Conklin,2012-12-06 Conklin s thesis is that the tradition of modern legal positivism beginning with Thomas Hobbes postulated different senses of the invisible as the authorising origin of humanly posited laws Conklin re reads the tradition by privileging how the canons share a particular understanding of legal language as written Leading philosophers who have espoused the tenets of the tradition have assumed that legal language is written and that the authorising origin of humanly posited rules norms is inaccessible to the written legal language Conklin s re reading of the tradition teases out how each of these leading philosophers has postulated that the authorising origin of humanly posited laws is an unanalysable externality to the written language of the legal structure As such the authorising origin of posited rules norms is inaccessible or invisible to their written language What is this authorising origin Different forms include an originary author an a priori concept and an immediacy of bonding between person and laws In each case the origin is unwritten in the sense of being inaccessible to the authoritative texts written by the officials of civil institutions of the sovereign state Conklin sets his thesis in the context of the legal theory of the polis and the pre polis of Greek tribes The author claims that the problem is that the tradition of legal positivism of a modern sovereign state excises the experiential or bodily meanings from the written language of the posited rules norms thereby forgetting the very pre legal authorising origin of the posited norms that each philosopher admits as offering the finality that legal reasoning demands if it is to be authoritative *Journal of the History of Philosophy* ,1984 **Encyclopedia of Government and Politics** M. The Tapestry of Reason Amalia Amaya, 2015-04-30 In recent years coherence theories of law and adjudication have been extremely influential in legal scholarship These theories significantly advance the case for coherentism in law Nonetheless there remain a number of problems in the coherence theory in law This ambitious new work makes the first concerted attempt to develop a coherence based theory of legal reasoning and in so doing addresses or at least mitigates these problems The book is organized in three parts The first part provides a critical analysis of the main coherentist approaches to both normative and factual reasoning in law The second part investigates the coherence theory in a number of fields that are relevant to law coherence theories of epistemic justification coherentist approaches to belief revision and theory choice in science coherence theories of practical and moral reasoning and coherence based approaches to discourse interpretation Taking this interdisciplinary analysis as a starting point the third part develops a coherence based model of legal reasoning While this model builds upon the standard theory of legal reasoning it also leads to rethinking some of the basic assumptions that characterize this theory and suggests some lines along which it may be further developed Thus ultimately the book not only improves upon the current state of coherence theory in law but also contributes to the larger debate about how to articulate a theory of legal reasoning that results in better decision making
