Romani,Northwestern University (Evanston, Ill.),1950 **The Papacy Since 1500** James Corkery,Thomas Worcester,2010-08-12 Structured by detailed studies of significant Popes these essays explore the evolution of the papacy in the last 500 years **The Congress of Vienna and its Legacy** Mark Jarrett,2013-09-30 In 1814 the five reigning dynasties of Europe Alexander I of Russia and ministers such Metternich and Talleyrand descended upon Vienna The Vienna Congress marked one of the great turning points in diplomatic history the first attempt to create an international order to secure peace for the nineteenth century The blueprint for modern day global governance models such as the UN it was a response to Napoleon's expansion across Europe and sought to build upon the state systems he left behind whilst shoring up the privileges and power of Europe's elite Here Mark Jarrett argues that the Congress of Vienna in fact marked the beginning of the end for the Ancien Regime yet despite its disintegration following the suicide of Castlereagh the congress system has had

an enormous influence up to the present day The role of diplomacy as a means to conflict resolution the workings of multi lateralism and the emphasis on international organizations to guarantee national sovereignty were all long term by products of the congress system A new synthesis of archival material The Congress System is a fresh exploration of a key event in the history of International Relations and Diplomacy **Revolutionary Contagion and International Politics** Chad E. Nelson,2022 A unique theory of what happens when leaders fear a revolution abroad will spread to their own country and how that affects international relations When do leaders fear that a revolution elsewhere will spread to their own polities and what are the international effects of this fear In Revolutionary Contagion Chad E Nelson develops and tests a theory that explains how states react to ideological driven revolutions that have occurred in other nations To do this he analyzes four key revolutionary movements over two centuries liberalism communism fascism and Islamism He further explains that the key to understanding the response to revolutions lies in focusing on the extent to which leaders fear upheaval in their own countries According to the theory Nelson argues fear of contagion is driven more by the characteristics of the host rather than the activities of the infecting agents In other words leaders will fear revolutionary contagion when they have significant revolutionary opposition movements that have an ideological affinity with the revolutionary state A powerful theory of the profound effects revolutions have on international relations this book shows why one simply cannot make sense of international politics including patterns of alliances and wars in certain situations without considering the fear of contagion
