including symplectic supermanifolds operads Lie groupoids and Lie bi algebroids and algebras with n ary operations The book offers accounts of up to date results as well as

products against the distributions  $d$  since one has for some appropriate constants  $C$  the identities  $0 \leq \int \frac{1}{2} g^2 d\mu \leq C \int u^2 d\mu$  if  $u$  is even  
 $2 \leq \int \frac{1}{2} g^2 d\mu \leq C \int u^2 d\mu$  if  $u$  is even
