People and Communities in the Western World Gene A. Brucker,1979 **People and Communities in the Western World** Gene A. Brucker,1979 *Library of Congress Catalogs* Library of Congress,1980 American Book Publishing Record ,1987 **National Union Catalog** ,1979 Includes entries for maps and atlases **Books in Series** ,1980 **Jacques-Louis David and Jean-Louis Prieur, Revolutionary Artists** Warren Roberts,2000-01-01 A comparative study of the French Revolution s most famous artist and a little known illustrator **Subject Catalog** Library of Congress,1979 **Subject Catalog, 1979** Library of Congress,1979 **Directions** ,1979 Minutes of the Stated Faculty Meeting Stanford University. School of Education,2000 **The German Right in the Weimar Republic** Larry Eugene Jones,2014-07-01 Significant recent research on the German Right between 1918 and 1933 calls into question received narratives of Weimar political history The German Right in the Weimar Republic examines the role that the German Right played in the destabilization and overthrow of the Weimar Republic with particular emphasis on the political and organizational history of Rightist groups as well as on the many permutations of right wing ideology during the period In particular antisemitism and the so called Jewish Question played a prominent role in the self definition and politics of the right wing groups and ideologies explored by the contributors to this volume **Paperbound Books in Print** ,1984 Bibliographie der Wirtschaftswissenschaften ,1981 **Making Salmon** Joseph E. Taylor III,2009-11-23 Winner of the George Perkins Marsh Award American Society for Environmental History Irrigated Eden Mark Fiege,2009-11-23 Irrigation came to the arid West in a wave of optimism about the power of water to make the desert bloom Mark Fiege s fascinating and innovative study of irrigation in southern Idaho s Snake River valley describes a complex interplay of human and natural systems Using vast quantities of labor irrigators built dams excavated canals laid out farms and brought millions of acres into cultivation But at each step nature rebounded and compromised the intended agricultural order The result was a new and richly textured landscape made of layer upon layer of technology and intractable natural forces one that engineers and farmers did not control with the precision they had anticipated Irrigated Eden vividly portrays how human actions inadvertently helped to create a strange and sometimes baffling ecology Winner of the Idaho Library Association Book Award 1999 Winner of the Charles A Weyerhaeuser Award Forest History Society 1999 2000 Driven Wild Paul S. Sutter,2009-11-23 In its infancy the movement to protect wilderness areas in the United States was motivated less by perceived threats from industrial and agricultural activities than by concern over the impacts of automobile owners seeking recreational opportunities in wild areas Countless commercial and government purveyors vigorously promoted the mystique of travel to breathtakingly scenic places and roads and highways were built to facilitate such travel By the early 1930s New Deal public works programs brought these trends to a startling crescendo The dilemma faced by stewards of the nation s public lands was how to protect the wild qualities of those places while accommodating and often encouraging automobile

based tourism By 1935 the founders of the Wilderness Society had become convinced of the impossibility of doing both In Driven Wild Paul Sutter traces the intellectual and cultural roots of the modern wilderness movement from about 1910 through the 1930s with tightly drawn portraits of four Wilderness Society founders Aldo Leopold Robert Sterling Yard Benton MacKaye and Bob Marshall Each man brought a different background and perspective to the advocacy for wilderness preservation yet each was spurred by a fear of what growing numbers of automobiles aggressive road building and the meteoric increase in Americans turning to nature for their leisure would do to the country s wild places As Sutter discovered the founders of the Wilderness Society were driven wild pushed by a rapidly changing country to construct a new preservationist ideal Sutter demonstrates that the birth of the movement to protect wilderness areas reflected a growing belief among an important group of conservationists that the modern forces of capitalism industrialism urbanism and mass consumer culture were gradually eroding not just the ecology of North America but crucial American values as well For them wilderness stood for something deeply sacred that was in danger of being lost so that the movement to protect it was about saving not just wild nature but ourselves as well

The Rhine Mark Cioc,2009-11-17 The Rhine River is Europe s most important commercial waterway channeling the flow of trade among Switzerland France Germany and the Netherlands In this innovative study Mark Cioc focuses on the river from the moment when the Congress of Vienna established a multinational commission charged with making the river more efficient for purposes of trade and commerce in 1815 He examines the engineering and administrative decisions of the next century and a half that resulted in rapid industrial growth as well as profound environmental degradation and highlights the partially successful restoration efforts undertaken from the 1970s to the present The Rhine is a classic example of a multipurpose river used simultaneously for transportation for industry and agriculture for urban drinking and sanitation needs for hydroelectric production and for recreation It thus invites comparison with similarly over burdened rivers such as the Mississippi Hudson Colorado and Columbia The Rhine s environmental problems are however even greater than those of other rivers because it is so densely populated 50 million people live along its borders so highly industrialized 10% of global chemical production and so short 775 miles in length Two centuries of nonstop hydraulic tinkering have resulted in a Rhine with a sleek and slender profile In their quest for a perfect canal like river engineers have modified it more than any other large river in the world As a consequence between 1815 and 1975 the river lost most of its natural floodplain riverside vegetation migratory fish and biodiversity Recent efforts to restore that biodiversity though heartening can have only limited success because so many of the structural changes to the river are irreversible The Rhine An Eco Biography 1815 2000 makes clear just how central the river has been to all aspects of European political economic and environmental life for the past two hundred years
