Pentagon And The Cities:

The Fate of Cities Roger Biles, 2011 The first major comprehensive treatment of urban revitalization in 35 years Examines the federal government's relationship with urban America from the Truman through the Clinton administrations Provides a telling critique of how in the long run government turned a blind eye to the fate of cities **Urban Regimes and Strategies** A. G. Papadopoulos, 1996-11-15 If a city based its planning decisions on the needs of an international bureaucracy rather than on the traditional needs of local residents and businesses how would that city change Alex G Papadopoulos addresses this question with a detailed study of how the nineteenth century quarters of Leopold and Nord Est in Brussels have been transformed materially and functionally since the European Communities decided to locate their administrative headquarters there in 1957 Drawing on game and rational choice theories spatial analysis and urban morphology studies Papadopoulos analyzes how the landscape of Brussels's center has evolved over the last three decades under the influence of successive coalitions of local and foreign elites He describes how international real estate developers form ephemeral flexible and specialized regimes of cooperation with governmental organizations at all levels and with special interest lobbies to carry out major urban projects while local neighborhood groups conservationists and political factions such as the Green Party oppose them with qualitatively similar regimes of resistance Cities of the World Edwin Hodder, 1881 **Edge City** Joel Garreau, 2011-07-27 First there was downtown Then there were suburbs Then there were malls Then Americans launched the most sweeping change in 100 years in how they live work and play The Edge City *Congressional Record* United States. important perspective presented here of the relationship between the Pentagon and the residents and corporations of local economies Well written and expertly edited The Pentagon and the Cities lays out basic perspectives on the influence of military activity on local economies the ways in which urban elites have linked development to defense spending and the growth of political coalitions that resist such expenditures The contributors competently guide readers through an examination of the historic role of defense expenditure patterns of regional change restructuring the military industrial complex and the impact and transformation of regional economies Particular empirical examples highlighted include the cycles of growth and decline of New England s local economies as well as the free enterprise cities of Houston and Las Vegas This highly enlightening and stimulating volume is fascinating reading for advanced students and scholars in the areas of urban studies policy studies political science and geography The principal purpose of this interesting book is to relate cities to defense and to explain the spatial development of the defense industry It largely succeeds in both The book reinforces the perception that the military industry is enormously complex and whether we build it up or tear it down it will require a willingness to forgo simple solutions to what is obviously a very complex problem The book makes an important contribution to the study of the military and cities It certainly explains much of the geography of defense spending and it insists upon a connection between cities and defense Roger W Lotchin University of North Carolina Chapel Hill The strength of The Pentagon and the Cities particularly in the last two chapters is the ability to create linkages between economic political and ideological issues If the democratic process is to be effective in the conversion to a non militaristic economy these issues will have to be confronted on an individual and local level disClosure A Journal of Social Theory The principal purposes of this interesting book are to relate cities to defense and to explain the spatial development of the defense industry It largely succeeds in both The book makes an important contribution to the study of the military and cities It certainly explains much of the geography of defense spending and it insists upon a connection between cities and defense this volume is a good place to begin learning about cities and defense spending Urban Geography This volume serves nicely as an introduction to a claim that recently has come to the forefront of the economic development debate in the United States that defense spending was the implicit national economic development policy in the postwar era The volume also passes the acid test of utility I have found numerous occasions to cite it as a reference in both casual and intellectual conversation in recent weeks The Pentagon and the Cities is quite successful as an overview of the defense expenditure as economic development policy contention Kirby and his supporting authors have produced a quality highly readable volume on the implications of defense expenditure for regional economic growth This book should find a willing market among scholars and practitioners in the field of regional economic development Economic Geography The Pentagon and the Cities is the latest in the series of Urban Affairs Annual Reviews that deal with a timely research question The papers in this collection lay important groundwork for promising future research in political sociology work and occupations and social stratification The book is at its best when discussing

the effects of military spending and its decline on specific communities The editor and writers are to be commended The accumulation and description of data on the effects of military spending on local communities present a convincing picture that no sociologist studying local labor markets and political organization can ignore Contemporary Sociology
