Bridging the Medieval-Modern Divide James Muldoon, 2016-04-15 The debate about when the middle ages ended and the modern era began has long been a staple of the historical literature In order to further this debate and illuminate the implications of a *longue durée* approach to the history of the Reformation this collection offers a selection of essays that address the medieval modern divide Covering a broad range of topics encompassing legal social cultural theological and political history the volume asks fundamental questions about how we regard history and what historians can learn from colleagues working in other fields that may not at first glance appear to offer any obvious links By focussing on the concept of the medieval modern divide in particular the relation between the Middle Ages and the Reformation each essay examines how a medievalist deals with a specific topic or issue that is also attracting the attention of Reformation scholars In so doing it underlines the fact that both medievalists and modernists are often involved in bridging the medieval modern divide but are inclined to construct parallel bridges that end between the two starting points but do not necessarily meet As a result the volume challenges assumptions about the strict periodization of history and suggest that a more flexible approach will yield interesting historical insights
