that person's ability to offer social support to his/her partner. The second part of the book explores what young adults think about marriage influenced by their parental relationship, how parental relationships affect children's social experience in school, how parental approaches to children affect their sibling relationship, the parental role in childhood eating disturbances, and how the family climate affects children's loneliness. All in all, the book affords a thorough review not only of what marital couple intimacy is and what can affect it, but how significant it is in affecting their children in and out of the house. The chapters in this book were originally published in the Journal of Psychology.

The Psychology of Love Thiago de Almeida, David L. Rodrigues, 2025-01-16. The topic of loving relationships is one of the most important and often problematic areas of people's lives. Unfortunately, such importance is best perceived when relationships are unsatisfactory and/or threatened by the possibility of an imminent breakup. When that happens, our mood, our ability to concentrate, our energy, our work, and our health among other dimensions of our lives can be profoundly affected. Although contemporary love life appears to be markedly different from that of predecessor generations, given the wide range of current relationships—hookup, living together, separate, cohabitation, virtual love, or even betrayal—among many other forms of loving interaction, we live in a time when relationships between two or more people seem to need more understanding and more accurate research. However, studying love scientifically is a hard task because of methodological difficulties and conceptual improprieties intrinsically related to this type of investigation. Because it can be considered such a familiar concept, many researchers should agree on what love is and how it can be measured. But this is not what occurs. After all, what is love? Is it as a psychological phenomenon capable of being scientifically studied by psychology? The goal of this Research Topic is to promote and disseminate publications related to what is conceived scientifically as the Psychology of Love, differing from conceptions related to self-help and common sense. Conceptualize love through psychological science. Systematize knowledge about the nature of love and related phenomena such as jealousy, shyness, inhibition, infidelity, and other related topics. Understand conceptualizations of love and relationship dynamics of people in monogamous and consensually non-monogamous relationships. Research the establishment and maintenance of romantic relationships and try to understand scientifically the role of love in marital satisfaction.
