desirable egalitarian response to the problems caused by globalization is a strategy to build occupational citizenship This is based on a right to universal economic security and institutions to enable everybody to develop their capabilities and work whilst respecting the ecological imperatives of the 21st century The book also explores a phasing out of labour law and a re orientation of collective bargaining towards collaborative bargaining highlighting the increased importance of the relationship between groups of workers and citizens as well as between workers and capital Work after Globalization offers a new perspective on work rejecting the labourist orientation of the 20th century Social scientists interested in globalization and labour market issues will warmly welcome this book It will also strongly appeal to students

**The Use of Force against Individuals in War under International Law** Ka Lok Yip, 2022-03-24 Is it legal to kill or capture and confine someone in war Is this relevant or wise to ask in the reality of war What does legal actually mean in the labyrinth of overlapping international laws This volume explores the meaning relevance and wisdom of questioning the legality of the use of force against individuals in war by reconnecting legal thought with the social world Weaving together law social theories and actual practices the book presents an interdisciplinary study of the laws regulating warfare The Use of Force against Individuals in War under International Law uncovers different conceptions of legality that generate tensions among different international laws regulating warfare and highlights the limits of legal techniques in addressing these tensions Accepting these tensions serves not to denigrate the law itself but to invite a deeper level of engagement with it through the lens of social theories Drawing on the insight that every social action results from an interaction between human agency and social structures this publication argues that in regulating warfare one distinct body of international law the law of armed conflicts accommodates the diminished agency of human beings operating in highly structured conditions while other bodies of international law harbour the potential to transform these very structured conditions Thus assimilating these laws whether in court or real world practices fundamentally conflates their underlying social ontologies

**Toxic Schools** Bowen Paulte, 2013-10-04 Violent urban schools loom large in our culture for decades they have served as the centerpieces of political campaigns and as window dressing for brutal television shows and movies Yet unequal access to quality schools remains the single greatest failing of our society and one of the most hotly debated issues of our time Of all the usual words used to describe non selective city schools segregated unequal violent none comes close to characterizing their systemic dysfunction in high poverty neighborhoods The most accurate word is toxic When Bowen Paulte speaks of toxicity he speaks of educational worlds dominated by intimidation and anxiety by ambivalence degradation and shame Based

on six years of teaching and research in the South Bronx and in Southeast Amsterdam Toxic Schools is the first fully participatory ethnographic study of its kind and a searing examination of daily life in two radically different settings What these schools have in common however are not the predictable ideas about race and educational achievement but the tragically similar habituated stress responses of students forced to endure the experience of constant vulnerability From both sides of the Atlantic Ocean Paulle paints an intimate portrait of how students and teachers actually cope in real time with the chronic stress peer group dynamics and subtle power politics of urban educational spaces in the perpetual shadow of aggression
