Civil Society and the Security Sector Marina Caparini,Philipp Fluri,Ferenc Molnár,2006 This volume analyses the role of civil society in the reform and oversight of the security sector in post communist countries as a key aspect of the transition towards democracy It is widely accepted that civil society actors have an important contribution to make in the governance of the security sector However that specific role has not been subject to much close or comparative examination This book constitutes an attempt to examine and compare experiences of civil society participation in security oversight across Central and Eastern Europe The first part of the volume presents the reader with the theoretical and conceptual background against which the potential role of civil society in security sector governance can be understood and assessed The remainder of the book is comprised of nine country studies of civil society engagement with the security sector Reviewing developments over the past 15 years of regime transformation in the region the book draws upon a rich variety of cases that cast light on the different experiences challenges and successes of civil society actors and the media in democratisation security sector reform and the exercise of

Mokhtari,1994 *Peacemaking, Peacekeeping, and Coalition Warfare* Fariborz Levaye Mokhtari,1994 **Monthly Catalogue, United States Public Documents** ,1995 Roles and Missions of the U.S. Armed Forces ,1995 **Preparing for Peace** Volker Franke,1999-11-30 Since the end of the Cold War U S military forces have participated in an increasingly complex array of military operations from disaster relief and peacekeeping to deadly combat The unique nature of many of these missions calls into question what it means to be a soldier and may require adjustments not only in military doctrine but also in the military's combat oriented warrior identity Franke examines the extent to which individuals who will lead U S forces in the 21st century are prepared cognitively to shift among mission requirements Using survey methods Franke explores the social political and professional attitudes and values of cadets at the U S Military Academy at West Point By comparing cadets responses across classes he assesses the effects of military socialization on their commitment to the military's dual mission purpose and their cognitive preparation for combat and non combat assignments By developing a dynamic model of social identity Franke extends the applicability of social identity theory from the experimental laboratory environment to a genuine social field setting Assessing the dynamic relationship between identity values and attitudes for identifications that are normatively meaningful to respondents he illustrates the importance of individuals identification with social groups for their behavioral choices **Canada Among Nations, 1996** Fen Osler Hampson, Maureen Appel Molot,1996-01-01 Canada is a relatively small player on the world scene but is still big enough to be heard The theme of this year's volume of Canada Among Nations is the need for choices in Canadian foreign policy In an environment of fiscal constraint the necessity of choice is related to establishing priorities within the multitude of international organizations to which Canada belongs If we can no longer afford to be a member of a large number of international institutions which memberships will we uphold and on what grounds will we decide These questions and others are addressed from a variety of standpoints As in the past each article in Canada Among Nations is a free standing contribution Contributors have their own distinctive viewpoints and perspectives on where Canada stands in the community of nations and where the country's foreign policy priorities should lie **U.S. Foreign Policy and the UN System** Frances K. Scott,1995 Special Bibliography Series ,1957 *The Blood Of Abraham, "Intifada, Uprising & Lessons In Asymmetrical Warfare"* Major David A. Brown,2015-11-06 A historical case study concerning the Israeli Army's response to the Palestinian Intifada or uprising in the late 1980's and early 1990's provides

instructive planning considerations for likely future application of U S military force in an asymmetrical threat environment The monograph specifically analyzes the time period from the beginning of the uprising until the handshake of Rabin and Arafat on the White House lawn September 13th 1993 Although the theoretical application of the case study is speculative of future environments this paper attempts to link available historical data to anticipated trends in the international security environment and emerging concepts of operational art The argument surrounding asymmetrical types of warfare leads into a discussion of the application of IDF lessons learned that may be applied to future U S military scenarios Armed Forces and Society in Europe A. Forster, 2005-10-31 In the post Cold War era European militaries are engaged in an ongoing adaptation which is challenging relations between armed forces and the societies that they serve This book offers an innovative conceptual framework to critically evaluate contemporary civil military relations across the continent of Europe It analyzes eight key issues in armed forces and society relations to explore the scale and intensity of these changes

Mission Creep Gordon Adams, Shoon Murray, 2014-12-12 Mission Creep The Militarization of US Foreign Policy examines the question of whether the US Department of Defense DOD has assumed too large a role in influencing and implementing US foreign policy After the Cold War and accelerating after September 11 the United States has drawn upon the enormous resources of DOD in adjusting to the new global environment and challenges arising from terrorism Islamic radicalism insurgencies ethnic conflicts and failed states Contributors investigate and provide different perspectives on the extent to which military leaders and DOD have increased their influence and involvement in areas such as foreign aid development diplomacy policy debates and covert operations These developments are set in historical and institutional context as contributors explore the various causes for this institutional imbalance The book concludes that there has been a militarization of US foreign policy while it explores the institutional and political causes and their implications Militarization as it is used in this book does not mean that generals directly challenge civilian control over policy rather it entails a subtle phenomenon wherein the military increasingly becomes the primary actor and face of US policy abroad Mission Creep s assessment and policy recommendations about how to rebalance the role of civilian agencies in foreign policy decision making and implementation will interest scholars and students of US foreign policy defense policy and security studies as well as policy practitioners interested in the limits and extents of militarization

Ethics and Counterrevolution Kermit D. Johnson, 1997 This book is an ethical critique of U S policy and involvement in counterrevolutionary war It rejects the thesis that the end of the Cold War means the end of revolution since revolution is grounded in root causes The defining characteristics of revolutionary war are outlined based on thought ranging from Mao Tse tung to modern counterinsurgency theorists to recent U S national security directives and military publications Underlying doctrines for U S interventions are traced from the Monroe Doctrine and the Roosevelt Corollary to Kennedy s Counterinsurgency Doctrine and the Nixon Doctrine From previous U S war fighting experience and declaratory policy an outline of national policy and strategy for

counterinsurgency emerges This policy has been a formula for winning wars not revolutions The book advocates the adoption of a modest political Hippocratic oath of Do no harm and argues that civilization demilitarization and the root causes for revolution are necessary for the building of true democracy *UN Peacekeeping in Trouble: Lessons Learned from the Former Yugoslavia* Wolfgang Biermann, Martin Vadset, 2019-05-23 First published in 1998 this volume is a record both by detailed statistical analysis and by personal account of lessons learned These lessons are only useful if they are shared to ensure that they are not relearned the hard way Any soldier or statesman who is involved in Peacekeeping Operations and anyone involved in the future of peacekeeping in the United Nations would be well advised to use this exceptionally insightful and informative work as one of their essential reference books It contains a rich store of analysis and sober conclusions that makes it an indispensable guide and should serve as a source of inspiration and reflection but even more it should serve to provide guidance for future action Biermann and Vadset have made a major contribution to the analysis of UN field operations and an important source book for the study of UN and NATO operations
