Coffey , Daniel Garza Usabiaga, 2017-08-29 Published by Pomona College of Art in association with Getty Publications Jos Clemente Orozco s 1930 mural *Prometheus* created for the Pomona College campus is a dramatic and gripping examination of heroism This thoughtful exhibition catalogue examines the multiple ways Orozco s vision resonates with four artists working in Mexico today Isa Carrillo Adela Goldbard Rita Ponce de Le n and Naomi Rinc n Gallardo share Orozco s interest in history justice social protest storytelling and power yet approach these topics from their own twenty first century sensibilities These artists activate Orozco s mural by reinvigorating *Prometheus* for a contemporary

audience This gorgeous volume presents substantial new scholarship connecting Mexican muralism with contemporary art practices Three new essays address different aspects of Orozco Prometheus and the connections between Los Angeles and Mexico The contributors take on a broad range of topics from murals as public art to how Orozco's work fits into contemporary frameworks of aesthetic theory The book also includes a chronology vibrant reproductions and critical essays focused on the contemporary artists

New World Art Gallery New World Art Gallery, **W. S. Graham** Ralph Pite, Hester Jones, 2004-04-01 Graham's work was published by T S Eliot in the 1940s and 50s but as a major post war poet his work has received astonishingly little critical attention given its prestige and influence This collection of essays covers all aspects of Graham's work its critical reception recent influence and its relations with other developments in the arts in particular the work of the St Ives School of visual artists It includes some biographical material brief reminiscences by and interviews with those who knew him and discussions of the material contained in several collections of manuscripts Nothing so far published has paid attention to these manuscript collections or to the large number of uncollected poems published since his death Neither has enough been written about Graham's importance to poets of the 1980s and 1990s I first read a W S Graham poem in 1949 It sent a shiver down my spine Forty five years later nothing has changed His song is unique and his work an inspiration Harold Pinter

When the Machine Made Art Grant D. Taylor, 2014-04-10 Considering how culturally indispensable digital technology is today it is ironic that computer generated art was attacked when it burst onto the scene in the early 1960s In fact no other twentieth century art form has elicited such a negative and hostile response When the Machine Made Art examines the cultural and critical response to computer art or what we refer to today as digital art Tracing the heated debates between art and science the societal anxiety over nascent computer technology and the myths and philosophies surrounding digital computation Taylor is able to identify the destabilizing forces that shape and eventually fragment the computer art movement

Russia Richard Anderson,2015-11-15 This book offers a comprehensive account of Russia s architectural production from the late nineteenth century to the present explaining how its architecture was both shaped by and came to embody Russia s rapid cultural economic and social revolutions over the past century Richard Anderson looks at Russia s complex relationship to global architectural culture exploring the country s central presence in the Rationalism and Constructivism movements of the 1920s as well as its role as a key protagonist during the Cold War Looking deeply at Soviet Russia he brings the relationship between architecture and socialism into focus through detailed case studies that situate buildings and architectural concepts within the socialist milieu of Soviet society He tracks the way Russian architectural institutions departed from the course of modernism being developed in capitalist countries and he reappraises the architecture of the Stalin era and the final decades of the USSR Finally he traces the influence of Soviet conventions on contemporary Russian architecture which is now a more heterogeneous mix of approaches and styles and how it made a lasting and little known impact on territories extending from the Middle East to Central Asia and into China A bold new assessment of Russia s architectural legacy and contemporary contributions this book is a fascinating exploration of a tumultuous place and the creativity that has come from it

Red Legacies in China Jie Li,Enhua Zhang,2020-10-26 What has contemporary China inherited from its revolutionary past How do the realities and memories aesthetics and practices of the Mao era still reverberate in the post Mao cultural landscape The essays in this volume propose red legacies as a new critical framework from which to examine the profusion of cultural productions and afterlives of the communist revolution in order to understand China s continuities and transformations from socialism to postsocialism Organized into five parts red foundations red icons red classics red bodies and red shadows the book s interdisciplinary contributions focus on visual and performing arts literature and film language and thought architecture museums and memorials Mediating at once unfulfilled ideals and unmourned ghosts across generations red cultural legacies suggest both inheritance and debt and can be mobilized to support as well as to critique the status quo

Contemporary Perspectives on Architectural Organicism Gary Huafan He,Skender Luarasi,2023-06-07 This project is born out of similar questions and discussions on the topic of organicism emergent from two critical strands regarding the discourse of organic self generation one dealing with the problem of stopping in the design processes in history and the other with the organic

legacy of style in the nineteenth century as a preeminent form of aesthetic ideology The epistemologies of self generation outlined by enlightenment and critical philosophy provided the model for the discursive formations of modern urban planning and architecture The form of the organism was thought to calibrate modernism's infinite extension The architectural organicism of today does not take on the language of the biological sciences as they did in the nineteenth and twentieth centuries but rather the image of complex systems be they computational informational geo ecological or even ontological aesthetic networks What is retained from the modernity of yesterday is the ideology of endless self generation Revisiting such a topic feels relevant now in a time when the idea of endless generation is rendered more suspect than ever amid an ever increasing speed and complexity of artificial intelligence AI networks The essays collected in this book offer a variety of critiques of the modernist idea of endless growth in the fields of architecture literature philosophy and the history of science They range in scope from theoretical and speculative to analytic and critical and from studies of the history of modernity to reflections of our contemporary world Far from advocating a return to the romantic forms of nineteenth century naturphilosophie this project focuses on probing organicism for new forms of critique and emergent subjectivities in a contemporary post pandemic constellation of neo naturalism in design climate change complex systems and information networks This book will be of interest to a broad range of researchers and professionals in architecture and art history historians of science visual artists and scholars in the humanities more generally
