The French secret services have a long history dating back to the ancien regime With the founding of the Third Republic 1870 1940 the famous Second Bureau was created as France's principal intelligence gathering organization After the Germans invaded France in 1940 however the services splintered and diversified with Vichy agencies and Collaborationists the Free French and the internal resistance all in contention More recently since 1944 the activities of the reorganized French secret services have extended across a surprisingly wide area sometimes with spectacular results as in the Greenpeace Affair in New Zealand in 1985 This volume deals with the French secret services according to a chronological framework which reflects the evolution of the services which were created and transformed by both internal and external historical factors The bibliography commences with an examination of the origins and development of the French Intelligence Service from the ancien regime to 1870 It then considers the history and activities of the secret services during the following periods the Third Republic the Second World War the Fourth Republic and the Fifth Republic firstly between 1958 and 1981 and then during the 1980s and 1990s including the Greenpeace Affair This is an essential reference tool for all those interested in the history of intelligence agencies and national security in general and in the development of the French secret services in particular

European Communities John Paxton, 1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era It aimed for nothing less than a

complete economic union so that goods people and capital would be able to pass over national boundaries of member countries as freely as they move within any one country As the Community's target date of 1992 for economic integration draws closer the need for information both current and historical becomes more urgent The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts combining older publications with new The literature on the EC is vast and issues The Community itself nearly 3000 publications a year The range of material covered in this volume is distinguished by its great scope Historical sections provide listings on the postwar years of economic recovery the development of the EC and biographies of the leading personalities involved Policy oriented sections encompass such subjects as labor transportation environment energy and education The political ramifications of economic union financial and fiscal affairs relations between the EC and the Third World and foreign relations in general are dealt with in separate sections The volume concludes with a listing of major European Community publications The sheer bulk of published material on the EC much of it duplication has made keeping up with its developments difficult for small and medium in Europe and elsewhere This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992
