Romanticism In National Context:

Romanticism in National Context Roy Porter, Mikulas Teich, 1988-05-27 Special emphasis is placed on the interplay between Romantic culture and social political and economic change in this study of the course of Romanticism in various European countries The Romantic Movement Alan Menhennet, 1981-01-01 Menhennet traces the main strands of thought and interest that preoccupy the Romantic writers the revolutionary attitude that is differentiated from that of writers like Byron by the lack of emphasis on individualism the dualism of the bourgeois world and the inner self the interest in language as an agency for the regeneration of the German spirit and the concentration on folk themes and the idea of Wanderung

The Scientific Revolution in National Context Roy Porter, 1992-09-25 The scientific revolution of the sixteenth and seventeenth century continues to command attention in historical debate Controversy still rages about the extent to which it was essentially a revolution of the mind or how far it must also be explained by wider considerations In this volume leading scholars of early modern science argue the importance of specifically national contexts for understanding the transformation in natural philosophy between Copernicus and Newton Distinct political religious cultural and linguistic formations shaped scientific interests and concerns differently in each European state and explain different levels of scientific intensity Questions of institutional development and of the transmission of scientific ideas are also addressed The emphasis upon national determinants makes this volume an interesting contribution to the study of the Scientific Revolution **The Oxford Handbook of European Romanticism** Paul Hamilton, 2016-01-14 TThe Oxford Handbook to European Romanticism brings together leading scholars in the field to examine the intellectual literary philosophical and political elements of European Romanticism The book focuses on the cultural history of the period extending from the French Revolution to the uprisings of 1848 It begins with a series of chapters examining key texts written by major writers in languages including French German Italian Spanish Russian Hungarian Greek and Polish amongst others A second section then explores the naturally interdisciplinary quality of Romanticism exemplified by the different discourses with which writers of the time set up an internal comparative dynamic These chapters highlight the sense a discourse gives of being written knowledgeably against other pretenders to completeness or comprehensiveness of self understanding of the time Discourses typically advance their own claims to resume European culture collaborating with and at the same time trying to assimilate each other in the process The main examples featured here are history geography drama theology language philosophy political theory the sciences and the media Each chapter offers an original and individual interpretation of an inherently comparative world of individual writers and the discursive idioms to which they are historically subject Together the forty one chapters provide a comprehensive and provocative overview of European Romanticism **Representing the National Landscape in Irish Romanticism** Julia M. Wright, 2014-04-22 Ireland is a country which has come to be defined in part by an ideology which conflates nationalism with the land From the Irish Revival's celebration of the Irish peasant farmer as the ideal Irishman to

the fierce history of land claim battles between the Irish and their colonizers notions of the land have become particularly bound up with conceptions of what Ireland is and what it is to be Irish In this book Wright considers this fraught relationship between land and national identity in Irish literature In doing so she presents a new vision of the Irish national landscape as one that is vitally connected to larger geographical spheres By exploring issues of globalization international radicalism trade routes and the export of natural resources Wright is at the cutting edge of modern global scholarly trends and concerns In considering texts from the Romantic era such as Leslie s Killarney Edgeworth s Limerick Gloves and Moore s Irish Melodies Wright undercuts the nationalist myth of a people of the soil using the very texts which helped to construct this myth Reigniting the field of Irish Romanticism Wright presents original readings which call into question politically motivated mythologies while energizing nationalist conceptions that reflect transnational networks and mobility **British**

Romanticism in European Perspective Steve Clark,Tristanne Connolly,2015-09-08 What and when is British Romanticism if seen not in island isolation but cosmopolitan integration with European Romantic literature history and culture The essays here range from poetry and the novel to science writing philosophy visual art opera and melodrama from France and Germany to Italy and Bosnia **The Emergence of Romanticism** Nicholas V. Riasanovsky,1995-05-18 Although primarily

known as an eminent historian of Russia Nicholas Riasanovsky has been a longtime student of European Romanticism In this book Riasanovsky offers a refreshing and appealing new interpretation of Romanticism s goals and influence He searches for the origins of the dazzling vision that made the great early Romantic poets in England and Germany Wordsworth Coleridge Novalis and Friedrich Schlegel look at the world in a new way He stresses that Romanticism was produced only by Western Christian civilization with its unique view of humankind s relationship to God The Romantic s frantic and heroic striving after unreachable goals mirrors Christian beliefs in human inability to adequately address God speak to God or praise God Further Riasanovsky argues that Romantic thought had important political implications playing a key role in the rise of nationalism in Europe Offering a historical examination of an area often limited to literary analysis this book gracefully makes a larger historical statement about the nature and centrality of European Romanticism *The Oxford Handbook of British*

Romanticism David Duff,2018 This Handbook provides a comprehensive overview of British Romantic literature and an authoritative guide to all aspects of the movement including its historical cultural and intellectual contexts and its connections with the literature and thought of other countries All the major Romantic writers are covered alongside lesser known writers *The Romantic National Tale and the Question of Ireland* Ina Ferris,2002-11-21 Ina Ferris examines the

way in which the problem of incomplete union generated by the formation of the United Kingdom in 1800 destabilised British public discourse in the early decades of the nineteenth century Ferris offers the first full length study of the chief genre to emerge out of the political problem of Union the national tale an intercultural and mostly female authored fictional mode that articulated Irish grievances to English readers Ferris draws on current theory and archival research to show how the

national tale crucially intersected with other public genres such as travel narratives critical reviews and political discourse In this fascinating study Ferris shows how the national tales of Morgan Edgeworth Maturin and the Banim brothers dislodged key British assumptions and foundational narratives of history family and gender in the period *Romanticism, History, and the Possibilities of Genre* Tilottama Rajan, Julia M. Wright, 1998-02-13 Romanticism has often been associated with the mode of lyric or otherwise confined within mainstream genres As a result we have neglected the sheer diversity and generic hybridity of a literature that ranged from the Gothic novel to the national tale from monthly periodicals to fictionalized autobiography In this volume leading scholars of the period explore the ways in which the Romantics developed genre from a taxonomical given into a cultural category so as to make it the scene of an ongoing struggle between fixed norms and new initiatives Focusing on non canonical writers such as Thelwall Godwin and the novelists of the 1790s or placing authors such as Wordsworth and Byron in a non canonical context these essays explore the psychic and social politics of genre from a variety of theoretical perspectives while the introduction looks at how genre itself was rethought by Romantic criticism
