Nineteenth-Century Literary London Robertson Lisa C. Robertson, 2020-06-18 Explores radical designs for the home in the nineteenth century metropolis and the texts that shaped them Uncovers a series of innovative housing designs that emerged in response to London s rapid growth and expansion throughout the nineteenth century Brings together the writing of prominent authors such as Charles Dickens and George Gissing with understudied novels and essays to examine the lively

literary engagement with new models of urban housing Focuses on the ways that these new homes provided material and creative space for thinking through the relationship between home and identity Identifies ways in which we might learn from the creative responses to the nineteenth century housing crisis This book brings together a range of new models for modern living that emerged in response to social and economic changes in nineteenth century London and the literature that gave expression to their novelty It examines visual and literary representations to explain how these innovations in housing forged opportunities for refashioning definitions of home and identity Robertson offers readers a new blueprint for understanding the ways in which novels imaginatively and materially produce the city s built environment **Great Turning Point** Dr.

Terry Mortenson,2004-08-01 Many people in the Church today have the idea that young earth creationism is a fairly recent invention popularized by fundamentalist Christians in the mid 20th century Is this view correct In fact scholar Terry Mortenson has done fascinating original research on this subject in England and documents that several leading pre Darwin scholars and scientists known as scriptural geologists did not believe in long ages for the earth Mortenson sheds light on the following Before Darwin what did the Church believe about the age of the earth Why did it believe this way What was the controversy that rocked the Church in 19th century England Who were the scriptural geologists What influences did the Church contend with even before Darwin s book What is the stance of the Church today This book is a thoroughly researched work of reference for every library certainly every creationist library Terry Mortenson spent much time and work on this project in both the United States and Great Britain The history of the Church and evolution is fascinating and it is interesting to see not only the tremendous influence that evolution has had on the Church but on society as well **Spirits of**

Community K. D. M. Snell,2016-06-16 Concern about the decline of community and the theme of community spirit are internationally widespread in the modern world The English past has featured many representations of declining community expressed by those who lamented its loss in quite different periods and in diverse genres This book analyses how community spirit and the passing of community have been described in the past whether for good or ill with an eye to modern issues such as the so called loneliness epidemic or the social consequences of alternative structures of community It does this through examination of authors such as Thomas Hardy James Wentworth Day Adrian Bell and H E Bates by appraising detective fiction writers analysing parish magazines considering the letter writing of the parish poor in the 18th and 19th centuries and through the depictions of realist landscape painters such as George Morland K D M Snell addresses modern social concerns showing how many current preoccupations had earlier precedents In presenting past representations of declining communities and the way these affected individuals of very different political persuasions the book draws out lessons and examples from the past about what community has meant hitherto setting into context modern predicaments and judgements about spirits of community today Scientific Development and Misconceptions Through the Ages Robert E. Krebs,1999-02-28 The evolution of science through the ages has often been marred by people s misconceptions From pre

historic times when myths played a major role in people's lives to present day debates concerning the environment people have sought ways to explain the world around them and have often come up with incorrect answers Science has grown through the correction of these misconceptions This unique reference source can be used by students teachers and other interested researchers to explore this growth as it pertains to both the field of science and the process of scientific experimentation Readers will discover how misunderstandings led to further experimentation and eventually to scientific facts These false paths to scientific knowledge are not treated as deliberate misconduct but rather as a lack of knowledge and a misunderstanding of the science and technology involved both of which were sooner or later corrected by men and women of science Krebs explores the conception and development of scientific thought in five different fields Medicine and Health Life Science Chemistry and Physics Astrology Astronomy and Cosmology and Conservation Ecology and Environmentalism Within each of these categories he explores more specific areas such as the circulatory system geology and inner planets This arrangement provides easy access for the researcher interested in a particular area of science as well as those looking for general information illuminating how our modern understanding of science is based on much of the developments in our ancient past

The Oxford History of Western Art Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the redefinition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major

religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students

The Design History Reader Grace Lees-Maffei, Rebecca Houze, 2024-12-13 This revised and updated edition addresses the international history and practice of design from the 17th century to the present day Covering both primary texts by social theorists designers and design reformers and secondary texts in the form of key works of design history and design thinking the Reader provides an essential resource for understanding the history of design the development of the discipline and contemporary issues in design history and practice including decolonization sustainability historiography gender and globalization Extracts are grouped into thematic sections each with a contextualizing introduction by the editors and a guide to further reading The updated edition of The Design History Reader expands upon its original content and features numerous significant voices from across the globe Authors include William Morris Karl Marx Roland Barthes Victor Margolin Penny Sparke Judy Attfield Ellen Lupton and many more

Our Original Rights as a People Ariane Schnepf, 2006 In their struggle for universal suffrage the Chartists adapted language to further their cause Adopting the prevailing keywords of the time and reformulating them within their own cultural environment the Chartists defined and redefined their own political identity and interpreted the situation they lived in This book is a case study of Chartism as an example of how radical political movements present themselves in language and how they appear in networks of meaning Chartist vocabulary and keywords are studied in their historical context and decoded according to political social and cultural significance Set in constitutional politics of the time the Chartist network of keywords includes allusions to a radical past and reaches out into an imaginary future of a liberal market economy and social policy The three main concerns in the Chartist struggle were the individual Britain as a nation and the influence of political movements abroad

A Critical Bibliography of Adam Smith

Hiroshi Mizuta, 2016-07-01 This critical bibliography of Adam Smith takes as its starting point the Kress Library of Business and Economics 1939 catalogue of its Vanderblue Collection of Smithiana Since the bicentenary of The Wealth of Nations in 1976 the rate of international publication markedly accelerated significantly extending the scope of this bibliography beyond 1939 Its scope has been further enlarged via the inclusion of essays on the diffusion process while the inclusion of all works in the chronological main bibliography gives an overview of the scope of this process The notes appended to the entries provide a running commentary to the gathering pace of publication and the entries are organised chronologically with systematic annotation throughout

Art and Work Angela E. Davis, 1995 It is also a history of a type of work that was new during this period The mechanized reproduction of art works in the nineteenth century meant that artists found themselves within an industrial atmosphere similar to that of other workers This history traces the beginning of that process in England follows its transference to Canada and demonstrates how illustrators engravers photo engravers and lithographers became part of an increasingly commercially oriented industry It was an industry of major importance in the fields of printing and new forms of advertising but it was also an industry that led to a change in status for the members of its work force who considered themselves to be artists

Library Journal, 1997-04 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately

A History of International Political Theory Hartmut Behr, 2009-12-18 Contemporary theory of international politics faces a twofold problem the critical engagement with legacies of national power politics in connection to 20th Century International Relations and the regeneration of notions of humanity This book contributes to this engagement by a genealogy of thoughts on war peace and ethics
