Rome From The Ground Up:

Rome from the Ground Up James H. S. McGregor, 2005-11 Rome is not one city but many each with its own history unfolding from a different center Beginning with the shaping of the ground on which Rome first rose this book conjures all these cities conducting the reader through time and space to the complex and shifting realities architectural historical political and social that constitute Rome

Rome from the Ground Up James H. S. McGregor, 2006-10-31 Rome is not one city but many each with its own history unfolding from a different center now the trading port on the Tiber now the Forum of antiquity the Palatine of imperial power the Lateran Church of Christian ascendancy the Vatican the Quirinal palace Beginning with the very shaping of the ground on which Rome first rose this book conjures all these cities past and present conducting the reader through time and space to the complex and shifting realities architectural historical political and social that constitute Rome A multifaceted historical portrait this richly illustrated work is as gritty as it is gorgeous immersing readers in the practical world of each period James McGregor's explorations afford the pleasures of a novel thick with characters and plot twists amid the life struggles hopes and failures of countless generations we see how things truly worked then and now we learn about the materials of which Rome was built of the Tiber and its bridges of roads aqueducts and sewers and always of power especially the power to shape the city and imprint it with a particular personality like that of Nero or Trajan or Pope Sixtus V or a particular institution McGregor traces the successive urban forms that rulers have imposed from emperors and popes to national governments including Mussolini's And in archaeologists and museums presentation of Rome's past he shows that the documenting of history itself is fraught with power and politics In McGregor's own beautifully written account the power and politics emerge clearly manifest in the distinctive styles and structures practical concerns and aesthetic interests that constitute the myriad Romes of our day and days past

Washington from the Ground Up James Harvey McGregor, 2007 At the confluence of the Potomac and Anacostia rivers President Washington chose a diamond shaped site for the city that would bear his name along with the burdens and blessings of democracy Situated midway between North and South the capital was also a gateway to the West a contested wilderness where rough frontiersmen were already carving a divided nation With Indians on their borders and black slaves in their midst the country's white founders struggled to embody in bricks and stone the paradoxical republic they had invented Inspired by Greek and Roman models city planners and designers scoured the Western world from Hadrian's Pantheon to Palladio's Vicenza to the French Royal Academy for an architectural language to capture the elusive principles of liberty equality and union Washington from the Ground Up tells the story of a nation whose Enlightenment ideals were tested in the fires of rebellion removal and resistance It is also a tale of two cities official Washington whose stately neoclassical buildings expressed the government's power and global reach and DC whose minority communities especially African Americans lived in the shadows of poverty Moving chronologically and geographically throughout the District James McGregor reads this complex history

from monuments and museums libraries and churches squares and neighborhoods that can still be seen today His lucid narrative accompanied by detailed maps and copious illustrations doubles as a visitor s guide to this uniquely American city

Paris from the Ground Up James H. S. McGregor,2010-11-30 Paris is the most personal of cities There is a Paris for the medievalist and another for the modernist a Paris for expatriates philosophers artists romantics and revolutionaries of every stripe James H S McGregor brings these multiple perspectives into focus throughout this concise unique history of the City of Light His panorama begins with an ancient Gallic fortress on the Seine burned to the ground by its own defenders in a vain effort to starve out Caesar s legions After ninth century raids by the Vikings ended Parisians expanded the walls of their tiny sanctuary on the Ile de la Cit turning the river s right bank into a thriving commercial district and the Rive Gauche into a college town Gothic spires expressed a taste for architectural novelty matched only by the palaces and pleasure gardens of successive monarchs whose ingenuity made Paris the epitome of everything French The fires of Revolution threatened all that had come before but Baron Haussmann saw opportunity in the wreckage No planned city in the world is more famous than his Paris from the Ground Up allows readers to trace the city s evolution in its architecture and art from the Roman arena to the Mus e d Orsay from the Louvre s defensive foundations to I M Pei s transparent pyramids Color maps along with identifying illustrations make the city accessible to visitors by foot Metro or riverboat

Venice from the Ground Up James H. S. McGregor,2008-04-30 Venice emerged on mudflats at the edge of the habitable world Protected in a tidal estuary from invaders and Byzantine overlords the fishermen and traders who settled there crafted a way of life unique in the Roman Empire McGregor recreates this world with its waterways rather than roads and its livelihood harvested from the sea

War From the Ground Up Emile Simpson,2018-05-01 This is a philosophical treatise on war written by an Oxford grad who served in Afghanistan From the Ground Up John Scott Horrell, Veteran pastor professor and church planter Horrell suggests that the customs patterns and structures of churches may actually be barriers to what God s purposes for the church really are

Physics from the Ground Up Herman Y. Carr,Richard T. Weidner,1979 **Christianity from the Ground Up** Ian Dodkins,2024-01-19 How did all species fit on the ark Where is Jesus now What is the purpose of heaven These are questions many Christians have asked themselves but they have also led many people to become atheists This book doesn t answer them it shows how these questions are missing the point and explains how core Christian values arise naturally from the human experience and why these values are so important to live a life of contentment despite all trials This book combines knowledge in science not pseudo science with understanding in wisdom texts including the Bible Stoicism and Taoism It explains why forgiveness optimism gratitude humility and love are so important in our lives Along the way readers will learn about relativity the size of the universe the purpose of life how to feel content mental strength and how Job expresses sentiments similar to Taoism The book talks about Christian history the effect of fasting on the body and mind and stories such as the Frog in the Well This book isn t trying to convince the reader it s a journey through life science and

religion that will certainly teach something new **Ecological Economics from the Ground Up** Hali Healy, 2013 This book provides learning materials which are grounded in the experience of Civil Society Organisations CSOs with case studies chosen by CSOs and developed collaboratively with leading ecological economists Fertile Ground: Scaling Agroecology from the Ground Up Steven Brescia, 2017-03-20 Agroecology is our best option for creating an agrifood system capable of nurturing people societies and the planet But it is still not widespread Fertile Ground offers nine case studies authored by agroecologists from Africa Latin America the Caribbean North America and Europe that demonstrate how the endogenous practice of agroecology can be scaled so that it is known by more farmers practiced more deeply and integrated in planning and policy *Rome's Holy Mountain* Jason Moralee, 2018 Rome's Holy Mountain is the first book to chart the history of the Capitoline Hill in Late Antiquity from the third to the seventh centuries CE It investigates both the lived in and dreamed of realities of the hill in an era of fundamental political religious and social change *Lessons from the Ground Up* Peter G. Veit, Okyeame Ampadu-Agyei, 1995 This report makes the case for policies and programmes that promote local level natural resource management in Africa Synthesizing various analyses of community resource management the authors identify key determinants to successful local self help initiatives *The Renaissance World* John Jeffries Martin, 2015-01-09 With an interdisciplinary approach that encompasses the history of ideas political history cultural history and art history this volume in the successful Routledge Worlds series offers a sweeping survey of Europe in the Renaissance from the late thirteenth to early seventeenth centuries and shows how the Renaissance laid key foundations for many aspects of the modern world Collating thirty four essays from the field's leading scholars John Jeffries Martin shows that this period of rapid and complex change resulted from a convergence of a new set of social economic and technological forces alongside a cluster of interrelated practices including painting sculpture humanism and science in which the elites engaged Unique in its balance of emphasis on elite and popular culture on humanism and society and on women as well as men The Renaissance World grapples with issues as diverse as Renaissance patronage and the development of the slave trade Beginning with a section on the antecedents of the Renaissance world and ending with its lasting influence this book is an invaluable read which students and scholars of history and the Renaissance will dip into again and again **The Life and Times of Moses Jacob Ezekiel** Peter Adam Nash, 2014-03-06 The Life and Times of Moses Jacob Ezekiel American Sculptor Arcadian Knight tells the remarkable story of Moses Ezekiel and his rise to international fame as an artist in late nineteenth century Italy Sephardic Jew homosexual Confederate soldier Southern apologist opponent of slavery patriot expatriate mystic Victorian dandy good Samaritan humanist royalist romantic reactionary republican monist dualist theosophist freemason champion of religious freedom proto Zionist and proverbial Court Jew Moses Ezekiel was a riddle of a man a puzzle of seemingly irreconcilable parts Knighted by three European monarchs courted by the rich and famous Moses Ezekiel lived the life of an aristocrat with rarely a penny to his name Making his home in the capacious ruins of the Baths of Diocletian in Rome he quickly

distinguished himself as the consummate artist and host winning international fame for his work and consorting with many of the lions and luminaries of the fin de siècle world including Giuseppe Garibaldi Queen Margherita Franz Liszt Richard Wagner Sarah Bernhardt Gabriele D Annunzio Eleonora Duse Annie Besant Clara Schumann Sir Lawrence Alma Tadema Alphonse Daudet Mark Twain mile Zola Robert E Lee Augustus Saint Gaudens and Isaac Mayer Wise In a city besieged with eccentrics he a Southern Jewish homosexual sculptor was outstanding an enigma to those who knew him a man at once stubbornly original and deeply emblematic of his times According to Stanley Chyet in his introduction to Ezekiel s memoirs The contemporary European struggle between liberalism and reaction between modernity and feudalism between the democratic and the hierarchical is rather amply refracted in Ezekiel s account of his life in Rome Indeed so many of the contentious cultural political artistic and scientific struggles of the age converged in the figure of this adroit and prepossessing Jew

Great Women Travel Writers Alba Amoia,Bettina Knapp,2006-06-02 Includes ten contributor s writings on 250 years of women travel writers Travel is a quest an escape a passion Women explorers and travellers are a special breed This book covers 22 courageous women who encircled the globe and boldly crossed international barriers often to encounter the most patriarchal cultures of their time

The Renaissance in Italy Kenneth Bartlett,2019-11-15 The Italian Renaissance has come to occupy an almost mythical place in the popular imagination The outsized reputations of the best known figures from the period Michelangelo Niccolo Machiavelli Lorenzo the Magnificent Pope Julius II Isabella d Este and so many others engender a kind of wonder How could so many geniuses or exceptional characters be produced by one small territory near the extreme south of Europe at a moment when much of the rest of the continent still labored under the restrictions of the Middle Ages How did so many of the driving principles behind Western civilization emerge during this period and how were they defined and developed And why is it that geniuses such as Leonardo Raphael Petrarch Brunelleschi Bramante and Palladio all sustain their towering authority to this day To answer these questions Kenneth Bartlett delves into the lives and works of the artists patrons and intellectuals the privileged educated influential elites who created a rarefied world of power money and sophisticated talent in which individual curiosity and skill were prized above all else The result is a dynamic highly readable copiously illustrated history of the Renaissance in Italy and of the artists that gave birth to some of the most enduring ideas and artifacts of Western civilization

Epic Ambition Jessica Blum,Jessica Blum-Sorensen,2023-12-12 By the time the Roman poet Valerius Flaccus wrote in the first century CE the tale of Jason and his famous ship the Argo had been retold so often it was a byword for poetic banality Why then did Valerius construct his epic Argonautica In this innovative analysis Jessica Blum Sorensen argues that it was precisely the myth s overplayed nature that appealed to Valerius operating in and responding to a period of social and political upheaval Seeking to comment obliquely on Roman reliance on mythic exempla to guide action and expected outcomes there was no better vessel for his social and political message than the familiar Argo Focusing especially on Hercules Blum Sorensen explores how Valerius

characters and by extension their Roman audience misinterpret exemplars of past achievement or apply them to sad effect in changed circumstances By reading such models as normative guides to epic triumph Valerius Argonauts find themselves enacting tragic outcomes effectively the characters impose their nostalgic longing for epic triumph on the events before them even as Valerius and his audience anticipate the tragedy awaiting his heroes Valerius thus questions Rome's reliance on the past as a guide to the present allowing for doubt about the empire's success under the new Flavian regime It is the literary tradition's exchange between triumphant epic and tragedy that makes the Argo's voyage a perfect vehicle for Valerius exploration the tensions between genres both raise and prohibit resolution of anxieties about how the new age mythological or real will turn out
