The Transformation of Investigative Journalism in China Haiyan Wang, 2016-04-29 Investigative journalism emerged in China in the 1980s following Deng Xiaoping's media reforms Over the past few decades Chinese investigative journalists have produced an increasing number of reports in print or on air and covered a surprisingly wide range of topics which had been thought impossible by the standards of the Communist era In the 2010s however investigative journalism has been replaced by activist journalism This book examines how with the aid of new media technologies and in response to new calls for social responsibility these new era journalists vigorously seek to expand the scope of their journalism and their capacity as journalists They tend to perceive themselves as more than professional

journalists and their activities are not limited to the physical boundaries of newsrooms They are not only detached observers of society but also engaged organizers of social movements they are social activists as well as responsible journalists who challenge state power and the party line and point to the limitations of the more traditional conceptions of journalism in China This book analyzes how journalism in China has been gradually transformed from a tool of the state to a means of broadening calls for democratic reform *Integrated Performance Management* Kurt Verweire, Lutgart Berghe, 2004-12-23 Linking various disciplines and management functions *Integrated Performance Management* provides the reader with a concrete framework to manage organizations successfully The authors do not isolate a single strategy to manage performance Instead the book focuses on a range of strategies providing the reader with an introduction to each one The concepts under analysis were developed through intense dialogue with business managers While maintaining academic rigour *Integrated Performance Management* presents ideas that students will find relevant outside of the classroom Postgraduate and MBA students in a range of areas including strategy accounting finance operations management marketing leadership and human resource management will find this book useful **EBOOK: Personalisation for Social Workers: Opportunities and Challenges for Frontline Practice** Jenni Burton, Thomas Toscano, Maryam Zonouzi, 2012-06-16 This helpful text represents another brick in the wall for social workers and social work students seeking to make sense of personalisation person centred support personal budgets and the changing role of social work in the future This book will help all concerned with social work make better sense of what this should look like if it is to support social justice inclusion and equality Professor Peter Beresford OBE Brunel University and Chair Shaping Our Lives This informative text bases the Personalisation discussion on real life examples and perspectives providing a balanced account of the opportunities and obstacles faced by all stakeholders engaged in this agenda The final chapter on managing change provides the reader with an opportunity to step forward in time and consider how Personalisation might be located within the historical timeline of delivering social care and whether concepts of co production empowerment and citizenship can in fact become central to this agenda A book to get you thinking and doing Ali Gardner Senior Lecturer Manchester Metropolitan University UK The authors have written a timely and highly topical book on the impact that Personalisation has and will have upon the world of Social Work They do so in a very accessible way through highlighting the benefits of the model to all concerned but crucially they explore some of the many concerns In particular they address the anxieties expressed by qualified social workers upon their future role I shall certainly draw upon the text for my own teaching and learning and will encourage students and practitioners to do the same Paul Hollingdale Course Leader University of Huddersfield UK Personalisation remains a huge talking point in the world of social care This timely book addresses the tensions opportunities and challenges faced by social workers attempting to implement personal funding and support Written by three academics with extensive first hand experience of supporting people in personalised ways the book highlights the ethical dilemmas and complexities of frontline

practice and is grounded in a pragmatic and creative approach to personalisation The authors offer an honest representation of positive aspects of personalisation and examine areas that cause concern The book also Contains scenarios based on realistic examples of supporting service users and carers Recognises the political social cultural and individual factors that interplay in personalisation Provides a balance between an academic understanding of personalisation and application in practice Presents a vision for what the future would look like with fully implemented personalisation in adult social care
