History of Psychiatry and Medical Psychology Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book's chapters e.g. Moras Marx's D B Weiner's examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease *An Illustrated History of the New World* John Ledyard Denison, 1873

Im Westen Nichts Neues Erich Maria Remarque, 1984-11-15 The full German text of Remarque's 1929 novel is accompanied by German English vocabulary Notes and a detailed introduction in

The Lengthening War Michael Goode, 2016-08-31 The First World War was an event so important so catalytic so transformative that it still hangs in the public memory and still compels the Historians pen It was a conflict which by the end of the struggle had created a world unfamiliar to the one in existence before it and brought levels of destruction and loss all too unimaginable to the generation of minds which created it Despite this we still find it hard to picture what it was like to live through this war Right from its start Mabel Goode realised that the First World War would be the biggest event to take place in her lifetime Knowing this she took to recording it taking us day by day through what living in wartime Britain was like The diary shows us how the war came to the Home Front from enrolment rationing the collapse of domestic service and growth of war work to Zeppelin attacks over Yorkshire and the ever mounting casualty lists Above all else Mabels diary captures a growing disillusionment with a lengthening war as the costs and the sacrifices mount Starting with great excitement and expecting a short struggle the entries gradually give way to a more critical tone and eventually to total disengagement The blank pages marked for 1917 and 1918 are almost as informative as the fearful excitement captured at the onset of that tremendous conflict This is a strong narrative of the war easy to read mixing news with personal feelings and events often revealing gap between official news and reality Also included are several poems written by Mabel and a love story in the appendix giving a complete insight into the life of the diarist Of note is the fact that Mabel and her brothers the main serving protagonists in the diary lived in Germany for some time meaning they could all speak German and knew the enemy nation as many Britons did not *Philip's Atlas of World History*, 2001

"Memory, Masculinity and National Identity in British Visual Culture, 1914-1930" Gabriel Koureas, 2017-07-05 With its specific focus on British representations of masculinity in relation to the trauma of the First World War and notions of national identity class and sexuality this book provides a much needed addition to the historiography of visual culture during the period The study interrogates the complications arising out of issues of trauma cultural expressions of sexuality and affect as well as the ways in which these are encoded in diverse forms in visual culture and commemorative objects Concentrating on masculinity and cultural memory it investigates the ways in which these and the web of power relations that they entail worked during the interwar years in order to reconstruct

the post First World War British society In the course of the narrative the author looks at Bolshevism and the Returning Ex Servicemen the 1919 NUR Strike the Central Labour College in conjunction with banners and revolution as well as the Imperial War Graves the Cenotaph the London and North Western Railway memorial the Machine Gun Corps Memorial and the establishment of the Imperial War Museum He also excavates new archival material particularly case studies of shell shock sufferers and film footage of male hysteria

How to Grow a Navy Geoffrey Till, 2022-09-02 This book examines the large but neglected topic of the development of maritime power from both an historical and a contemporary point of view Navies have never been more important than they are now in a century becoming as widely expected increasingly and profoundly maritime The growing competition between China and Russia with the United States and its allies and partners around the world is essentially sea based The sea is also central to the world's globalised trading system and to its environmental health Most current crises are either sea based or have a critical maritime element to them What happens at sea will help shape our future Against that background this book uses both history and contemporary events to analyse how maritime power and naval strength has been and is being developed In a reader friendly way it seeks to show what has worked and what has not and to uncover the recurring patterns in maritime and naval development which explain past present and future success and failure It reflects on the historical experience of all navies but in particular it poses the question of whether China is following the same pattern of naval development illustrated by Britain at the start of the 18th century which led to two centuries of naval dominance This book will be of much interest to students of maritime power naval studies and strategic studies as well as to naval professionals around the world

A History of Cooks and Cooking Michael Symons, 2004 Never has there been so little need to cook Yet Michael Symons maintains that to be truly human we need to become better cooks practical and generous sharers of food Fueled by James Boswell's definition of humans as cooking animals for no beast can cook Symons sets out to explore the civilizing role of cooks in history His wanderings take us to the clay ovens of the prehistoric eastern Mediterranean and the bronze cauldrons of ancient China to fabulous banquets in the temples and courts of Mesopotamia Egypt and Persia to medieval English cookshops and southeast Asian street markets to palace kitchens diners and modern fast food eateries Symons samples conceptions and perceptions of cooks and cooking from Plato and Descartes to Marx and Virginia Woolf asking why cooks despite their vital and central role in sustaining life have remained in the shadows unheralded unregarded and underappreciated People think of meals as occasions where you share food he notes they rarely think of cooks as sharers of food Considering such notions as the physical and political consequences of sauce connections between food and love and cooking as a regulator of clock and calendar Symons provides a spirited and diverting defense of a cook centered view of the world
