Higher Education: Handbook of Theory and Research J.C. Smart, 2012-12-06 To recapitulate Greeks differ from Independents and from the academy's value priorities but for the most part these differences derive from antecedent characteristics Moreover there are some grounds for speculating that these antecedent differences reflect fundamental temperamental differences extraversion and gregariousness mediated by social interaction as opposed to interaction through ideas Only to a limited degree does the Greek system appear to adversely affect the acquisition and assimilation of the academy's value priorities i.e. students as a whole Greek and Independent alike appear to become more independent liberal socially concerned and culturally sophisticated by graduation However the Greek system's effect on the behavior of Greeks is more troubling an effect largely mediated by the use and abuse of alcohol and the relative absence of direct institutional supervision Assuming the retention of the Greek system then the promotion of the academy's agenda appears dependent on an understanding and accommodation of the personal characteristics of Greeks using appropriate pedagogical methods to advance the academy's educational objectives and both educational and administrative regulatory efforts to control the use and abuse of alcohol With or without the Greek system the advancement of the academy's agenda involves these considerations since the characteristics of students as a whole encompass the characteristics emphasized among Greeks

Handbook of Intercultural Training Dan Landis, Richard W. Brislin, 2013-10-22 Handbook of Intercultural Training Volume II Issues in Training Methodology is a major attempt to describe critique and summarize the major known ways to provide cross cultural training The collection of essays discusses the stresses of intercultural encounter as well as how to reduce these This volume is divided in two parts The first part discusses context factors including stress factors in intercultural relations and aspects of organization effectiveness A cross cultural experience from the perspective of a program manager is presented as well as a situational analysis and designing a translator based training program where alternative designs are forwarded for trainers to use effectively in multicultural and multilingual environments The second part presents different methods of training Learning from sojourners and from individuals from various cultures results in different frameworks for interpreting cross cultural interactions Consultants advisors and experts may find themselves performing outside and beyond their home ground and social groups so training programs pertaining to their particular situation need to be addressed more profoundly The training

program in race relations by the U S Department of Defense is reviewed and the effects of stereotyping people are discussed and considered as other factors in the preparation of training programs English is then examined as a tool for intercultural communication where aspects of intercultural training should be integrated This book is suitable for overseas workers foreign students foreign technical advisers diplomats immigrants and many others who are going to live and work and be exposed to other cultures **Leadership Processes and Follower Self-identity** Robert G. Lord, Douglas J.

Brown, 2003-09-12 Presenting a follower centered perspective on leadership this book focuses on followers as the direct determinant of leadership effects because it is generally through follower reactions and behaviors that leadership attempts succeed or fail Therefore leadership theory needs to be articulated with a theory of how followers create meaning from leadership acts and how this meaning helps followers self regulate in specific contexts In this book an attempt is made to develop such a theory maintaining that the central construct in this process is the self identity of followers In developing this theoretical perspective the authors draw heavily from several areas of research and theory The most critical constructs do not come directly from the leadership literature but from social and cognitive theory pertaining to follower s self identity self regulatory processes motivation values cognitions and emotions and perceptions of social justice Leaders may have profound effects on these aspects of followers and it is by analyzing such indirect follower mediated leadership effects that most ideas regarding leadership theory and practice are developed Due to its broad theoretical focus this book is relevant to a number of audiences The authors principal concern is with the development of leadership theory and the practice of leadership making the book relevant to audiences in management applied psychology and social psychology They have tried to clearly define key constructs and provide practical examples so that the book could be accessible to advanced undergraduate students However the diversity of the underlying theoretical literatures and the complexity of the framework developed also make the book appropriate for graduate courses in those disciplines and for readers with a professional interest in leadership theory or practice **Global Encyclopedia of Public Administration, Public Policy, and Governance** Ali
