Royal Society Concept Creation:

The Royal Society: Concept and Creation Margery Purver, 2013-04-15 Originally published in 1967 The origin of the Royal Society has long been obscured by baffling discrepancies in the evidence This volume investigates its underlying purpose and creation at the same time uncovering the real nature of its debt to Francis Bacon and its role in the scientific revolution of the seventeenth century *The Royal Society, Concept and Creation* Margery Purver, 1967 **The Royal Society: Concept and Creation. With an Introd. by H[ugh] R[edwald] Trevor-Roper. (1. Publ.)** Margery Purver, 1967

Freemasonry Birth Mod Science Pb Robert Lomas, 2004 In 1660 within a few months of the restoration of Charles II a group of twelve men including Robert Boyle and Christopher Wren met in London to set up a society to study the mechanisms of nature At a time when superstition and magic governed reason the repressive dogma of Christian belief silenced many and where post war loyalties ruined careers these men forbade the discussion of religion and politics at their meetings The Royal Society was born and with it modern experimental science This situation seems unlikely enough but the fact that the founding members came from both sides of a brutal Civil War makes its origins all the more astonishing Freemasonry and the Birth of Modern Science is a fascinating study of the turbulent political economic and religious background to the formation of the Royal Society an era of war against the Dutch the Great Plague and the Great Fire of London In particular it reveals the ambitions of one man Sir Robert Moray the key driving force behind the society Building on his detailed experience of another organization and the principles on which it was based Moray was able to structure and gain finance for the Royal Society This other organization the Invisible College as Boyle called it is known today as Freemasonry Freemasonry and the Birth of Modern Science will make you reassess many of the key events of this period and will show how Freemasonry supported by Charles II was the guiding force behind the birth of modern science under the cover of the Royal Society *The Royal Society* Margery Purver, 1967 **The Intellectual Revolution of the**

Seventeenth Century (Routledge Revivals) Charles Webster, 2012-10-12 Intellectual history and early modern history have always occupied an important place in Past and Present First published in 1974 this volume is a collection of original articles and debates published in the journal between 1953 and May 1973 dealing with many aspects of the intellectual history of the seventeenth century Several of the contributions have been extremely influential and the debates represent major standpoints in controversies over genesis of modern ideas Although England is the focus of attention for most of the contributors their themes have wider significance Among the topics covered in the collection are the political thought of the Levellers and of James Harrington radical social movements of the Puritan Revolution the ideological context of physiological theories associated with William Harvey the relationship between science and religion and the social relations of science and the function of millenarianism and eschatology in the seventeenth century The editor's Introduction indicates the context in which the articles were composed and provides valuable bibliographical information about the subjects discussed

Bibliography of the History of Medicine , Science, Philosophy and Religion in the Age of the Enlightenment John Gascoigne, 2024-10-28 Taking as its focus the wide ranging character of the Enlightenment both in geographical and intellectual terms this second collection of articles by John Gascoigne explores this movement's filiation and influence in a range of contexts In contrast to some recently influential views it emphasises the evolutionary rather than the revolutionary character of the Enlightenment and its ability to change society by adaptation rather than demolition This it does by reference firstly to developments in Britain tracing the changing views of history in relation to the Biblical account the ideological uses of science and particularly the work of Newton and their connections to developments in moral philosophy and the teaching of science and philosophy in response to Enlightenment modes of thought The collection then turns to the wider global setting of the Enlightenment and the way in which that movement served to provide a justification for European exploration and expansion developments which found one of their most potent embodiments in the diverse uses of mapping The collection concludes with an exploration of the interplay between the experience of Pacific contact and the currents of thought which characterised the Enlightenment in Germany *The Common Scientist of the Seventeenth Century* K Theodore Hoppen, 2013-04-15 Learned societies such as the Royal Society of London and the Dublin Philosophical Society were a central feature of the scientific revolution of the seventeenth century This volume shows that a study of the work and membership of these groups is essential before any realistic assessment can be made of the scientific world at this time Based on a wide range of manuscript and other sources this book illuminates by means of an examination of a particular group of natural philosophers on problems of general interest to all those concerned with the wider aspects of science in this period *Institutional Culture in Early Modern Society* Anne Goldgar, Robert I. Frost, 2004 This volume offers new insights into the self-perceptions strategies and rituals through which early modern institutions functioned Its wide range and its comparative vision of the nature of institutions prompts a new interpretation of the role of institutions in society With contributions by Florence Hsia Ian Anders Gadd Gayle K Brunelle Christopher Carlsmith Susan E Brown Victor Morgan Steve Hindle Janelle Day Jenstad Eve Rosenhaft Reed Benhamou James Shaw Kristine Haugen
